the utmost. They have not had the responsibility of meeting the problems which grew out of the war. They have not thought out the difficulties which arose when peace came, attended by an influx of students, a demand for new teachers, and the increased cost of living and of materials. They have not procured the facts as a basis for criticism.

The President of the University, Dr. Donovan, has been at the forefront while these matters have been so pressing. He has worked day and night, unselfishly, with the greatest diligence and with much wisdom. Others have helped, as far as they were able to do so, but he is the one who must bear the brunt of the burden. He has done a good and faithful job, with tireless energy. It is only fair that we should acknowledge these efforts which he has made on behalf of the University and express to him our appreciation and our most cordial and hearty support. If these sentiments appeal to my colleagues, as I hope they do, then Mr. Chamberlain, Chairman, I move that they be declared to be the sentiments of the entire group here.

Following Dean Evans' remarks, President Donovan expressed his appreciation of the attitude of the Faculty. He stated that he had gone to the General Assembly with a request for an appropriation that was double anything the University had had before, and that prospects were good for its being approved. He stated also that the charges brought by the four students might do some good in that they would call attention to the needs of the institution.
