BULLETIN

V  
UNIVERSITY OF KENTUCKY  
LIBRARIES

November 2, 1973 No. 24

ARCH: The Communi-K for October '73 carried an article about the newly formed Academic Resource Clearinghouse Project (ARCH). This pamphlet may have potential for the library in determining untapped subject specialists, as well as determining what kinds of re-search projects are on-going on campus.

ACQUISITIONS CHANGES: "Ms. Elizabeth Howard has recently assumed the duties of the Head of the Monographic Section in the Acquisitions Department. She will continue to be involved in the Gift and Exchange unit, as well."

POSITION OPENINGS: Acquisitions, Classified V, open now.

PLANS: The Planning and Development unit has submitted grant proposals to the Dean of Undergraduate Studies and to the Council on Library Resources for money enabling us to provide more reference services to undergraduate students. If the grants are approved, we will be getting audio-tutorial carrels for the Reference area. The slide-tape presentations will be produced by librarians. If these grants are approved Bill Gardner and Deanna Hudson will be seeking ideas and help from the staff on the production of the programs.

FACULTY OVERDUES: From University of Tennessee Libraries Annual Report, 1972-73:

"Faculty overdues continue to increase, numbering over 3,500 per quarter this past year. The Faculty Senate passed a resolution in May 1973 endorsing sanctions against faculty who ignore two recall notices after materials have been out for more than one year. A straw vote of the Senators showed a marked preference for fines rather than curtailment of library privileges. Discussions with University Administration are in progress."

SCI: "A representative from the Institute for Scientific Information (ISI) will present a tutorial on the use of SCIENCE CITATION INDEX (SCI) for all interested faculty, staff, and students in Room 245 of the Student Center on November 9th. One presentation will be at 10:30 A.M. and another at 2:00 P.M.

SCI is an international interdisciplinary index to the literature of science, medicine, agriculture, technology and the behavioral sciences. It covers more than 2,400 primary journals. The approach is multidisciplinary and uses an indexing system that follows scientist's own traditional method of literature searching - that of locating articles related to their subject interests by examining reference citations of articles known to be relevant.

A new tool, SOCIAL SCIENCES CITATION INDEX, will also be reviewed. This will be a great interest to those persons in law and the social sciences. The same basic approach is used. All interested persons are urged to attend."

November 2, 1973

RESEARCH GRANTS: "THE AMERICAN ANTIQUARIAN SOCIETY, in order to make more readily available for research its unparalleled resources in American history and culture, will award to qualified scholars a number of short-term Visiting Fellowships during the year June 1, 1974-May 31, 1975. The funds for these grants are derived from the income of the Society's Fred Harris Daniels Fund.

The Fellowships may vary in duration from one to three months, depending on the Fellow's requirements. Stipends may vary in amount, according to a Fellow's needs, to a maximum of \$2,500. Fellowships will be awarded not only on the basis of the applicant's scholarly qualifications and the general interest of his project, but also on the appropriateness of the inquiry to the Society's holdings.

Applications may be submitted anytime before March 1, 1974, by persons engaged in scholarly research or writing, including those at work on doctoral dissertations. The announcement of the grants will be made by April 30, 1974."
