

Students, Faculty, Townspeople Will Greet Coach Blanton Collier At Rally Tonight

Enrollment Shows Gain For Spring

4,269 Register, Early Tab Shows

By RONNIE BUTLER

An upward trend in student enrollment at the University was indicated by the number of students who had entered the University Wednesday afternoon.

Enrollment at the time reached a high of 7,900 registrants.

Following the sharp decline in college enrollment brought about by the Korean war, predictions were made to the effect that, by 1950 at the latest, college enrollment would reach all-time records.

The expected increase was partly based on the theory that Korean vets would add substantially to enrollment.

Donovan Predicted Increase On September 18, 1952, Dr. Herman L. Donovan, UK president, predicted that there will possibly be more than 10,000 students on the campus within the next few years.

Swearing in the new freshman class in Memorial Coliseum, Dr. Donovan said that the University's enrollment would be at its greatest within a two-year period.

"I anticipate the enrollment will be larger two years from now (Sept. 16, 1954) than any in the history of UK, unless we have a third world war, and we pray to God that this will not happen," he said.

Program Launched Because of the building of new men's and women's housing facilities and the erection of new fraternity buildings.

The program included (and still includes) the building of new men's and women's housing facilities and the erection of new fraternity buildings.

While at Florida, Brown told him that he would not stand in his way if he wished to accept the Wildcat offer. Subsequently, he came to Lexington and accepted the position.

The signing of Collier brought an end to much speculation concerning the identity of the new Wildcat coach. Many names were frequently mentioned, as the probable successor to Bryant. These included: Ermal Allen, Clarence Underwood,

ARE YOU SURE THIS IS THE CLASS YOU WANT?—A girl signing up for military science isn't such a ridiculous thought on those hectic registration days. Actually Trish Williamson was just having a bit of fun at the expense of SFC. George S. Gordon of the Signal Corps.

UK Appoints Collier As Football Coach

By JOHN RYANS Sports Editor

The UK Athletics Association announced last Wednesday afternoon that Blanton Collier has been selected head football coach to replace Paul Bryant, who resigned last week. Collier has been an assistant coach of the Cleveland Browns pro team for the past eight years.

In selecting Collier the University has selected a Kentuckian to handle the Wildcat reins for the next three seasons. Collier is a resident of Paris, Ky., and coached at Paris High from 1927 to 1943, when he went into service.

Collier arrived in Lexington early Wednesday morning to confer with the Athletics Association, and it wasn't until then that he made his decision to accept the Wildcat coaching berth. Before coming to Lexington, Collier flew to Florida to discuss the opportunity with Paul Brown, head coach of the Cleveland Browns and personal friend of Collier.

Gives Go-Ahead While at Florida, Brown told him that he would not stand in his way if he wished to accept the Wildcat offer. Subsequently, he came to Lexington and accepted the position.

The signing of Collier brought an end to much speculation concerning the identity of the new Wildcat coach. Many names were frequently mentioned, as the probable successor to Bryant. These included: Ermal Allen, Clarence Underwood,

UK Appoints Collier To End Thursday

By JOHN RYANS Sports Editor

Jack Curtice, Sid Gillman, Carmie Leslie, Farmer Johnson, etc.

Serves as Assistant Coach Coach Collier first met Paul Brown, when he served as Brown's assistant coach of the Great Lakes Naval team during World War II. Then when Brown became the head coach of the Cleveland Browns, he took Collier with him. Collier has served as Brown's assistant at Cleveland for the past eight seasons.

The new Wildcat mentor is a graduate of Georgetown College of Georgetown, Ky., and did graduate work at UK. He and his wife, Mary Forman Collier, have three daughters: Carolyn, 16, a freshman at Randolph-Macon, Ky., 14, and June, 12.

Coach Collier said that he has not made any policy decisions, as yet, and declined to say whether he will keep the all-Kentucky policy that Paul Bryant had been using. Bryant had been limiting the out of state scholarships to five per year.

Association Will Support The Kentucky High School Athletic Association through its president, Edgar McNabb, and its secretary, J. R. Montjoy, said that they would offer Coach Collier all its influence in securing the Association's support for him.

The new coach, now 47, said that he planned to use a combination of the Bear-T, used by the Browns, and the split-T, used by the Colts. He said that the schedule for next season looked terrific and that he certainly had his work cut out for him.

Coach Collier plans to live at Paris for the time being, until he can get situated in his new position. The directors contain the names, addresses, telephone numbers (University extension and home numbers) and departments of staff and faculty members, in addition to other information pertinent to the University.

Big Reception Starts At 6:30

Eight days after Paul Bryant resigned as head football coach of UK, Landon Collier, a native of Paris, Ky., is being welcomed as the new leader of the football squad.

A hero's welcome will be extended to Coach Collier at 6:30 p.m. today in front of the Memorial Coliseum.

Representatives of the City of Lexington, the University, the football squad, and the Student Government Association will assemble to greet Coach Collier.

On behalf of the City of Lexington, UK's band, the Marching 100 and the UK cheerleaders will parade, starting at 6 p.m. past the men's dorms, down Limestone, to Maxwell, to Rose, and from there, to the Coliseum.

Band Requested To Assemble Warren Latz, director of the UK Band, has requested that all band members be in the Fine Arts building in uniform by 6 p.m. at the latest.

Members of the committee asserted in the resolution that "further delay in establishing a medical school will be gravely harmful to the health and welfare of the people of Kentucky."

On January 14, the University Committee on Medical Education reported that Kentucky is now the only southern state without a state medical school either in operation or being built.

Appointed over a year ago by University President Herman L. Donovan, the committee submitted a summary of 10 points for its report, which has been turned over to the Kentucky Legislative Research Committee.

It is pointed out that it is urgent need of more trained physicians.

Before these physicians can be made available, it will be necessary to train them here.

One medical school at the University of Louisville cannot train all.

A state medical school to train physicians must be established by the people of the Commonwealth.

The state medical board must be a part of the state university.

The University of Kentucky must affirm its obligation to train physicians.

Its location is the best site for the medical school and its auxiliary functions, including those of a state hospital.

The Commonwealth can build and support a medical school of excellence at UK.

The medical school of the University will work with presently existing medical schools.

The highlight of the evening will be the announcement of the Mardi Gras queen and the most popular performer, Jean Skinner, Alpha Sigma Kappa candidate, who is a KD and a sophomore.

Six men have been nominated for this year's popular professor candidate, one from each college of the university. Voting will take place from 8 a.m. to 4 p.m. Monday in the Student Union.

Robert E. Sigafus, assistant professor of farm crops, in the College of Agriculture.

William Lewis Roberts, professor of law, for the Law College.

Herbert L. Fogel, instructor in electrical engineering, for the College of Engineering.

UK Founders Day To Be Celebrated

Program Will Salute Dr. Peter, Dr. Morgan

The University marks its 89th birthday this month with three anniversary programs.

(1) The annual Founders Day program at 4 p.m., Sunday, Feb. 21, in Memorial Coliseum, saluting two great UK scientists of the past—Dr. Robert Peter and Dr. Thomas Hunt Morgan.

(2) Talks spotlighting the achievements of the two scientists at 8:30 p.m., Wednesday, in the foyer of the Margaret I. King Library.

(3) A grandiose memorial service honoring three past presidents of the University at 2:45 p.m., Sunday, Feb. 21, at the grave of Dr. Frank L. McVey in Lexington.

Dr. Peter, pioneer Kentucky chemist, and Dr. Morgan, only Kentucky native to receive the Nobel Prize in medicine, will be honored at the Coliseum program in a dramatic presentation portraying the leading events of their lives.

Featured roles in the Founders Day dramatization will include members of the UK student body, with music by the University Symphony Orchestra and the University Chorus.

In addition to the Founders Day ceremony itself, a program highlighting the achievements of the two scientists will be given Wednesday afternoon by two current UK department heads.

Dr. John M. Carpenter, head of the Department of Zoology, will speak on the accomplishments of Dr. Morgan, while Dr. Charles E. Snow, head of the Department of Anthropology, will outline the life of Dr. Peter.

Also participating in the Wednesday afternoon program will be Dr. Lawrence S. Thompson, secretary of libraries, who will send greetings from the library staff.

Dr. Peter came to Lexington in 1822, serving as chairman of the Transylvania University Chemistry Department and later as dean of the Medicine College. When Kentucky University was transferred to Lexington, Dr. Peter was named as chairman of the Department of

Membership Drive For SUB Groups To Start Monday

The second semester membership drive for Student Union auxiliary groups will be held next Monday through Wednesday, Jane Ann Stockton, chairman of the publicity committee, announced this week.

Everyone is eligible to sign up at the Student Union ticket booth which will be open from 10 a.m. to 3 p.m. during the three-day campaign.

Students may choose from the eight committees available, each of which is headed by a member of the Student Union Board.

The committees and their activities include Publicity, handling all publicity for the Student Union and publishes the SUBway; Sports, managing ping-pong tournaments and similar activities; Coffee Chat, sponsoring a program of speakers which meets every two weeks in the Music Room; House, sponsoring Tuesday night Sweater Swings, bridge tournaments, etc.; Outing, taking hikes and overnight trips; Membership, sponsoring the membership drive; Poster, making posters and publicizing Student Union events; and Activities, helping with campus projects.

Margaret Holyfield is the recently-elected president of the board. She replaces Emma Belle Barnhill who graduated in January.

The board held a similar drive last semester which was considered very successful by committee chairman.

No actual goal has been set, and any number of students may register for the different committees.

Books Offered To Encourage Library Contest

Nearly 500 books will be given away to students in an attempt to pledge them to enter their personal libraries in the annual Samuel M. Wilson Library Contest this semester.

The give-away will allow any student to select up to 10 books of his choosing, provided that the student pledges himself to enter the Wilson contest. Applications may be made at any time in the office of the director of the Margaret I. King Library.

A donation by an anonymous UK alumnus who is now a leading attorney, has allowed the library to make the gifts possible. The books have already been purchased and prepared for the library for distribution to students.

A fund established by the late Samuel M. Wilson, founder of UK's Wilson Library, has made the contest possible. It will be held later in the spring semester, and a cash award will be given for the best personal library owned by a UK student.

Musicales Canceled

Due to the illness of James Kestel, conductor of the musical group at UK, the musicale previously scheduled for Sunday afternoon in the library has been canceled.

Dr. Edward Stein, head of the Department of Music, has announced.

Mr. King was scheduled to appear with Almo Kivimaki, tenor, in a program of vocal music. It will be given at a later date. Dr. Stein said.

Lily Pons To Appear Tuesday

Lily Pons, coloratura soprano of the Metropolitan Opera, will appear in a concert beginning at 8:15 p.m. Tuesday in Memorial Coliseum. The concert is a continuation of the Community Concert and Lecture series.

Miss Pons, long a favorite of concert-goers, has appeared in several American and foreign cities. Her latest debut was with the Metropolitan Opera on January 2, 1951. "Lucia di Lammermoor" she had originally been booked for as a pianist, but when her national vocal talent was discovered, she turned to singing.

Made American Debut Five years after beginning studies under Alberti di Gorizia, a French vocal expert, she made her American debut. She was a dramatic success and the following January she made a tour of South America, achieving similar success. Since then, she has sung in every great opera house in the world.

Prelim Sessions Of Bridge Meet Set For Saturday

The preliminary session of the duplicate bridge tournament, sponsored by the Student Activities Committee, will be held at 1:30 p.m. Saturday, Feb. 13, in the Student Union Building.

Dr. N. B. Allison, associate professor and chairman of the committee, will direct the tournament.

In order to be eligible to enter the tournament, a person must be taking at least 12 hours at the University this semester and cannot be on probation. Students are invited to enter the tournament with or without a partner. Miss Washington will be the scorer.

Those who are interested in entering the tournament may sign up at the Student Union information desk not later than noon Wednesday. The hostess on duty will have the sign-up sheet.

The winners of the tournament will have their names put on a plaque which will be placed in the Card Room of the Student Union.

Keys Valentine Queen To Be Chosen Tonight

UK's "Queen of Hearts" will be crowned in the Student Union Ballroom tonight at the Valentine's dance sponsored by Keys, sophomore men's honorary. The dance will be held from 8 to 12 p.m. in the Student Union Building.

The queen and two attendants will be selected by persons attending the dance. Ballie boxes with each candidate's name and picture will be placed at the entrance of the ballroom.

A silver trophy will be presented to the winning candidate.

Clyde Trask and his orchestra will furnish music for the dance. The ballroom will be decorated in the Valentine motif.

Special tables for independents and for individual fraternities will be set up for the dance. Tickets may be purchased from members before the dance or \$2.50 a couple and \$1.50 a tag; admission will be \$1 a couple at the door.

LILY PONS To Appear Here

Keys Valentine Queen To Be Chosen Tonight

# UK Students Complain Profusely About University And Activities

UK has much to offer its students, both academically and socially speaking, but UK students have chosen to ignore this fact. They continue on their merry way blithely complaining about anything concerning the University.

A new semester has begun, new students have enrolled, and new classes are underway, so why not follow through and adopt a new attitude about UK? Students will find that it is just as easy to praise the University as it is to censure it.

The Margaret I King Library is a fully accredited library and considered one of the best in the south. In addition, there are 12 specialized libraries on the campus, including the engineering, biological sciences, and art libraries. The UK Libraries contain over half a million volumes, a first hand information, with a staff of trained librarians to help with all reading problems.

UK is divided into seven colleges: Arts and Sciences, Agriculture and Home Economics, Engineering, Law, Education, Commerce, and Pharmacy—all of which rank high scholastically. In addition, there is also a Graduate School and School of Journalism on campus. All various colleges and departments of the University are accredited by their respective professional associations.

Faculty and staff members at UK include many of the nation's leading educators, scientists, and scholars. Ninety-two are listed in Who's Who in America, 22 in Leaders in Education, and 53 in American Men of Science. There are approximately 800 persons on the administrative, teaching and research staffs.

The University yearly brings noted lecturers and artists to the campus. These programs are carefully planned to give the students a variety of entertainment, cultural opportunities, and first hand information on world politics. Students who fail to take advantage of these programs are missing an important part of their education.

Day after day, the beauty of the campus also seems to go unappreciated by the students. Each year the University spends hundreds of dollars on

the beautification of the campus. This money is spent for the students as well as the many visitors who come to UK for meetings. Dr. Donovan reports that he continually receives letters from alumni and visitors praising the beauty of the campus.

All students are welcome to express their opinions on the administration and school policies through the Student Government Association. Every student, upon registering at UK, automatically becomes a member of SGA and is free to attend any or all of the meetings. Representatives are elected to the group from each college by the student body.

There are many other organizations on the campus which appeal to any talent, skill or interest the student might have. Among these are church groups, music groups, art and literary organizations, and many others.

Sports have also become an important part of the structure of the University, both for the participants and the students. The top teams which have been turned out by the University should make any student be proud to say he's from UK. Needless to say, whether in sectional or national competition, UK teams can hold their own.

A university, like any other organization, must have support to grow. In this case, it is student support that is needed. Students should remember that when they censure the University, they are only censuring themselves since they are just as much a part of it as the administration or faculty. Adopt a new attitude—be proud of UK.

## Conversation Is Art Collegians Overlook

What do collegians talk about? What is the subject of their conversation when they take time out for coffee with friends, or when they are out with a date?

Conversation is an art in which Americans are deplorably void, and certainly college students are lacking in this ability. It is especially disheartening when one remembers that this ability, so useful for giving information and increasing the value and satisfaction of social contacts, is "The most accessible of pleasures," as Robert Louis Stevenson said. It costs nothing, it may be carried on at almost any time, anywhere, and it is capable of contributing bountifully to many kinds of pleasures.

A good conversationalist will respect the other person's rights to feel as they do, give hospitable as well as judicious attention to what the other says, and never quarrel. He will keep his voice low, but audible. He will laugh easily, and at the right times. When another person has something to say, he will permit him to speak his mind.

Probably the most common topic of conversation, and certainly the most dangerous, is people. Adverse criticism comes more easily from the common mortal than does praise, and often proves to be of little interest. Also, everyone tends to fear the habitual critic, not without reason, suspecting that he himself may be the next victim.

Many topics should not be introduced one after another, but the conversation should dwell on one worth-while subject as long as it is not exhausted.

Is there any good reason why conversation should not be included as a definite aim of a college education? Certainly very little emphasis is placed on it in the contemporary classroom. Perhaps this is because students do not demand it.

Ball State College, Muncie, Ind.

# Our Readers Speak: On McCarthy, Coach

Dear Editor:

During my four years at UK it was the custom for your fine newspaper to have editorials concerning campus life, not engaging in political controversies. That is the way I think it should be. It was very shocking to read in the Jan. 5th issue an editorial by Bonnie Butler, not a member of the editorial staff, condemning Senator McCarthy and his activities. Since the Senator has not investigated anyone at UK, nor has he investigated Communism in colleges, I fail to see the merit of the editorial other than stating his own belief to which he is entitled, but not on the editorial page.

Concerning the merits of the editorial, I would like to point out to Mr. Butler that Senator McCarthy has recently been named one of the 10 most "admired" Americans in the world, according to the Gallup Poll. He is the only person in Congress to be so selected.

Mr. Butler seems to be very sympathetic to people who hide behind the 5th Amendment. Maybe he should be at Harvard rather than UK where numerous professors hide behind it so well. I might inform Mr. Butler that no federal employee can keep his job by this defense. Since I am president of a local unit of government employees, I stand behind this move to eliminate subversives from our government.

The assertion that Senator McCarthy is opposed to intellectual freedom is so ridiculous that it is surprising that any anti-Communist like Mr. Butler would make that statement. He must have read the release of the Americans for Democratic Action. (ADA)

If Mr. Butler would expend his time reading about

"Why shouldn't I have applied for Bryant's job?—I haven't missed a game in three years!"

## The Gallery

# Louisville Sports Writer Berated For Attitude Concerning Wildcats

By LESLIE MORRIS

A word of explanation to unwary newcomers on campus concerning this spot, commonly labeled "The Gallery": this is a bit of a column about nothing and everything in general, and [as we said in our very first edition on September 25] we will offer our biased and unvarnished comments on anything, particularly as it concerns the entertainment sphere and sundry activities outside the campus whirl. True to our word we've featured everything from movie reviews and platter talk to

of Kentucky duels, and we'll continue to do so as long as we can get free space to scribble in. And now that we're all sufficiently confused, we're going to start right off on the wrong foot by discussing a matter that is neither off-campus nor any of our business—but here goes anyway, with sports-editor Byans' indulgence: just what is the NCAA trying to do to our beloved Cats? It seems that the old adage "if you can't beat 'em, join 'em," has been twisted to mean "if you can't beat 'em, ban 'em."

At any rate, some cookie-assisted by a Louisville scribe—has dusted off a forgotten rule in the be-fuddled books of the NCAA and found a clause-oh, happy day—that seems to disqualify UK's Big Three from tournament competition.

But you all know that story. What we're concerned with is the nonchalant attitude of a certain Falls City sports editor, namely Mr. Earl Ruby. Now from reading Sir Ruby's daily column we have concluded several things: one, Ruby prefers the talents of Indiana and Western over UK; two, he thinks Cliff Hagan is an All-American; and three, he goes along with the obscure "Get-Kentucky" rule.

Now the first two points we dismiss as being Ruby's business, but we object to his lackadaisical acceptance of the NCAA eligibility clause which bans Hagan, Ramsey, and Lou Liu, from the March plays-off. It's true that rules are not made by sports writers, but a writer as widely known and quoted as the Earl could make himself heard if he wanted

to, and it's our opinion that there are quite a few points in the Wildcats' favor.

In the first place, the "graduate rule" did not foreclose the NCAA's 1952 action barring a major team from a year's competition, and said Association has found ways of getting around rules before. There are other factors, but most important: it is morally right to take three great basketball players and cut their careers, when they, themselves, are not only simon-pure athletes, but good students as well? Ruby says a rule is a rule, but this we don't see. He, or no other sports writer, can make the NCAA allow these three boys to play—but he could help.

Now don't misunderstand me—we have all the respect in the world for Ruby, as a journalist and as a gentleman, but we doubt his propriety when he quotes an Indiana fan who slurs that "bunch in Lexington," and replies, "Thank you . . . I'll play my harmonica at your wedding." Well, we won't be at that wedding, but we will be at the coming funeral when a group of little men bury the Cats. We'll be there, but we won't like it . . .

A local theater has re-opened and hopes to make a success of a new "art series," and we wish them luck. Their first couple of cinemas were among the outstanding dramas of the year, and we're speaking of "The Cruel Sea," based on Nicholas Monsarrat's best-seller, and London's "Gilbert and Sullivan." We can also recommend highly the Morris Engel-Ruth Orkin photographic essay, "The Little Fugitive," now playing, and next week's showing of Disney's feature-length drama, "The Living Desert," which has an Academy Award cinched.

Incidentally, UK students can obtain special discount cards by presenting their I-D cards at the downtown box-office.

To Whom It May Concern, a brief nod-down on the latest Cinemascope, "Beneath The 12-Mile Reef"—good, "King of the Khyber Rifles"—we can't even call this one "fair"; it was just plain lousy. We haven't seen "The Command" as yet, and we're saving M-G-M's "Knights of the Round Table" for a later review, but we will say that it is everything "The Robe" was supposed to be. See you next week.

Dear Editor:

I am writing to you in behalf of the Committee on Coliseum Seating, a student committee investigating the possibility of installing backs on the student seating section. This committee is a part of a larger organization, the Parliamentary Usage Class under the Department of English here at the University. The Committee on Coliseum Seating has approached Athletic Director Bernie Shively on the question of putting backs on the student seating section. The possibilities of doing such were discussed fully, but Mr. Shively informed us that he could take no action without the approval of the Athletic Board and that our request should come through the student representative on the Board, the president of SGA.

There are several reasons why we the committee feel that backs should be installed on the student seating section: first, it would add to the students' pleasure and comfort at athletic events and concerts, as the said occasions last for two hours or more; second, it would cause an increase in student attendance at such events, for knowing a comfortable seat was available to them as well as to townspeople would make the students more eager to attend; and last, putting backs on the student seating section would enhance the appearance and the value of the Coliseum to future students of UK and to the University itself.

Sincerely yours,

Committee on Coliseum Seating  
Parliamentary Usage Class

## The Toolbox

# John Q. Advised To Play It Cool Concerning Rush

By BONNIE BUTLER

To: John Q. Student.  
Subject: Registration and fraternity rush.  
From: Cynicus the Younger.

Dear John Q. Student:

By now, you've had it—but good. And there's more to come. You registered, and, in so doing, found that registration is three degrees worse than the miseries of the Black Hole of Calcutta.

You got mad and swore at people.

You cheated to sign up for classes out of turn—only to find that the classes were already filled.

You argued with advisors, pleaded with deans, and begged instructors, professors, and other faculty members to give you a break.

You built up a hearty hatred for the joker who insisted that one of the many forms that had to be filled out be done in pencil—when all you had was a leaky fountain pen.

Somehow, through it all, you got the impression that you were disliked as much by the people you came to dislike as of you learned to dislike registration.

But there's more to come.

As if registering weren't enough, John Q., you still have fraternity rush to look forward to.

Fraternity rush. Hypocrisy in the large, economy-sized package, complete with concealed horrors and the new miracle drug, Suck-'Em-In-We-Need-The-Dough.

Of course, there are exceptions, but you'll have to be doubly alert to find them.

Just for you, John Q., these tips on finding a decent fraternity have been formulated.

1. If every member of the frat grabs your hand, smiles, and, in general, acts as if the universe revolved because of your existence—get out.

Look for the guys for real natural around.

2. Be wary of shining trophies and glorious histories. Somebody you'll have to shine those same trophies to impress other rushees (if you aren't careful). Remember that even a garbage dump's contents can have a glorious history.

3. Don't believe everything you hear in connection with TV sets, pianos, and radio-victrola combinations. You might wind up helping to carry them back to the stores after rush is over.

4. Pay special attention to the way the frat boys dress. White shirts and ties may be expected, but if there isn't at least one guy around in a sport shirt and needing a shave—forget it.

You don't like to shave that much.

5. Stay clear of the frats that wallow in beer parties. Their members have minds like the beverages they drink—fluid, with a tendency to go stale after a short period of exposure to the world.

6. If you're a bum, and know you're a bum, keep away from the frats that praise your personality.

Look for a frat made up of other bums.

7. Watch out for the "We Know All the Girls" frats. They're usually the lads who hope and pray you have two sisters to supply their whole chapter with dates.

8. Beware of frats that wine and dine you elaborately, with elaborate table settings and elaborately dressed waiters.

Pledges must in the course of their training, serve the meals.

But they're much less elaborate. Much.

9. When you come across a frat that sings its entire repertoire of frat songs every 15 minutes, head for the hills.

They probably have a secret handshake that starts from the fifth vertebrae and works up, sideways, to the pineal gland.

Too much nonsense, in other words.

10. Look out for the intellectuals. You don't particularly want a roommate who chats constantly about the basic fallacies of oriental philosophical systems.

11. On the other hand, look out for the idiots. If a frat doesn't make its standing for a couple of times, it has its charter yanked from under it.

And remember. Any idiot can smile and shake your hand and say he knew your father when.

In short, John Q., try to latch on to a frat made up of the kind of guys you wouldn't mind rooming with.

12. SPECIAL: in the interest of your future happiness, there is one item which you should check and double check.

That item, John Q., is the "plumbing" in the frat you're considering. Make sure that there are enough showers, faucets, and other gadgets found in such places to assure you the maximum of comfort and convenience.

When 65 guys start rushing to make a first hour class, plenty of showers, faucets, and etceteras will come in handy.

When a guy borrows your clothes, uses your toothpaste, steals your girl friends, busts your alarm clock, spills food on your tux, doesn't get you up in time for classes, wrecks your car, swipes your class notes, and insults your profs while you're standing around . . . you have to like him pretty much to keep yourself out of court.

Plus 9 more.

## Flunking A Course? Here Is Sure Way

Failing a course isn't really hard, once you set your mind to it. The Oregon State Daily Barometer has come up with 15 easy ways to flunk a class.

- 1. Enter the course as late as possible. By changing your mind about the curriculum after school starts, you should be able to avoid classes until the second or third week.
- 2. Do not bother with a textbook.
- 3. Put your social life ahead of everything else. If necessary, cultivate a few friendships in the class. Interesting conversation should be able to drown out the noise of the lecturer.
- 4. Observe how seely most professors look and treat them accordingly.
- 5. Make yourself comfortable when you study. If possible, draw up an easy chair by a window.
- 6. Have a few friends handy during the study period so you can chat when the work becomes dull.
- 7. If you must study, try to lump it all together and get it over with. The most suitable time would be the last week of school.

8. Keep your study table interesting. Place photographs, magazines, golfish bowls, games, and other recreational devices all around while you are studying.

9. Use mnemonic devices on everything you learn. Since they are easy to forget, this approach prevents your mind from getting cluttered up with stale facts.

10. Never interrupt your reading by checking on what you have learned. Recitation is not very pleasant anyhow, since it shows up your deficiencies.

11. Avoid bothering with notebooks. If you plan to use one anyhow, so you can draw pictures of airplanes during the lecture, try to follow the simplest arrangement: keep all notes for a given day on the same sheet of paper.

12. Remind yourself frequently how dull the course is. Never lose sight of the fact that you really wanted to sign up for something else.

13. Review only the night before examination, and confine this to trying to guess what the teacher will ask.

14. Find out exactly when your final examination will be over so that you can plan to forget everything else about the course at that moment.

15. Stay up all night before important examinations. You can spend the first half of the evening discussing your determination to "hone" and the latter half drinking coffee.

Campus Capers

Social Activities In Full Swing As UK Men Move To Frat Row

Life has returned to the UK campus with its full swing after a gloomy week of final exams and then a much-needed week of recuperation. Now things are all set to roll for another semester with spring not too far off in Florida.

The new officers of Zeta Tau Alpha are Connie Cady, president; Diana Jo Adams, vice-president; Dorothy Mobley, secretary; Judy Stothoff, treasurer; Mickey McCullire, rush chairman; and Virginia Kutz, house president.

Chi Omega elected their officers for the coming year. They are Ann O'Rourke, president; Virginia Hunt, vice-president; Anne Crockett, secretary; Peggy Adams, treasurer; Kaki Edwards, pledge trainer; Sue Ann Hobgood, house president; and Betty Linn Farris, Ann MacIntosh, and Betty Jo Martin, rush chairman.

Fraternity Row is especially lively now with its new residents moving in and getting settled. The PIKA's moved right after Christmas, and between semesters the Kappa Sig, Lambda Chi, and Phi Sig evacuated their old houses for the new, modern ones off Rose Street.

Each fraternity house now holds 48 UK men, and the football players plan to move to their two houses soon. The names of the football houses have not yet been chosen.

The Phi Tau's joined the spirit during the vacation and have redecorated and rebuilt their entire basement. Mrs. Henri Mayek, the Phi Tau house mother, has taken a semester's leave of absence, and Mrs. John L. Lynn has taken her place.

The Keys' Valentine Dance will highlight the events of the first week back at school. This semi-formal dance will be held at 8 p.m. tonight, in the Student Union.

Information concerning available scholarships may be picked up in the office of the dean of the Graduate School, in Pence Hall, if has been announced.

A pamphlet listing information about scholarships for study next year is being given out to help interested students meet the March 1 deadline for the completion of filing for scholarships, Dean Herman E. Spryer said.

Open houses will also be held by the Alpha Gams, Kappa Alpha Theta's, Delta Zeta's, Alpha Xi's, Kappa's, and Zeta's from 2 to 3 p.m. Sunday for the girls going out for rush.

These pamphlets will also be distributed through the offices of the deans of various colleges and will be available at the Student Union checking desk, he said.

Open houses will also be held by the Alpha Gams, Kappa Alpha Theta's, Delta Zeta's, Alpha Xi's, Kappa's, and Zeta's from 2 to 3 p.m. Sunday for the girls going out for rush.

A CAMPUS-TO-CAREER CASE HISTORY He had a head start It took a class reunion to show Ed Mahler, '50, that all first jobs are not alike. He tells us why. (Reading time: 33 seconds) The class reunion at his alma mater, Swarthmore College, was an eye-opener for Ed Mahler. The talk among the Class of '50 switched to jobs. Ed had taken it for granted that everybody was happy with his work.

### New Book Views Youth

By Associated College Press

"Young people never are what they were in somebody else's day." So begins another analysis of today's "lost," "silent," and "unkindable" generation.

This one, however, published recently by the St. Louis Post-Dispatch, is by a writer who is in a position to know something about the subject—Margaret Mead, author of "Male and Female" and associate curator of ethnology at the American Museum of Natural History.

Anthropologist Mead says that, as far as anyone can guess, dissatisfaction with youth "has been going on since the Stone Age."

Even in Russia, she writes, where the younger generation has been thoroughly indoctrinated and deviators have been expelled, "it is pretty doubtful whether middle-aged communists think young communists are anything like as devoted to the Party as they were."

We cannot get an objective appraisal of the present generation, therefore, nor, writes Miss Mead, can we get a definitive answer from the young people themselves.

"When they say that they 'just want to be sure of a job' . . . 'a chance to marry and have children,' where does the 'just come from'?"

The "just" means that somebody—parent, teacher, preacher, writer.

(Continued to Page 8)

## 'She Was The Most' Helen Of Troy Story Told In Bebop Style

By BILL BILLITER  
Feature Editor

Once upon a time in the Greece that was there lived a solid perculator named Helen. Now Helen was a real siren, and she had beauty that was the smoothest. Her singing was the most, and she could shuffle the sandals off her dance partners at the local Grecian dives.

Helen was a real chick, sure enough, but she figured that her spouse, Menelaos, was a creep. Minnie Boy had already journeyed down most of life's speedway, and he had a bald dome and a few extra rounds of fat to prove it. Menelaos was a real potentate, to be sure, but fair Helen wanted swing and not a half-baked king. All too often King Minnie would be hustled out of Helen's chamber by her mystical words, "naddoo," which is bebop Greek for "get lost."

**Cats Hopped Ferry**

Now every day a crazy mixed-up kid named Paris hopped the ferry from his home in Troy to the plaster palace of King Minnie and Helen. Paris was a real Trojan cat, but he wasn't feeling too great because he had just been flushed by the coed he was pinned to at Troy U.

Paris was standing on the poop deck of the ferry when first he cast his optics on the luscious Helen. Helen was outside the palace feeding peanuts to some pigeons. "She's for me," mouthed Paris, upon seeing her. "She's got a form that's really frankin'!" He had the atomic bombs for Helen at first glance, to say the least, and so he went about introducing himself.

Paris leaped off the ferry and landed to the palace gate. "Howdy, man!" he said, lifting his helmet to Helen. "My name's Paris—what's your moniker?" "Crazy!" said Helen. "Dis that real hep togs with the rest, pist. My name's Helen, and man I do believe you are a gas!"

**Had Gab Fest**

Well, Helen and Paris pressed palms and after the formalities were over, they wailed, and gabbed real gab fest. Helen invited Paris to come into the palace and dance. Paris continued their frantic antics on the marble dance floor while King Minnie mumbled in the background with such a king.

Helenos took a dim view of the cool cat from Troy, but Paris was a real cat, and he wanted to get his teeth until her hubby consented to permitting Paris to stay. So Helen and Paris continued their frantic antics on the marble dance floor while King Minnie mumbled in the background with such a king.

**Got Crying Towel**

Helen drig out her crying towel, mopped her fair face and listened attentively. "Helen, baby," said Paris, "seeing as how I must return to Troy and you're not shot with the idea of staying with that old fossil—why don't you just blow this dump and come on a my house?" "Well, that's the wildest," said Helen, "but I think I'll go along with the one just for laughs!" "Terrific!" yelled Paris. "Now you go grab your garments, throw them in a sack and come on my house!"

"This it was that King Minnie came home after a hard day at the office only to find his spouse was a loose. She had literally flown the coop. Menelaos really flipped his lid and looked all over the palace—but it didn't do him a bit of good. For everyone knows that Paris and Helen were really gone.

And that's how two crazy love doves started the Trojan War."

### Carr, Lewis Write Magazine Article

Martha Carr and Louise Lewis, faculty members of the UK Department of Physical Education, are the authors of an article appearing in the February issue of the Journal of the American Association for Health, Physical Education, and Recreation.

The article, entitled "Town and Gown Folk Dance," deals with the possibility of providing experience in folk dancing through the combined efforts of the University and townspeople.

Edith Carr is head of the Department of Physical Education for Women, and Miss Lewis is director of the University's Service Curriculum for Women.

### Education Group To Meet Tuesday

Kappa Delta Pi, education honorary, will have a business meeting on Tuesday in the University High Library.

Mrs. Hollis O'Neal, president, said the "council" were built for new members and that officials would be elected.

## 'Red Planet' To Be Closer To Earth For Scientific Study In Two Years

By RONNIE BUTLER

Mars, the mystery planet, is coming closer and closer to the earth, and in two years will be at its nearest distance from us, 38 million miles.

At that time, scientists, professors, amateur astronomers, and thousands of interested students will turn their telescopes on the Red Planet, in hopes of finding new clues to the question of whether life exists on other worlds.

Mars has, since the beginning of modern astronomy, which came with the invention of the telescope, been the planet with the most interest to scientists. During the last century, an Italian astronomer, Schiaparelli, noticed markings on the surface of Mars. He called them canals, which, in Italian, means channels.

Through a misinterpretation of the term, people thought the word meant canals, and, since that time, many people have put forth the idea that the "canals" were built by intelligent beings to transport water from the north and south poles of Mars to its desert areas.

Most Easily Observed

One reason for the scientist's extreme interest in Mars is the fact that it is the most easily observed of all the planets. Unlike the earth's twin sister, Venus, Mars has no thick, hazy atmosphere to hide its face. When seeing conditions are good, surface markings stand out with clarity and can even be charted.

It is hoped that the new, 300-inch telescope at Mt. Palomar, a giant eye capable of penetrating two billion light years into space, will help take much of the guesswork out of our knowledge of Mars. Even with smaller telescopes, in the past, an amazing amount of information concerning our solar companion has been gathered.

First, we know that Mars has an atmosphere. From time to time, photographs taken through various color filters have shown clouds, scudding across the planet's surface, and spectroscopic tests—made by analyzing the make-up of light to determine its source—indicate that there is oxygen on Mars, although in much less quantity than on earth.

Can Support Life

Second, it is now known that the climatic conditions on Mars are capable of supporting life such as that found on earth. Mars has a year consisting of 687 days, and during its noon hour in the tropics in the summer season, the temperature often reaches 80 degrees Fahrenheit.

During the coldest parts of the year, the temperature drops as much as minus 40 degrees, no worse than the severe arctic weather on earth. Some scientists now believe that the thin atmosphere on Mars, because it doesn't cut off as much energy from the sun as our atmosphere does, might mean that the temperatures there are considerably higher—and therefore more livable—than present estimates show.

Third, and most interesting, there is a marked change in the coloration of Mars' surface as the seasons (Continued to Page 8)

### Librarians Attend Chicago Conclave

Four members of the UK library staff recently attended the mid-winter meeting of the American Library Association, held at the Morrison Hotel in Chicago.

They were Dr. Lawrence Thompson, director of the UK Libraries; Norma Cass, head of the Reference Department of the Margaret I. King Library; Artie Lee Taylor, reserve book librarian, and Martha Jane Livesey, member of the acquisitions staff.

Dr. Thompson was a principal speaker at a sectional meeting of the Association of College Reference Librarians. He spoke on "Development of Exchanges with Foreign Libraries."

A Commerce journal says he calls his girl friend "Baseball" because she won't play without a diamond.

Formula for surprising your girl friend: Place your arm around her waist. Draw her strongly toward you and hold her tight. Start to kiss her. When she says "stop," release her. Note the expression on her face.

## FIND THE RIGHT JOB AFTER COLLEGE

NAS Service Helps You NOW—  
Newly developed career plan open to students of all classes—at no cost or obligation.

If you're like most college students, you probably haven't made up your mind what you're going to do after graduation. There's no more reliable source of advice than your own College Placement Bureau.

To further clarify your thinking, to help you decide where your particular skills will find the greatest opportunities by competing one field against another, NAS has opened the way for you to secure first hand information from leading companies in the fields that interest you most.

NAS can do this because, as advertising representatives of more than 700 college newspapers, we are in daily contact with many of the most important and progressive companies in America. These companies not only constantly seek college-trained men and women, but often plan far ahead in competing with one another for the most promising prospects.

So, you see, this new NAS career plan is a service both to college students and business leaders. Here's how it works:

The coupon below indicates the fields in which the greatest opportunities exist today. You check those that interest you as a possible career. We'll do our best to see that your inquiry is referred to one or more of the

## IT'S ALL A MATTER OF TASTE

I've tried so many cigarettes. All brands from A to Z. But nothing beats that better taste! He Lucky Strike for me!

Charlotte Bernstein  
State University of Iowa

When you come right down to it, you smoke for one simple reason . . . enjoyment. And smoking enjoyment is all a matter of taste. Yes, taste is what counts in a cigarette. And Luckies taste better.

Two facts explain why Luckies taste better. First, L.S.M.F.T.—Lucky Strike means fine tobacco . . . light, mild, good-tasting tobacco. Second, Luckies are actually made better to taste better . . . always round, firm, fully packed to draw freely and smoke evenly.

So, for the enjoyment you get from better taste, and only from better taste, Be Happy—Go Lucky. Get a pack or a carton of better-tasting Luckies today.

Where's your jingle? It's easier than you think to make \$25 by writing a Lucky Strike jingle like those you see in this ad. Yes, we need jingles—and we pay \$25 for every one we use! So send as many as you like to: Happy-Go-Lucky, P. O. Box 67, New York 46, N. Y.

In all the campus coffee shops where students congregate, you'll hear this oft-repeated phrase: "Smoke Luckies—they taste great!"

### Rare Music First Editions Put On Display In Library

A collection of rare music first editions of the past 300 years has been placed on exhibit in the Margaret I. King Library and will be open to the public through Monday.

The exhibition consists of a collection from the archives of Broadcast Music, Incorporated, New York City. There are a total of 47 editions in the display.

Dr. E. E. Stein, head of UK's Department of Music, described the exhibit as "the largest and most significant collection of rare music editions exhibited in Lexington in recent years."

### Physics Colloquium To Hear Simon

Dr. Albert Simon, research physicist from the Oak Ridge National Laboratory, will be the guest speaker at the physics colloquium at 3:30 p.m., Wednesday in Prince Hall. Dr. Simon will speak on the "Polarized Particles in Nuclear Reactions."

The talk will be given in the physics library at 2 p.m., preceding the speech.

Dr. Simon, who received his PhD from the University of Rochester, is one of a group of guest speakers from Oak Ridge who will speak at the physics colloquium this semester.

### Mississippi Event Features Rabbin

Marvin Rabbin, assistant professor of music at the University, served as a guest conductor at the Mississippi All-State Orchestra event which opened on February 4 and continued through February 6.

Prof. Rabbin, who is also conductor of the Central Kentucky Youth Orchestra, was the only non-Mississippian participating in the affair.

Prof. Rabbin was selected as a participant in the Philadelphia Orchestra Conductors Symposium and studied with Philadelphia Conductor Eugene Ormandy.

### Arnett Estate Donates Papers To UK Library

Personal papers and letters of the late Sen. Louis W. Arnett, long an important figure in Kentucky politics, have been deposited in the Margaret I. King Library as a gift purchased by collectors merely for the stamps on the letters, and the letters were burned after the stamps were obtained, Dr. Wall explained.

In addition to providing for the acceptance of the Arnett papers by the University, Dr. Wall has been instrumental in obtaining two other sets of papers for the Margaret I. King Library.

A native of Woodford County, Sen. Arnett was educated in the public schools at Nicholasville and later attended UK. He was awarded a law degree from the University of Michigan at the age of 29.

For several years he practiced law in Covington and Cincinnati and succeeded former Gov. Goebel as a member of the Kentucky senate from Kenton County.

At one time, he sat in the state senate with his father, Sen. B. M. Arnett of Jessamine County.

Both Dr. Wall and Dr. Lawrence S. Thompson, director of UK libraries, reported that the Arnett collection will be kept under seal for the present. According to them, this precaution will be taken to "protect the careers of living individuals from possible misinterpretation."

The papers will be made available to competent scholars at a future date when they can be viewed in appropriate historical light, they pointed out.

Dr. Wall emphasized that the manuscripts and letters may prove to be of great worth to future Kentucky historians. He also noted that many similar valuable collections have been lost through carelessness.

"Literally tons of valuable Kentucky history material has been burned or destroyed in other ways," he said. "Historians can't find even

### Dr. D. C. Seaton Co-Authors Book

Dr. Don Cash Seaton, head of the UK Department of Physical Education, is co-author of a book to be released by a Chicago textbook publisher.

Assisting Dr. Seaton in preparing the volume, "Safety Challenges You," were Dr. Herbert J. Stack, director of the Center for Safety at New York University, and Mrs. Florence S. Hyde of Chicago, former junior high school teacher.

Dr. Seaton said that the book was written for use as a junior high school textbook. He and the other two authors collaborated in 1941 in the writing of another book, "Safety in This World of Today." Both this work and the new book were published by the Buckley-Cox Company of Chicago.

Efforts were made in the new book, Dr. Seaton asserted, to make a "personal approach to the problem of safety." The book is expected to be used as a unit of work within social sciences courses.

The UK physical education is nationally known for its studies on safety in education and sports. He is the author of a book on this subject, "Safety in Sports," published in 1948 by Prentice-Hall, Inc.

Both President Eisenhower, and President Truman named Dr. Seaton to their national highway safety conferences, and he was chosen to represent this area at a National Conference on High School Driver Education staged at Michigan State.

### Psych Department Conducts Crime Detection Experiments

By JIM WEBB

A week-long crime wave ended recently in the Psychology Department with all offenders either detected or confessing. Dr. Ernest Meyers, assistant professor of psychology, said recently.

The whole thing was part of the department's annual experiments in crime detection by word association. Dr. Meyers explained, and about 325 students took part. The group is divided into sections of 20 members, each from which five subjects are selected at random.

Each of these individuals, the prospective "suspects" in the case, was given a folded instruction slip and sent from the room. Two of the suspects received instructions to take objects, one a book and the other money. Sometimes the instructor knows in advance who the "guilty" students were, but all the suspects were given detection tests by the class.

Class Acts As Jury  
 Actually the class acts as a jury with the instructor reading from word lists as prosecuting attorney. The lists contain both guilty and innocent words, Dr. Meyers said, and the class tries to determine from the answers given the guilt or innocence of the suspect.

He said the groups are successful in about 80 per cent of the attempts which utilize only a part of the complete testing system.

The part the group uses consists of the word lists and a timing device which records the subject's reaction time. Reading of the word starts the timer and the answer stops it.

The answers are supposed to be the first word entering the subject's mind and usually are words having some relation to that from the list. An unusually long reaction time might indicate guilt, while quick response with a word having no normal connection with the stimulus also suggests that the suspect has knowledge of the crime.

Dr. Meyers explained that in regular crime detection, tests of blood pressure, respiration and psychographic reflexes are made. He said the system, in some form, has been used for about 40 years, though results are not admissible as evidence in courts of law in some states.

However, the tests are used to obtain confessions whenever possible, and a suspect may refuse to undergo the testing but his doing so may serve to increase suspicion.

The 80 per cent average has been maintained during the five years that the experiments have been given, Dr. Meyers stated, and in that time the department has not lost one book or book.

Mother: "But, don't use such bad words."  
 Junior: "But, Mom, Shakespeare used them."  
 Mother: "Well, don't play with him any more."

### Dairy Club Holds Annual Program

UK's Dairy Science Club held its Annual Dairy Festivities Program during the latter part of January, featuring a showing and fitting contest, a milk-drinking contest, and a cow-milking contest.

The showing and fitting contest consisted of three classes: the Jersey cow class, won by Dale Stahl; the Holstein heifer class, won by Leon Davis, and the Jersey heifer class, also won by Dale Stahl.

Stahl is a senior in agriculture and Davis is an agriculture freshman.

A milk-drinking contest, in which the milk was drunk from coke bottles with nipples on them, was won by Jack Taylor, a graduate student. Winner of the girls' cow-milking contest was Martha Holt, a sophomore in home economics.

**College Men!**  
 Fly with the Finest in the Air Force  
 QUALIFIED APPLICANTS WIN WINGS AS AIR FORCE LIEUTENANTS, EARN OVER \$5,000 A YEAR!

For a fast, exciting and rewarding career, make your future in the sky as an Air Force Pilot. As a college student, you are now able to join that select, hand-picked group of young men who race the wind in Air Force jets. You'll have the same opportunities to learn, advance and establish yourself in the growing new world of jet aviation.

**Fly as one of the best**  
 The pilot training you get in the Air Force is the best in the world—the kind that makes jet aircraft fly the fastest, latest planes in the air—and fly them safely and well. Those who look to the skies will look to you for leadership and confidence.

**Into a brilliant future**  
 You'll graduate as an Air Force lieutenant, earning over \$5,000 a year. Your Air Force wings will serve as credentials for important positions both in military and commercial aviation. Air Force wings mark you as the very best in the flying profession.

**How to qualify for Pilot Training as an Aviation Cadet!**  
 To qualify, you must be at least a high school graduate. However, you will be of more value to the Air Force if you stay in college, graduate, and then volunteer for training. In addition, you must be between the ages of 18 and 28½, and in top physical condition. If you think you are eligible, here's what you do. Take your high school diploma or certificate of graduation together with a copy of your birth certificate down to your nearest Air Force base or recruiting station. Fill out the application they give you. If you pass your physical and other tests, you will be scheduled for an Aviation Cadet Training Class.

**WHERE TO GET MORE DETAILS:**  
 Contact your nearest Aviation Cadet Selection Team, Air Force ROTC Unit, or Air Force Recruiting Officer. Or write to: Aviation Cadet Headquarters, U. S. Air Force, Washington 25, D. C.

# Three SEC Foes Next For Wildcats

Kentucky's Wildcats have three SEC contests at Memorial Coliseum coming up during the next five days. Tomorrow night the Cats meet the Mississippi Rebels, Monday night they meet the Mississippi State Maroons, and next Thursday night they meet the Tennessee Vols. Game time for each contest will be 8 p.m.

On Miss. UK opposition tomorrow night, has an eight win and seven loss record for the current season. Included among the Rebels' losses is a 52-22 setback at the hands of L.S.U. last week. Among their victims are Furman, 85-70; Alabama, 62-40; and Vanderbilt, 70-71.

Only two regulars return from last year's Rebel squad that won 11 and lost 11. Robert Jarvis, 6-3 forward, and Ed Stensfengal, 6-2 forward, are the returnees. Jarvis led the club in scoring last year with 23-point per game average. The rest of the starting line-up for Ole Miss will probably include 6-9 Dan Abernathy, 6-6 Denver Bruckner, and 6-0 Jerry Oyston. Abernathy and Bryant were active as reserves last season while Bruckner is a newcomer to the Rebel ranks.

On Monday night the Wildcats of Coach Adolph Rupp meet another Mississippi team, the Maroons of Mississippi State. Off comparative scores the Maroons, with a 6-6 record, are not expected to prove as tough as Ole Miss. The Rebels trimmed Mississippi State 45-33 a few weeks ago. Big Bob Pettit and

## Southern Regional Next For Mermen

By QUENTIN ALLEN  
Resuming action after a 10-day layoff, Wildcat swimmers are competing for the championship of the Southern Regional Invitational at Atlanta, Ga., today and tomorrow.

Captain Aggie Reese stated that the squad was under a distinct handicap, since they have missed ten days of training. The squad will be strengthened by the expected addition of veteran swimmer Jack MacDonald, a versatile backstroke and individual medley competitor, and Paul Bolinger, who swims in the freestyle events and the individual medley. The Southern Regional Invitational meet, which includes all the teams in the South, has been described by Reese, as tougher than the SEC.

The team has lost Co-captain Jim McCabe through graduation. McCabe, a freestyle swimmer, and Louis Karbo were the co-captains of the team. Wildcat tankmen with their last meet against Cincinnati here at the Memorial Coliseum, Jan. 29, by a 58-26 score.

## Officers Chosen For Law Journal

Three members of the student staff of the Kentucky Law Journal, legal publication of the College of Law, have been selected as officers for the spring semester. F. W. Whitnack Jr., professor of law, has announced. The officers are James S. Kostas, Fort Mitchell, editor-in-chief; John Murphy Jr., Liberty, assistant editor; and Charles R. Haman, Ashland, business manager. All three are seniors in law.

## Illinois Downs Fencers, 20-7

UK fencers suffered their first setback of the season at the hands of the Illinois team at the University of Kentucky last Monday. The score was 20-7.

Captain Tom Prather and Bob Deason were the only UK fencers scoring wins. Prather gaining a 2-1 margin in sabre competition and Deason raking up the same edge in epee.

Prather got the Kentuckians off to a good start by defeating the captain of the Illinois team, Tom Bell, 5-4 in the first round of the sabre. Prather's second win came a bit easier as he rolled up a 5-2 win. His win over Bell was especially important since Bell is one of the top-ranked sabre men in the Big 10.

## Frosh Cagers

By BILL SURFACE  
RAY MILLS - CENTER - CLAY COUNTY

Tremendous springiness made Mills into the most outstanding rebounder in the state high school basketball circles last campaign, as he sparked his Clay County team to an undefeated season, which included 35 consecutive victories. They advanced to the quarter-finals of the State Tournament before they were eliminated by Lexington Lafayette. The 6'4" center was the number one choice on the All-Tournament squad and also received a first team berth on the Courier-Journal all-state team. Many coaches classified the leading pivot man as one of the best college prospects in the state last season.

During his senior year with their Clay County Tigers, Mills supported a 34.8 average per cent. He is currently leading the frosh in scoring with an average of 19.2 and also is pacing the club in rebounds. Ray has developed an excellent jump shot under the tutelage of Freshman Coach Harry Lancaster, and can be expected to see a considerable amount of action, as a forward with the varsity next season.

## SIDELINE SLANTZ!

by John K. Ryan

It appears that in these days a long-term contract is not worth any more than the paper on which it is written. Last year UK offered Coach Paul Bryant a contract, which he readily accepted. Now only one year after the contract was signed, Coach Bryant has left the UK campus for supposedly "greener pastures". What is the purpose then in having such a contract? The answer to this is obvious from the standpoint of the coach. It prevents the school from firing him without paying him the balance remaining on his contract. In other words the coach cannot lose on such a contract. He can quit, but cannot be fired without being paid off. It would appear, however, that such a contract should work both ways, and that when a person agrees to the contract, he should expect to carry out his share of the agreement.

There is no question about the fact that Paul Bryant has accomplished a great deal in bringing the University of Kentucky out of the football doldrums. However, he could not have accomplished this, even if he was the greatest football coach in the world, without the cooperation of the University, its alumni, and its students. Contrary to the opinion of many, UK made Paul Bryant a "name" coach. He was not a nationally known coach when he was signed by the University back in 1946. He had been the head coach of Maryland for only one season before he came to UK. However, though the football fortunes of Kentucky and Bryant rose in national stature yearly, and he led the Wildcats to four bowls, during his career at UK.

The question that arises in the minds of every UK fan is "why did Paul Bryant resign his position at UK to accept an apparently less lucrative position at Texas A. & M.?" Many varied answers have been given for this question. Bryant said that he accepted the Aggie post, because it "offered certain opportunities and challenges that appeal to me." Others, however, do not feel that this was an adequate answer to the question. Some feel that his five out-of-state men a year recruiting policy was not proving successful. Others say that he had differences with basketball coach Adolph Rupp. Still others say that he did not wish to face the schedule he had lined up for next season, featuring Maryland in the opening game. Many feel that he quit at UK because he was not drawing the top high school prospects in the state to this campus. Whatever the answer to the question is, it is doubtful if we will ever know it. If he was planning to leave, why did he choose the Aggie post over a similar post at Minnesota. He visited the Gopher school a few weeks ago, but turned the job down. Maybe he didn't like the weather there as well as that of Texas.

When the first stories appeared concerning the Aggie offers to Bryant, most fans passed it off as the yearly report of his leaving, which had never been materialized. I don't think anyone seriously thought that he would even accept the Aggie post. In the past reports have had him going to LSU, Arkansas, Minnesota, the Washington Redskins pro-team, etc.

Big Steve Melinger announced this week that he has signed with the Washington Redskins of the National Football League. In signing with the Redskins Steve turned down two offers to play for Canadian professional teams, Calgary and Toronto. This appears to be a wise decision for Steve, because many American players have not been satisfied playing in Canada. Not only is the climate much colder, the teams also often play two or three games a week, and the rules are somewhat different.

Getting away from football we see where the question of whether or not the "Big Three" will be eligible to play in the NCAA tourney still is hanging in the air. It appears that the enemies of UK want them beaten even if it would be a hollow victory. Incidentally, with Western getting trounced by Eastern last night, UK and Duquesne are the only unbeaten major powers in the country.

One of the oddest feelings I have discovered is watching a basketball game with my chin literally on the floor. The gym at Vanderbilt has a raised floor that is almost shoulder high for front-row spectators. However, they will have a fine gym when the balconies are finished, making it one of the largest in the South.

Assistant Coach Harry Lancaster has announced the signing of two high school cage stars for next year's Kitten squad. They are Harold Lively Ross, a 6-3 guard from Hickman High, and Jay Bayless, a 6-4 forward from Fulton High of Knoxville. Ross has been burning the hoops this season for a 34 point a game average. Bayless was signed right under the nose of the Tennessee Vols, because he had always wanted to play for Coach Adolph Rupp. He wrote the University and requested a chance to play here. Then Coach Lancaster stopped by Knoxville on his way to the Vanderbilt game and scouted the 20-year old cager. He looked so promising that Lancaster signed him to a grant-in-aid immediately after the game.

For no apparent reason the United Press Coaches' Poll has placed the Kentucky Wildcats in THIRD place this week. As usual, there is the mention of Kentucky's weak SEC schedule. It seems that the coaches don't realize that Kentucky has to play the SEC opponents, whether they want to or not. The Cats remain first in the Associated Press Poll. The UP rates once-beaten Indiana first and Duquesne second.

## Bryant Leaves UK

### Football Mentor Now Aggie Head

By GEORGE KOPFER

The man who brought Kentucky out of its football doldrums has resigned to accept a position as head coach and athletic director at Texas A. & M.

Paul (Bear) Bryant submitted his resignation to President H. L. Donovan last Thursday. The Board of Directors of the Athletics Association accepted the resignation late Sunday afternoon.

Bryant's departure came at an inopportune time since spring practice is scheduled to begin the latter part of this month. A committee headed by athletic director Bernie Shively has met every afternoon since Monday to screen candidates for the position.

Bryant's resignation came as a complete surprise to Wildcat followers. Only several weeks ago he had expressed his happiness here and his desire to remain.

### Cordell Appointed To Air Newspaper

Former Kernel news editor, A.J.C. Dorman E. Cordell has been assigned as assistant editor of the editor, official base newspaper at Moody Air Force Base, Ga.

A 1952 Journalism graduate at UK, Cordell also attended graduate school at the University of North Carolina. While there, he was night editor and columnist for the Daily Tar Heel, the student publication.

Cordell was managing editor of the Daily Catawba News-Enterprise in Newton, N. C. when he entered the service last September. After completing basic training at Sampson Air Force Base, N. Y., he was assigned to Moody Air Force Base.

Dr. Donovan refused to accept Bryant's resignation referring it to the athletic association. Dr. Donovan issued a statement at the time that expressed his surprise and disappointment and rebuked Bryant for not consulting him first.

The athletic association's official statement announcing Bryant's resignation failed to contain the customary good wishes and appreciation for a job well done.

Coach Bryant came to Kentucky from Maryland in 1946. During this span, he has raised the Cats from the SEC cellar to national prominence. His teams have appeared in four bowl games winning three and losing one. Their most outstanding victory came in the Sugar Bowl contest in 1951 when they upset the national champion Oklahoma Sooners outfit 19-7.

During his eight year tenure the Big Blue won 60, lost 23, and tied

five. He also brought Kentucky their triumph in 18 years over Tennessee with a 27-21 win last year.

Coach Bryant gave a two-fold reason for his departure—the spirit showed when Kentucky met Texas A. & M. at College Station, Texas in 1952 and the challenge the position presented to him. In the 1952 game the entire crop of cadets swarmed onto the field at the end of the game and carried the victorious Kentuckians off the field.

Bryant started the football world after the 1952 Cotton Bowl win over Texas Christian with a revolutionary recruiting policy—seeking only Kentucky boys and limiting out-of-state scholarships to five a year, and then only when the non-Kentuckians came to him.

He saw no indication that he planned to stick with this system when he arrived at College Station Monday. He told a cheering throng of over 6,000 students and town-folks that his first recruiting plan was to get "any good Texas boy."

He has a six year contract with the Aggies that calls for a salary of \$15,000 a year for his dual role of coach and athletic director.

## COLONEL Of the Week

The Stirrup Cup is proud to present as its Colonel of the Week, Almer Louis Browning, a senior in electrical engineering with a 2.9 overall standing.

Along with this 2.9 overall standing, Browning is president of Eta Kappa Nu, engineering honorary, member of Tau Beta Pi, and a member of Pi Mu Epsilon, math honorary.

These outstanding achievements, the Stirrup Cup invites Almer Louis Browning to enjoy any two delicious five meals.

**HUGHES Cooperative Fellowship Program for MASTER OF SCIENCE DEGREES**

**Purpose**  
The Hughes Cooperative Fellowship Program has been established to enable outstanding graduates to pursue work for the Master of Science degree while employed in industry and making significant contributions to important military projects.

**Eligibility**  
Eligible for consideration are students who will receive the B.S. degree during the coming year and members of the Armed Services being honorably separated and holding B.S. degrees. In either case the field of the B.S. degree must be: ELECTRICAL ENGINEERING, PHYSICS, OR MECHANICAL ENGINEERING.

**Stipends**  
The awards will be made to applicants who have evidenced outstanding ability and some degree of creativeness. They must also possess traits enabling them to work well with others.

**Recipients**  
Recipients will be United States citizens for whom appropriate security clearance can be obtained, at their work in the Hughes Laboratories may be related to National Defense projects.

**Applicants**  
Applicants must be able to meet the requirements for admission to graduate standing at the University of California at Los Angeles or the University of Southern California.

**Program**  
Participants will be employed at Hughes full time in the summer and 23 hours a week during the university year while pursuing half-time graduate work.

**Recipients will earn five-eighths of a normal salary each year. This salary will be determined by the individual's qualifications and experience, and will reflect current salary practices in the electronics industry. Salary growth will be on the same basis as for full-time members of the scientific-engineering staff. Recipients will also be eligible for health, accident, and life insurance benefits, as well as other privileges accruing to full-time staff members.**

**Tuition, admission fee, and required books at either the University of California at Los Angeles or the University of Southern California, covering the number of units required to earn M.S. degree, will be provided.**

**For those residing outside the Southern California area, actual travel and moving expenses to this area will be allowed up to 10 percent of the full summer annual salary.**

**If a sufficient number of qualified candidates present themselves, as many as 100 Fellowships will be awarded each year.**

**Candidates will be selected by the Committee for Graduate Study of Hughes Research and Development Laboratories.**

**Application forms should be obtained immediately. Completed applications must be accompanied by detailed college transcripts.**

**Salaries**  
**Sponsorship**  
**Travel Expenses**

# Wildcat Cagers Beat Six SEC Opponents

## Undisputed Lead In Conference Gained By Cats

By BILL BULESSON

Coach Adolph Rupp's cagers gained the top spot in the Southeastern Conference race with a mark of 8-0. The Cats added six SEC victims in the last two weeks to gain their previous wins over Tulane and Georgia Tech.

The Cats used a bombshell in the bombardment of the Tennessee Vols 97-71 at Knoxville before a capacity crowd of 3,900.

With Hagan out over half the ball game with an injury plus four accumulated fouls, Frank Ramsey, "the Blood Bomber," moved into the pivot and scored 37 points. Ramsey scored 27 of his 37 points in the second half as he turned in the most powerful offensive game of his career. Assisting Ramsey were Lou Tsoropoulos with 20 points, Phil Grammeyer with 15, and Gayle Rose with 10.

Ramsey had to turn in his best effort because another glowing performer, Tennessee's Carl Wideth, was driving Kentucky crazy by dumping 32 points. Eighteen of these were in the second half. Kentucky sank 37 of 97 basket at-

tempts for 38.3 per cent; Tennessee, hitting from outside in the second half, connected on 24 of 82 shots for a percentage of 29.3.

The Commodores managed a scintillating bunch of Vanderbilt Commodores 85-59 but had a great deal of trouble with another Kentuckian, Babe Taylor.

This Frankfurt led netted over a third of his team's point—22. The Commodores managed a scintillating bunch of Vanderbilt Commodores 85-59 but had a great deal of trouble with another Kentuckian, Babe Taylor.

The Bulldogs were paced by Marvin Satterfield, a very clever shooter, and Murphy McKenna, each with 18.

The Cats trounced the hapless Georgia Bulldogs for the second time in two nights before an overflowed crowd of more than 6,000 by the score of 100-68.

Coach Rupp had his reserves go into a stall during the final three minutes to prevent the score from reaching 100. But Frank Ramsey was fouled twice in the last minute, and hit three free throws to reach the century mark.

Guard Tom McMann was about the whole offensive show for the Bulldogs, getting 29 points, mostly on long shots. Hagan and Ramsey led the Cats with 29 and 20 respectively.

The Cats were never in trouble and stalked the floor with a 23-34 lead at halftime. The score at the end of the third stanza was 62-56.

The crowd, out to see Hagan and the Wildcats break the records, started to yell for their favorite in the fourth period when it became obvious what Rupp was trying to do. Finally with a minute to go, the veteran coach sent Hagan and Ramsey back in but they would not show.

Kentucky's Wildcats whipped an outclassed University of Florida squad 97-55.

Coach Adolph Rupp pressed the All-American Cliff Hagan played the entire game.

Hagan, high man with 27 points, made five field goals in the final period while teammate Lou Tsoropoulos netted 12 points during the time.

Frank Ramsey and Bill Evans led the early game Wildcat march. Evans connected for 12 points in the first half and Ramsey for 16.

Freshman center Bob Emrick, who hails from Ashland, Ky., connected for 14, all of them from the field.

Kentucky was never pressed and led 48-27 at halftime. Only in the stilled fourth quarter, were the Cats out-scored. The margin in that frame was 18-10 for the Cats.

Baseball Squad To Meet Monday

Baseball Coach Harry Lancaster announced this week that all baseball lettermen are requested to meet with him Monday afternoon at 3 p.m. in the squad meeting room at Memorial Coliseum.

At the same time Coach Lancaster announced that a meeting will be held at 4 p.m. Monday at the same place for anyone interested in trying out for this year's baseball squad.

Volleyball Begins Monday

Intramural volleyball and ping-pong doubles will start Monday, Feb. 22. The deadline for entries is Wednesday, Feb. 17.

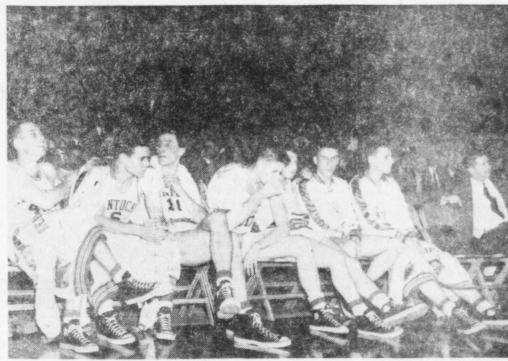

## 'Big Steve' Becomes Pro

Steve Melinger, Kentucky's All-America end-halfback, entered the pro football ranks Feb. 7, when he signed with the Washington Redskins. Melinger was Washington's No. 1 choice in the recent football draft.

Melinger, who made All-Southeastern as both back and end, rejected offers from two Canadian teams in signing up for National Football League play. The Pennsylvania strong-boy will probably operate at end, the position to which he was named on the AP All-American second team.

Melinger, who stands 6-3 and weighs 230 lbs., took part in post-season play the past year in the Hula Bowl and the East-West Shrine game at San Francisco. He said the two Canadian teams he turned down were Calgary and Toronto.

Melinger expressed his wish to play end with the Redskins, a position at which he enjoyed his greatest success at Kentucky. He was a back-of-all-trades during the past two seasons, when he performed at end, halfback, quarterback, in addition to doing the majority of the punting.

FOUR REGULARS REST—After rolling up a big margin over the Georgia Bulldogs last week at Memorial Coliseum, four of the Wildcat regulars rest on the bench. Notice the different expressions that the players on the bench have on their faces. Assistant Coach Harry Lancaster is also taking it easy at the right side of the bench.

## Cats Slip In Poll

Kentucky's Wildcats have slipped to third place in this week's United Press Coaches' Poll. This marked the first time in several weeks that Coach Adolph Rupp's cagers were not first in the poll.

This week the Wildcats had 280 votes, as compared to Indiana's 317 and Duquesne's 294. Therefore, the Cats were placed under the Hoosiers and Dukes for the first time this season.

As far as first-place votes were concerned, the Cats ranked second to Indiana. The Hoosiers had 13 first-place votes, while UK only received 10 first-place ballots.

Western Kentucky also slipped to sixth place this week after having ridden in the No. 4 slot for several weeks. The loss to Eastern at Richmond last Saturday night was the main reason for their lower standing.

Even though they slipped to third place the Cats won three SEC encounters. The Cats remained in first place in the Associated Press ratings.

Wide use of the pressure cooker by Australian business is unlikely and impractical, home economics authorities have announced.

### Part-Time Work Is Popular On Campus, Survey Shows

Ever wonder where you are going to get enough dough for next semester? Well, if you're a student here on the campus, chances are, at good odds too, that you will get part of it by working.

In a recent survey, conducted under the direction of Prof. R. E. Black, of the Chemistry Department, of the 2,206 students contacted, it was learned that at least 40.5 per cent of the students contacted here on campus do have part-time employment to supplement their pocket-books.

This survey was made in the Department of Physical Sciences, of which Prof. Black is the chairman, last year during December, and involved classes of the Chemistry, Geology, Mathematics and Physics departments.

**Cards Passed Out**

Each instructor or professor in these four departments was given index cards which he passed out in each of his classes. The students were asked to write on those cards just how many hours out of each week they worked and what type of work they were doing.

In the period from Dec. 9 to Dec. 18, over 280 students were contacted in this way. This number is a good representative number of the total student body, a little over one third of the total enrollment.

The department showing the largest number of students holding part-time jobs was the Mathematics Department with 408 of the 1,422 persons questioned, working. This is a 28 per cent "working population" in this department.

**Best Percentage Physics**

The best percentage was scored in the Physics Department, where better than 57 per cent of its students reported part-time employment.

Of all the classifications, freshmen, sophomore, junior, senior, and graduate students, it seems the latter can boast the real hustlers. The survey shows that they are working to a greater extent than are the under-graduates. Many classes reported that as many as 75 per cent of this group held jobs, which included teaching.

Most of the students work from five to 24 hours a week, with the biggest percentage, 17 per cent,

working from nine to 12 hours each week. The next largest group fell into the 13 to 20 hour classification. Of the 2,206 students contacted, 58.1 per cent or 63, are working over 36 hours a week. This is a full week's work according to most labor standards. At the other extreme is the five per cent who work only five hours or less a week.

UK may be the "Playground of the Southland" but nearly half of the student body seem to be the "caretakers."

### All Student Cars Must Be Listed

All student cars must be registered at the office of A. D. Kivian, dean of men, Mrs. Rosemary Harris, Student Government Association secretary, has announced. All unregistered car owners will be subject to a \$5 fine and a ticket, she said.

### Arnold Air Group Holds Initiation

Arnold Air Society, air science honorary, initiated eight new members recently at a ceremony in Barker Hall.

They include Bill Yeiser, Gene Craft, Cipp Turner, Joe Schmitt, Jack Winstead, and T. Lewis McFarland, Col. Robert Larson, professor of air science, and Capt. Thomas B. Spalding, advisor to the group, were taken in as honorary members.

Following the initiation, a dinner was held at Camps Coach House in honor of the new members. Col. Henry Rogers, PMS&T, spoke on the responsibilities and opportunities of the Arnold Air Society. Staff officers of the air science department were guests at the dinner.

Qualifications for membership in the society are an overall standing of 1.5 and a 2.0 in military science.

### Margaert Mead's New Book Views This Generation

(Continued from Page 4)

radio commentator—has said they ought' to be wanting something else."

Today's youth, according to Miss Mead, is the product of a generation that "left their adolescents with little recourse except to try to work out a new, less contradictory and less authoritative 'morality' (than the one imposed by the previous generation) for themselves.

"This new morality, the emerging morality of the 1950's, has a style of its own, and special strength and weaknesses," Miss Mead writes.

"It can be summed up in a series of phrases. The familiar farewell not to idleness, but to lack of strain. Take it easy, keep your shirt fin. Don't get excited, you've only one life to live."

A second significant phrase used by the current generation is "It depends on the situation." Miss Mead says.

"Modern youth is unwilling to say positively that any act is wrong. To kill? But they are told that it is their place to kill in defense of freedom. Adultery? When every state has different marriage laws?

"It depends on the situation."

A final characteristic of the new morality, writes Miss Mead, is that it has brought a shift from the morality of authority based on sacred codes and texts to a morality of the machine.

"Where the young people of 1940 asked 'What ought I to do?' these young people ask 'What is necessary to do?'" says Miss Mead.

"And this question is," she says, "as practical and clear-cut as questions about mending the car motor or buying new gas."

"There is an answer—in the nature of the situation. If you have no gas, you get out and walk until you get some. There is no appeal to higher authorities. You can pray that you will remember to fill the gas tank, but you do not pray that the car will run without gas."

### 'Red Planet' To Be Closer

(Continued from Page 4)

change, as if vegetable life, probably a low order of plants such as lichen, were spreading. This vegetation seems to follow the lines of the so-called canals, which leads many people to assume that the "canals" actually carry water to irrigate arid zones.

**Drawbacks Found**

In spite of the facts which seem to encourage the possibility of life on Mars, there are many drawbacks to the enthusiast who dreams of finding intelligent beings on Mars.

The Martian atmosphere, after careful scientific analysis, shows very few traces of water vapor. Furthermore, the ice-capped north and south poles of Mars, which are actually seen in the process of melting during the warm months, are probably not more than an inch or two, three at the most, deep.

This scarcity of water, necessary to life of earth types, seems to indicate that Mars is inhabited only by small, primitive plant forms. One hope remains for the man who wishes to find intelligent life—the canals. Although they have been attributed to cracks in the surface

caused by volcanic action by many, no one is really sure.

When the 200-inch Mt. Palomar "eye" is turned on the planet at the time when it's closest to us, between now and early 1956, many of the mysteries of the Red Planet (so-called because of a reddish tint found in the light it reflects from the sun) may be clarified.

These are the things astronomers will try to accomplish when the big eye is turned on Mars:

1. Establishment of the true nature of the Martian canals.
2. More definite knowledge concerning the percentage of oxygen and water vapor in the Martian atmosphere.
3. A more detailed description of the planet's surface and the conditions on that surface.
4. More accurate knowledge of what we believe to be vegetation—and any signs of other kinds of life.

Even if, with the aid of the giant telescope, no indications of intelligent life can be found on Mars, one hope, being steadily increased by endless research, is left to the curious.

### Army ROTC Initiates New Military System

Some changes will be made in the Army ROTC program beginning next school year, it has been announced by Col. Henry H. Rogers, professor of military science and tactics.

The new system, known as the General Military Science program, differs from the previous set-up in that the students will no longer be trained at the school for duty in specific branches, such as the Transportation, Corps, Quartermaster Corps, and so on.

Students will be given general military training and later assigned for further training in a specific branch in light of their backgrounds, interests, and needs of the Army.

Goals of the program are to produce more versatile officers who can be assigned on a flexible basis to meet the needs of the service, to increase student interest and participation in ROTC activities by presenting to each a greater selection of career specialization than is now the case, and to affect important supply and administrative economies.

Before the program was instituted in the fall of 1952, instruction in each school was restricted with the result that students whose backgrounds and interests were in other fields were handicapped.

Specialization also led to over-supply of officers in some fields, while other areas, particularly combat arms, were short of officers.

At the beginning of his senior year, each student completes an information form on which he indicates his educational background, interests, and other activities and also lists his first seven choices for assignment.

This and other information is reviewed by different boards and the recommendation for assignment is forwarded to the Department of Army, where the final decision is made.

Two other changes are connected with the program. One concerns summer camp during the transition period, the other deals with the

### Alums Back Plans For Med School

(Continued from Page 1)

isting medical schools to meet joint educational responsibilities; its presence will be an aid and not a hindrance to existing schools.

**Will Extend Service**

The presence of a superior medical school at UK will greatly extend the service of, enhance the prestige of, raise levels of scholarships and, raise salary scales in the other divisions of the University.

The report was concluded by asserting that "a new school here would meet that lack (for medical educational facilities) and strengthen the existing medical school by taking off the pressure for it to sacrifice quality for quantity."

**"No Desire To Waiver"**

"We have no desire to weaken the existing school, for to do so would be to reestablish the present deficiency."

Members of the University Committee on Medical Education are: Dr. Leo M. Chamberlain, chairman, Prof. R. S. Allen, Dr. Howard Beers, Dr. Alfred Bauer, Dr. J. S. Chambers, Dr. J. D. Parris, Dr. R. L. Hopper, Prof. James W. Martin, and Dean Elvin J. Shahr.

The Coliseum of Rome was not built in a single day. Neither was the Coliseum on the Avenue of Champions.

Aristides was not a Greek restaurateur. He was the horse that won the first Kentucky Derby in 1875.

"Guinness" is Linguist spelled backwards.

Electricity, in its early days in the United States, was regarded as a collector's item by the wealthy, who exhibited it in showcases.

Never run after a woman or a street because there will be another along in a minute. Those after midnight, thought not so many, go faster.

If facilities continue to improve, the telephone may someday replace the carrier pigeon as a medium of communication.

### Two Coeds Win College Board

Four UK coeds will represent the University this year on the national College Board of Mademoiselle, women's magazine.

Selected as representatives were Georgeanne Duckworth, junior journalism major, and Elaine Moore, senior in Arts and Sciences. Kathy Fryer and Debbie Schwarz, journalism senior and junior respectively, were chosen last year and are still eligible for this year's competition.

As College Board members, they will report to Mademoiselle on campus life and activities. They will also compete for one of 20 guest editorships to be awarded by the magazine. The field of competition will be in editing, fashion, and advertising or art.

Guest editors will go to New York for four weeks in June to help edit Mademoiselle's 1954 August College issue.

UK gal to clerk. This sweater fits me perfectly. Give me one two sizes smaller.

**Liggett & Myers Tobacco Co. says...**

FOR more than thirty years we have used research day in and day out learning about tobaccos and cigarettes in the public's interest.

Continuously we and our consultants have analyzed, experimented with and smoked all kinds of tobaccos... especially Southern Bright, Burley, Maryland and Turkish cigarette tobaccos.

Our own cigarettes and competitive brands have been submitted to the most exacting scientific scrutiny including thousands of analyses of millions of pounds of tobaccos.

From all these thousands of analyses, and other findings reported in the leading technical journals, our Research Department has found no reason to believe that the isolation and elimination of any element native to cigarette tobaccos today would improve smoking.

For four years we have maintained in the smoker's interest an intensified larger scale diversified research program. A half-million dollar 30-ton machine, the world's most powerful source of high voltage electrons, designed solely for our use has tested tens of thousands of cigarettes. This program has already given to us direct and significant information of benefit to the smoking public.

Our consultants include Arthur D. Little, Inc. of Cambridge, Massachusetts, "one of the largest and most reputable industrial research organizations in the country" (From Business Week Magazine) and eminent scientists from leading universities.

Today the public can confidently choose from a variety of brands—by far the best cigarettes ever made by the tobacco industry.
