This Number of the Bulletin is prepared annually by the Bureau of Instruction in the State Department of Education. The purpose of this publication is to give pertinent information regarding the public and private high schools of the state.

In Kentucky, both public and private high schools are accredited annually by the State Board of Education. The official accredited rating of each high school is set forth in this Bulletin. The official rating given each high school by the State Board of Education is made on recommendation of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools.

It is hoped that superintendents and principals will study the material found in this publication.

KENTUCKY HIGH SCHOOLS—1950-51

Schools and Types of Organizations. There are 613 public and private high schools in Kentucky. Last year the number was 623. Of the 613 high schools now operating, 569 are complete organizations in that they offer work through the twelfth grade. The remaining 44 high schools, because they do not offer work through the twelfth grade, are approved as incomplete feeder schools. Of the 44 incomplete high schools, 37 are separate junior high schools organized as one distinct unit offering work exclusively in grades seven, eight, and nine. The remaining seven high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 569 complete high schools, 334 are operated by county boards of education while 158 are maintained by boards of education in independent school districts. The remaining complete organizations are either private secondary schools or schools that are operated by the state in connection with institutions that are maintained entirely by the state.

This year, the six-year high schools (grades 7-12) number 270 while the traditional four-year high schools (grades 9-12) number 261. The remaining 38 complete high school organizations represent modifications of the six-year and the traditional four-year plans.

The following table presents data regarding the various types of high school organizations to be found in the state.

Information Concerning High School Development. For a number of years the Division of Supervision has carried three tables in this bulletin showing the development of high school education in Kentucky. This information has proved helpful to students of Kentucky Education.

Table IV shows that there was a continuous growth in the number of high schools from 1915 to 1935. In 1935 there were 848 public and private high schools in the state. This is the largest number of high schools that the state has ever had. Now that we have 613 high schools, public and private, it is clear that there has been a decrease in the number of high schools of 235 since 1935. This decrease has come about very largely through small high school organizations being merged into larger school centers.

* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included.

Table V presents an interesting picture in total high school enrollments in different types of high schools (public white, public colored, and private) since 1915. High School enrollments increased rapidly until around 1941, then enrollments began to decrease on account of the second World War. The lowest total high school enrollment was for the school-year 1943-44. Today, the total high school enrollment is 144,101, a small amount less than the highest total enrollment which was in 1940-41.

Table VI shows the situation as regards the number of accredited high schools by years since 1910. When we use the expression "accredited high school" we think of an organization that offers a program of work through the twelfth grade. High schools that do not give work through the twelfth grade should be looked upon

as incomplete feeder schools for the regularly organized, complete high schools of the district.

The high schools in Kentucky are officially accredited by the State Board of Education. This applies to both public and private schools. The official rating given each high school by the State Board of Education is made as a result of the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools. The members of this Commission meet with the supervisors in the Bureau of Instruction and canvass the annual high school reports that are made to the State Department of Education and also the special written reports that are made of inspections by the supervisors. The State Board of Education may accept or reject the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools or may modify these recommendations. In practice the State Board of Education usually follows the recommendations of the Commission.
