

Basket Mending

It took a good portion of the UK Maintenance and Operations Department, plus electricians, an athletic director, student managers, equipment managers, and other workers to repair a broken basket at halftime during Saturday's UK-LSU game. The repair worked to Kentucky's advantage as they rallied to defeat the Tigers, 77-45.

Year Lease Placed On UK Apartments

Married students moving into Cooperstown and Shawneetown after Nov. 1 have been required to sign a one-year lease, Dean of Men Leslie L. Martin said yesterday.

The ruling, made by Housing Committee last fall, means that a student who leaves Lexington during the summer must continue to pay rent to the University.

Students who are graduated before their lease expires will be expected and any student will be permitted to sublease his apartment during the summer, Dean Martin said.

"The lease wasn't intended to make things more difficult for the students as most tenants have con-

tinued living in the apartments during past vacations," he added.

Dean Martin said the one-year lease requirement was considered a business-like method of managing the apartments by the administration.

He pointed out that Lexington apartments are normally released for one year, and the administration merely was following that pattern.

Dean Martin said it would give the University some idea ahead of time just how many apartments would be available for rent.

Asked if the number of vacancies now in the dorms was instrumental in making the change, Dean Mar-

Athletic Officials Answer Charge Of Insults To Ohio State Cagers

An editorial in the Ohio State campus newspaper, criticizing Kentucky fans and players for alleged racial insults and booing, was answered yesterday by the UK Athletic Department.

The editorial appeared in the Ohio State Lantern, following the UK-OSU game in Lexington during the Christmas holidays.

The editorial said that the "loudly voiced racial prejudice" was not typical of Kentucky, supposedly a "liberal state."

The article reprimanded the UK coach and Athletic Department for allowing their athletes to take part in "such ignorant and ungentlemanly conduct as insulting members of a visiting sports squad."

The paper pointed out that racial prejudice was known to exist at UK and criticized the officials for being unprepared to control the players.

"Such behavior can serve only to damage the excellent reputation UK has earned over the years," it said.

Athletic Director Bernie Shively, however, said, "I have always observed that our players would bend over backward to be nice to Negro players."

Ken Kuhn, UK publicity direc-

tor, expressed shock at the editorial's charges.

"I was unaware of any racial prejudice that was shown during the game. UK has played against Negroes before," he said. "It is a natural thing for the opposing bench to jeer."

Kuhn mentioned receiving a letter from the athletic director at Ohio State, Richard C. Larkins.

Larkins said, "We were well received by good folks of Lexington. Truly this is a fine thing for college athletics."

Coach Adolph Rupp was unavailable for comment yesterday.

The editorial further emphasized the unnecessary booing of the Ohio team by Kentucky fans.

"There is nothing inherently wrong with good-natured booing the other guys," the article said. "But Ohio State players were booed even while shooting from the foul line. This is tantamount to booing a golf opponent as he tries to sink a putt."

It was understood by UK officials, however, that the booing was directed at the referee and not the players.

The editorial advocated no future games in Lexington and mentioned the "controlled" Ohio State

UK Student Expelled For Cheating Attempt

By BILL NEIKIRK
Kernel Editor

A graduate student has been suspended indefinitely from the University for attempting to change examination paper answers in the College of Commerce.

Four other students have been disciplined by an administration-student-faculty committee. One of the students received a one-semester suspension and the other three, all undergraduates, were placed on disciplinary probation.

The disciplinary action was taken last Friday by the committee after an investigation of the case.

The first indication of the incident came during December when a UK coed reported to her adviser that she had been approached by a student in one of her classes and asked to participate in the changing of answers.

The girl, Dean of Men Leslie L. Martin said, reported the incident to the dean of the college and to him. She said the solicitor had quoted a price from \$40 to \$50 for the job.

That started investigation of the case, Dean Martin said, and it lasted until Jan. 8 when the students were disciplined.

Dean Martin said the following was disclosed at the committee's meeting:

The graduate student had approached another student enrolled in a specific class and asked if he would be interested in receiving help on an examination in the course.

Dean Martin said the student's plan was to remove the test papers from the professor's office, allow the students to change the answers, and then return the papers.

This could be accomplished, the committee reported, if an "adequate" sum of money could be provided in exchange for the service.

The student approached then asked eight other students if they would be interested in the deal and three agreed. Each would have assumed a "fair share" of the cost, Dean Martin said.

The students made arrangements for a meeting Dec. 16, when the graduate student was to enter the building and steal the examination papers.

However, trying to enter the building, he found a campus policeman there and had to tell the other students that he was unable to obtain the examinations.

Dean Martin, Graduate Dean Herman Spivey, and Commerce Dean Cecil C. Carpenter investigated the five students and referred the case to the special committee.

Dean Martin said the initiation of the special committee was a novelty in disciplinary actions, since all cases are usually referred to the Judicial Board, composed of students.

Specific judicial action in this case was:

Graduate student, indefinite suspension, with consideration for any possible readmission only by the Graduate School and the University Faculty.

The instigating student, suspension until Sept., 1960, with possible readmission only upon approval by the Judicial Board and the dean of men, and an "E" in the course.

The three accepting students, disciplinary probation until June and an academic penalty of reduction of their final grade by one letter.

Dean Martin said a letter to the editor in the Kernel last Thursday referred to the same case, but "unfortunately it contained allegations which could not be substantiated."

He added: "The writer of the letter did not contact any of the appropriate

'Lost' Men Invade Holmes Hall

By BOBBIE MASON
Kernel Staff Writer

It's easy to get lost in Holmes Hall, and visitors sometimes have trouble finding their way around. A drunk man, for instance, was recently found on the second floor looking for the Coliseum.

But one visitor late Friday night apparently knew where he was going. He was investigating the second-floor shower of the girls' dorm when he was frightened away by a girl's scream.

Elizabeth May, sophomore engineering student, said that she was

taking a shower when she saw a dark-haired man of medium height peering at her through the half-open shower curtain. He was about a foot from her and was wearing horn-rimmed glasses.

"Naturally I screamed," said Elizabeth, "and then he disappeared."

A search throughout the dorm failed to reveal the intruder.

The man was reportedly seen coming up from the basement by two other girls. Hearing the back door open, they assumed that he had gone.

"We didn't think much about it,"

she said. "We didn't know it was so late."

The incident occurred after hours between 1:30 and 2 a.m.

One girl said that she had seen a man fitting his description going up to second floor on a previous occasion.

The purpose of the man's visit was undetermined. The Holmes Hall housemother said she had heard no reports of a man in the dorm, however.

Future callers have been requested to buzz for their dates at the desk in the front lobby.

Device To Check Nicotine Content Patented By Former Agronomist

A nicotine-measuring device patented by former UK agronomist, Dr. Robert B. Griffith and the Kentucky Research Foundation, enables manufacturers to make a quick, accurate check of the nicotine content of tobacco.

Griffith, now the leaf studies group leader of the Brown and Williamson Tobacco Corp. Research Department in Louisville, developed the machine while doing research at UK in 1955-56.

The device already is being used by three of the six major manufacturers of cigarettes and has been shipped to at least seven foreign countries.

One person can make from 200-300 tests in a single day with the machine's steam distillation process.

The machine also enables plant breeders to develop strains more quickly at almost any desired nicotine level because they can use it to test the nicotine content of a living plant before it is crossed with another.

At UK the device has speeded up research involved in determining the reasons for the varying amounts of nicotine found in tobacco.

Griffith's testing procedure was recommended officially at a recent

conference of tobacco chemists held at UK.

He joined the UK faculty in 1953 after receiving his doctor's degree from the University of California. He became a member of the Brown and Williamson staff last October.

Committees Set For Metals Group

Representatives of the Foundry Educational Foundation held a special meeting here last Saturday to set up committees to promote education in cast metals and engineering.

Dr. Roy E. Swift, UK professor of metallurgical engineering and faculty representative of the group, said a committee was organized to aid in the acquisition of equipment for laboratory instruction.

Another committee was appointed to attract UK students interested in the cast metal and engineering fields through personal contacts and visits to high schools.

The meeting was attended by Ed Walsh, Cleveland, executive secretary of the FEF.

Informal Sorority Rush To Start February 2

Second semester sorority rush will extend over a period of two weeks, beginning Feb. 2 and ending Feb. 16, Sharon Hall, Panhellenic adviser said yesterday.

Rushes are asked to come to the SUB between 3 and 6 p.m. Feb. 2 to pick up information sheets and to sign up for the informal rush.

Those sororities participating in rush will hold open houses from 7 to 10 p.m. the same night. All rushes are required to attend all the open houses.

No schedule of parties has been set up for this year. A sorority may invite a girl to its house three times after the open house. Sunday, Feb. 14, is the last time for this contact.

Rush party invitations will be mailed to rushees by the sorority. Preference cards are to be signed by rushees on Feb. 15. The girls will pick up their bids on Tuesday.

O'Brien Elected Sigma Nu Head

Pat O'Brien was recently elected president of Sigma Nu Fraternity.

Others serving on this year's slate are Richard Loeffler, vice president; Tom Harris, secretary; Ronnie McCabe, treasurer; Tom Hamm, chaplain; and Dave Chapman, marshal.

Feb. 16, at 5 p.m. in the SUB. They will then be taken to the sorority house for pledging.

There will be no silence during this rush session. Sororities are to give no favors nor present gifts.

Girls can sign up for rush in the Dean of Women's office any time before the rush starts.

Debaters Place Second In Georgetown Tourney

UK debaters placed second in both varsity and novice divisions in the Kentucky Intercollegiate Debate Tournament Saturday at Georgetown College.

Seven other colleges competed in the tournament. Of those Bellarmine placed first and Western was third.

In individual varsity awards Tex Fitzgerald placed first and Deno Curris was second. John Bozeman was second in the novice division.

Debaters for the varsity in the affirmative were Sharon Chenault and Tex Fitzgerald. Kathleen Cannon and Deno Curris were debating for the negative.

In the novice division Lee McMillan and Gary Wright debated

the affirmative; John Bozeman and Bobby Hawkins were for the negative.

Deno Curris was selected as the top speaker in the University of Illinois Debate Tourney held in Chicago Dec. 12. He competed against 240 debaters.

Pre-Med Meeting
Pryor Pre-Med Society will have its monthly meeting today in Room 313 of Funkhouser Building. The guest speaker Mr. O. C. Bradley will speak about microscopes.

30 Days Allowed For Removal Of 'I' Grades, Registrar Reminds

An "I" grade in any undergraduate course at semester's end will automatically become an "E" grade 30 days after the opening of the second semester, with three exceptions.

A student may change his grade by completing the course work, getting an extension of the 30-day limit from his dean, or not returning to the University second semester.

The new policy was adopted by the University faculty last fall, Dr. Charles F. Elton, dean of admissions, announced.

"This is a very significant change," Dr. Elton declared. "Had

this rule been in effect the first semester, several thousand "I" grades on student records would now be listed as "E" grades.

"I hope all student's getting "I's will be aware of the new policy instituted by the University Faculty and will take steps to protect themselves against the automatic recording of an "E" grade 30 days after the opening of the second semester."

Dr. Elton added that the time limit for Graduate students for making up this incomplete grade is one year.

He explained that the decision of the University Faculty to streng-

then the rule effecting the grade was reached after students began to use the grade to avoid application of the stronger probation rules.

"A considerable number of students carrying several thousand incomplete grades have elected to ignore the "I" and have re-enrolled in the course concerned.

Thus their records show an incomplete in the course and later a grade in the same course.

Now they must complete the "I" in the course within the 30 days of the next period in which they are enrolled in the University or the grade becomes an "E" automatically, Dr. Elton reminded.

"The only exception," he added, "will be in the event an extension is obtained by the dean of the student's college. But the student must take the initiative; he must see his dean if the extension is to be obtained," he added.

Irreality Involved In Drama, Lott Tells Philosophy Club

Current American drama seems to involve a struggle between reality and irreality, Dr. Albert J. Lott, assistant professor of psychology, told the UK Philosophy Club Friday.

Dr. Lott discussed in detail four Pulitzer prize-winning plays: "Death of a Salesman," "Cat on a Hot Tin Roof," "Long Day's Journey Into Night," and "Look Homeward Angel."

"The plays show what happens when the main characters withdraw from reality and what happens in fantasy-oriented situation," the speaker said.

"These fantasy situations can hurt family relations, and only a family member can show the character how he is slipping off."

This confrontation by a family member, Dr. Lott emphasized, is an important part of each play.

The speaker defined irreality as the degree in which the character of an individual dwells on past or future wishes. He ignores what is going on around him and can confuse the present with his fantasies.

The larger significance of this theme is current drama, Dr. Lott said, is that the modern playwright has hit on a theme, which also is a cultural phenomenon—a drift toward fantasy.

Young Democrats

A meeting of the Young Democrats Club will be held in the SUB at 7 p.m. today. Paul Proctor, president, asked that all members attend this final meeting of the semester.

Highway Meeting Set For March 1-2

The 12th annual Kentucky Highway Conference will be held on the UK campus March 1-2, it was announced yesterday by Prof. David K. Blythe, head of the Department of Civil Engineering and co-chairman of the conference committee.

Ellis Armstrong, national commissioner of public roads, Washington, D. C., Otis Hardy, director of highway information service for the Michigan State Highway Department, and Kentucky state officials will be among the speakers for the twoday program.

Blythe said the conference will cover the areas of county and rural highways, structural engineering problems, urban highways, economic effect of highways on local communities, and general engineering problems, including design, traffic, maintenance, equipment and public relations.

Lantern In The Dark

The Ohio State student newspaper, the *Lantern*, has mounted its editorial horse, given it the spurs, and rushed headlong—shooting wildly—into an essay over alleged racial prejudice which it said existed during the UK-Ohio State game. Ohio State has several Negroes on its team.

The editorial is generous in its blasts at Kentucky fans, players, and hospitality; it accuses Lexington of being a prejudiced area, lashes out at Coach Adolph Rupp for not teaching his players to be gentlemen, chastises the fans for booing during foul shots, and even suggests that the OSU-UK series be discontinued.

In a crowd of 13,000—at both Kentucky and liberal Ohio State—someone surely someone will nurse racial prejudice; but as a matter for sensitive editorial lament, as far as the UK-OSU game was concerned, we were not aware of racial antipathy, nor was anyone else with whom we talked.

If there had been any flagrant instances of racial prejudice, we imagine the UK Athletic Department would be the first to apologize to Ohio State and we would have expected much publicity from Columbus's daily newspapers. But there was not a word, until

the *Lantern* supposedly enlightened OSU students.

But, if the *Lantern* wants to condemn Lexington as a prejudiced area lacking hospitality, it should first examine its own Big Ten backyard. We refer specifically to the NCAA Tournament a few years ago at Iowa, in which Kentucky players and fans were humiliated by irate Iowa fans with chants of "hillbilly" to such an extent that the Iowa governor apologized to Kentucky.

And, to those who must cry racial prejudice and judge an entire area because of the isolated action of possibly two or three, we have a suggestion.

Would you please shut up?

The C-J Erred

The Louisville *Courier-Journal*, in its Sunday edition, quotes the *Kernel* as questioning the accuracy of the Associated Press' basketball poll in an editorial. Actually, to keep the record clean, it was not an editorial, but a sports column by Newton Spencer. (Spence Says, Jan. 7).

The Readers' Forum

Don't Prevent

To The Editor:

To enlighten Tom Stafford and others possibly deceived by "More Mollygock:" (Readers' Forum, Dec. 11).

The doctrines of the Catholic Church have not been revised or changed in the past, and surely will not be revised or changed now. Not even the gates of Hell can prevail against the church. Do not be led by anyone to think that the selfish, lazy, immoral, and misguided element of the world's population can prevail against it. No one is responsible to the public to the degree that he must stoop to practice or advocate what not even the lowest forms of animals have ever been known to practice. It is a heinous thing that man, created a little lower than the angels, has degraded himself to the teachings of hedonism.

You referred to "today's moralists." You do not seem to be aware that those Catholic leaders who you say have resorted to moral mollygock, are attempting to pattern their lives and those of their fellow men after the teachings of the only Person who ever lived that left a table of laws that is infallible. Morals are not fashions. The church has never been known to change its laws to immoral ones because a small element of the

population wished to indulge in pleasure for pleasure's sake. There is nothing to be gained by being immoral; there is a great deal to be lost.

If we wish to save humanity, let us not begin by preventing it. Let us distribute by some means to the world's hungry what we waste and throw into the ocean, and let us cultivate the soil which we are paid to leave lie.

Nostradamus The Prophet

Or, The Sere Seer

By BOBBIE MASON
Kernel Staff Writer

There has been much talk recently of a 16th century French philosopher called Nostradamus, who made startling and accurate predictions in rhyming quatrains.

Nostradamus made his predictions by consulting the stars. He never went outside until he first ran to the window and sought the invincible advice of the celestial bodies. As an astrologer, he studied the pattern of the skies, saying that the cosmic arrangements caused world events. With his diagnoses of the heavens, he designed future world movements to accompany the movements of the stars. Then he embodied his conclusions in poetry, which, being poetry, is ambiguous, leaving much to the reader's imagination.

Since his time the stars have unfailingly gone where he said they would and world events have smoothly paralleled the wanderings of the stars. Nostradamus' sagacity is something to behold. But that was his business. He had a bit and he did it.

Nostradamus successfully predicted both World Wars, the Spanish Revolution, the exact date of the French Revolution, aerial warfare, and the Russian Revolution. He also anticipated the coming of Hitler and the League of Nations.

As you can tell, Nostradamus was probably divinely inspired and certainly forward thinking. His accuracy has been overwhelmingly consistent. He also predicted the end of the world.

Two weeks ago, that is.

Now I don't know whether it was the fault of Nostradamus or the stars, but if you have looked to the skies recently, you can probably tell that the world did not come to a halt. (Jan. 3, that is). All of you who stayed up past midnight waiting to usher in the grand event were undoubtedly disappointed. The earth didn't even tremor, and the Administration Building still stands supreme.

There must be some reason for the delay. I have been anxiously waiting. Apparently Nostradamus' rocket has fizzed; his calculations were off-center. There must have been some quirk in his IBM crystal ball; or else, there is a flaw in the heavenly mechanism. This period of suspense is unhealthy for the nation. It leaves us with doubt, mistrust in the integrity of our leaders. Our faith in the supernatural is discouraged at the shortcoming of such a perfectionist. We need reassurance.

Think of what such a revolting development could mean to the world. If a good war can boost our nation's economy so much, what would happen if we really went gung-ho with unrestrained annihilation? The President said that such an event would have dissolved the conflict in the presidential race, and all population control issues would disappear. We over the red President Dickey say that it would have automatically solved the problem of pre-classification—as well as problems of the budget, holidays, SC, the SUB, dorm food, birth control, teachers, and students.

Actually, Nostradamus has contradicted himself; he has been flagrantly erroneous. In other verses he designates the "end of the age" as the year 1999. He apparently didn't stop to think that the world couldn't end twice in the same century. Therefore, 1960 could only have been intended as the beginning of the end. Other prognosticators through the age have pointed to the same dates as times of "great upheaval."

Taking a look at what Nostradamus has in store for the rest of this century, he predicted the discovery of a saint's tomb, the decline and fall of the Catholic empire, a great empire of Antichrist, and 25 years of war and desolation at the end of the century. He said that life will be frankly hedonistic in Africa without the mask of moral hypocrisy. It will be a good refuge for frustrated college students.

He spoke of England as the longest surviving nation, a notion held by others of his kind. The old saying of Rome is here applied to England: "While stands the Colosseum, Rome shall stand, when falls the Colosseum, Rome shall fall, and when Rome, falls the world." (All this talk about colossal supremacy might be reduced to University level, with reference to the Athletic Department.)

It is interesting anyway to speculate on what effect the end of the world will have on the world. Undoubtedly, it will be commercialized like everything else.

Sunny Florida Cures Coed's Exam Fatigue

By ALICE AKIN

The only consolation about exams is the thoughts of a Florida vacation that appear in almost every coed's mind.

Yes, it's almost that time of year again and next Friday when all the tests are o'er, we'll see bags packed and the beach enthusiasts taking to the open road for a delightful 10 days.

Ever wonder what is packed in those bags? Well, from all we hear there is a shortage of dressy clothes and the togs are strictly informal.

Most females report that almost every spare moment of daylight is spent on the beach in an effort of securing a tan for the "Golden Goddess" look.

At night the sunburnt epidermis is poured into a pair of bermudas and, if it gets a bit chilly, perhaps a crew neck sweater is brought out of the suitcase.

Strangely enough a dress just isn't the thing to take along with you unless you plan to spend a ritzy evening nightclubbing in Miami and even then you'd better

plan on getting a date with one of Rockefeller's nephews.

Oh, yes Florida is a must for every tired soul whose energy has been completely sapped from studying.

Entertainment includes the re-knowned "Elbow Room"—you know the place where your grades come in and are tacked up on the bulletin board so that everyone will know just how stupid you really are.

Then there are beach parties, apartment parties, boat parties, and just to be quite blunt about the whole matter—parties in general.

It Takes Preparation To Pass Or Flunk Exams

If you want to have a successful exam week there are a few steps involved in preparing yourself for the crucial hour.

First of all you might select a good movie and go downtown for a few hours of sheer relaxation.

This will relieve the tension and frustration you're probably experiencing.

After the movie scurry home as quickly as possible and prepare to hit the books. Of course you'll need some nourishment, so surround yourself with all kinds of delicious snacks.

And while you're eating these goodies you might as well turn on the TV and watch the late late show.

Now you'll have just time enough to run up to your room and get

By The Associated Press
New colors for cruisewear suggest a mixed green salad.

Charles and Bob Evans, the bright brothers who specialize in bifurcated flattery for women, take the color scheme for their resort collection from a salad bowl.

There are celery green, lettuce green, grass green, lemon, and cypress juniper in their new lineup of shorts, tapered slacks, scarf-print shirts, coordinated skirts, and jackets—all designed for free and easy life beneath the Southern sun.

The new soft greens have a fresh, crisp look that is completely

Heading South?

Select a pair of sun glasses that are suitable to the frame of your face.

The wrong style can make your face look like a sea monster.

1960—more sophisticated than the more usual pastels, flattering to blondes, brunettes, and redheads.

They are used in solid colors, woven plaids and stripes, and bold silk prints, often in combination with white or lemon.

The brothers believe that women look best in simple, casual clothes that are expertly tailored and cut with the feminine figure in mind.

They claim they can make slacks that are becoming even to a size 18—all in the cut.

Fabrics for the new season include yachting flannels in red, white, and blue, silk shirtings, dacron-and-wool blends, crisp cottons, silk linens, and bold printed scarf silks.

And the new salad colors supply wardrobe vitamins.

Scarf Print . . . newest fad of the international set—scarf silk shirt and silk linen slacks in salad colors, by Evan-Picone.

Popper Shirt . . . celery green cotton shirt to be worn over or under random striped cotton shorts in coordinated salad colors.

These are the silver wings of a U. S. Air Force Navigator. As a flying officer on the Aerospace team, he has chosen a career of leadership, a career that has meaning, rewards and executive opportunity.

The Aviation Cadet Program is the gateway to this career. To qualify for this rigorous and professional training, a high school diploma is required; however, two or more years of college are highly desirable. Upon completion of the program the Air Force encourages the new officer to earn his degree so he can better handle the responsibilities of his position. This includes full pay and allowances while taking off-duty courses under the Bootstrap education program. The Air Force will pay a substantial part of all tuition costs. After having attained enough credits so that he can complete course work and residence requirements for a college degree in 6 months or less, he is eligible to apply for temporary duty at the school of his choice.

If you think you have what it takes to earn the silver wings of an Air Force Navigator, see your local Air Force Recruiter. Ask him about Aviation Cadet Navigator training and the benefits which are available to a flying officer in the Air Force. Or fill in and mail this coupon.

There's a place for tomorrow's leaders on the Aerospace Team.

KALEDIOSCOPIES

By Bill Atkinson

Sun Shirt \$10.95

Beachcomers \$9.95

Swimmer \$16.95

KALEDIOSCOPIES are made of bits of magic and filled with sheer delight . . . what better beginnings for a winter holiday!

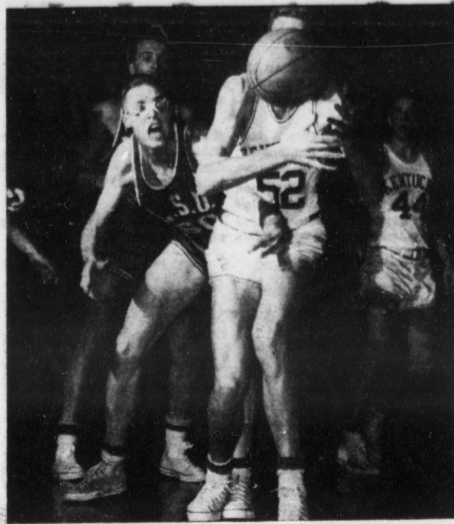

Bill Atkinson cleverly catches their spirit, takes their brilliance, their fascinating patterns and works his own. He heightens the spell with shimmering linens, their colors conjured from the sunset and the sea, then splashed the collection with sparkling white canvas.

You'll be enchanted with these gay and exciting new-under-the-sun clothes he calls — KALEIDOSCOPE.

No, that's not a creature out of a new science-fiction movie. It's only Don Mills struggling to recover a loose ball in Saturday's UK-LSU basketball game. The Cats won the contest, 77-45.

Slow-Starting Cats Defeat LSU 77-45

By STEWART HEDGER

Bengals have never defeated the Cats.

Sub Sid Cohen sparked a second-half drive for a slow-starting Kentucky five Saturday night as the Cats downed Louisiana State 77-45 at Memorial Coliseum.

11,900 fans frowned as the ice-cold Wildcats went two minutes and 37 seconds without scoring a point. The Cats finally hit their first field goal—a jump shot by Carroll Burchett—after 3:55 had passed.

Despite the Kentucky lag in scoring, the Tigers were even worse and Burchett's fielder gave the Cats a 3-2 lead.

The snail's pace continued for nine minutes and 39 seconds. At that point, Kentucky led by a minute score of 9-5. Then the pace quickened somewhat and the Cats outscored the Tigers during the second 10 minutes of the half by 27-20 to take a 36-25 lead to the dressing room.

Kentucky gained some ground in the second half and led 44-30 after 5:44 had ticked off the clock. Here, Cohen entered the game and the Cats quickly widened the gap.

In the 11 minutes and 56 seconds he played, Cohen hit four field goals and went five for five at the free throw stripe to finish as high point man of the game with 13.

When Cohen and the regulars were lifted with 2:26 remaining, the lead had grown to 72-39. From there on out the Tigers outscored UK's sophomores 7-5 to make the final 77-45.

The frigid Wildcats canned only three of their first 23 shots of the game. They recovered, slightly, and finished with 22 of 81 for an icy 27.2 shooting percentage.

As cold as the Cats were, the Bengals were colder. The boys from the bayou country hit only 15 of 62 attempts from the field for a subterranean 24.2 percent.

At the foul line it was a different story for the Cats. After sinking their first 18 shots at the line, the Wildcats hit 33 of 37 attempts for a percentage of 89.2.

LSU hit on 15 of 26 foul shots for 57.7 percent.

Kentucky also showed a wide margin in rebounds as they grabbed 72 to LSU's 47. Don Mills pulled down 20 rebounds for leadership in that department. Burchett followed with 13. Joe Borgini led high for LSU with nine.

Following Cohen in the scoring column were Bennie Coffman with 12 points and Burchett with 11. Tom Conklin led LSU with 9 and Dick Davies and George Nattin each had 8.

The win marked the 19th straight time Kentucky has defeated LSU on the basketball floor. The

Studs Upset Delts For I-M Crown

Independent Division champion Studs defeated favored Delta Tau Delta, Fraternity Division king, 72-62 Thursday night at Alumni Gym to win the intramural basketball championship.

Dickie Longbons of Sherman Ky., led the victorious Studs with 22 points. Bobby Flynn scored 18 points for the winners and Sam Brockman added 13.

For the defeated fraternity champions, Kenny Beard was big man with 20 and Lary Heath added 15. It was the guard play of Beard and Heath that kept the Delts in the contest.

Studs trailed, 33-32, at half time but pulled away in the second half due to superior rebounding. With Longbons leading the offen-

sive attack and Flynn and Brockman controlling both backboards the Delts found themselves out-classed.

The Studs completed the regular season and tournament play without a defeat. The independent team won six straight in regular play and took five more enroute to the tournament crown.

Studs defeated the Independents, BSU, and Tappa Kegs to win the

Independent Division championship. They then defeated Dorm 9 to win the right of facing DTD in the I-M championship game.

For DTD, it was their first loss of the season. They had won nine games in a row prior to the championship game.

This is the third straight year a Delt team has entered the I-M basketball tournament as favorites only to find itself upset.

Russia Publishes Book By UK's Adolph Rupp

The Russians are familiarizing themselves with basketball through a book by Adolph Rupp, UK basketball coach.

Tass, the Soviet news agency, said Friday a publishing house had issued a Russian translation of a book by Rupp entitled "Big Basketball." Translated it into Russian.

It is a part of a new Soviet policy. The Physical Culture and Sports Publishing House said it plans to put out more works by foreign authors dealing with sports techniques.

YMCA Wins Over Kittens

Lexington YMCA defeated the UK freshman basketballers 85-67 in a preliminary game at Memorial Coliseum Saturday night.

Roger Newman, former UK freshman star, and Bill Darragh, one time University of Louisville star, led the YMCA with 23 and 21 points, respectively.

Bernie Butts hit 26 points for the Kittens and finished as the game's leading scorer. Butts was the entire show for the Kittens as no other freshman scored in double figures.

The YMCA hit 32 of 75 field-goal attempts for a 42.7 shooting percentage. The Kittens hit on 21 of 60 for a low 30.4 accuracy mark.

The Kittens trailed 40-30 at half time.

A cheer went up from the Coliseum crowd Saturday night as a dark-haired, 6-1 *Sid Cohen* entered the contest. For 25 minutes the crowd had watched a poorly played struggle between two teams who were headed, apparently, nowhere. The fans yearned action.

The Brooklyn-born Cohen didn't let them down. Always a favorite with Wildcat rooters, Sid hit two quick baskets and initiated a UK rally. He finished as high-point man of the game with 13 points.

Always a hustler, Cohen appeared to have been the only UK player who gave his utmost effort in last week's tragedy with Georgia Tech. When he entered the LSU game, he converted the Cats from plodding, flat-footed, and unorganized boys to a running, fast-breaking, and revitalized basketball team.

For the most part this season, *Coach Adolph Rupp* has used Cohen only sparingly. His primary assignments have been ball-handling tasks to protect a Kentucky lead in the latter portions of a game.

If Cohen can regain the form he displayed in the 1958 UKIT, the Cats may have found that "spark" which they need so badly in their quest of the 1960 Southeastern Conference championship.

One thing for certain—when Cohen enters a game in the Coliseum the crowd becomes alive. And there's always an excellent chance the Cats will also.

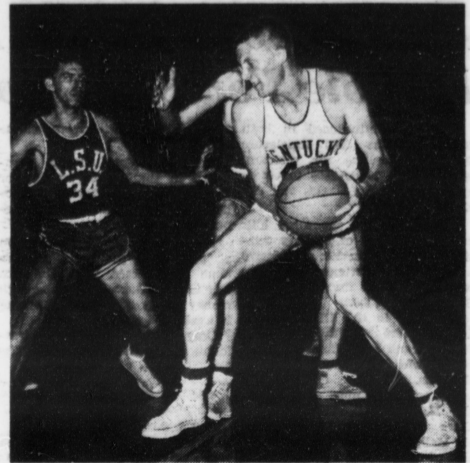

NCAA Selects Rupp, Shively

UK Coach Adolph Rupp has been elected to the basketball rules committee at the NCAA meetings in New York City.

Other members include Arad McCutchan of Evansville and Polk Robinson of Texas Tech.

Bernie Shively, Kentucky Athletic director, was elected chairman of the university division basketball tournament committee.

It Pays To Advertise In The Kentucky Kernel

Battling Burchett

Wildcat Carroll Burchett's recent promotion to the starting lineup has given a big boost to UK's hopes for another SEC crown. The 6-5 forward has scored in double figures in all four of the games in which he has been a starter.

A Campus-to-Career Case History

"My talk with the Bell System interviewer is really paying off"

Today, less than five years since he graduated from Michigan State University, Donald J. Zigman is an Accounting Manager for Wisconsin Bell Telephone Company in Oshkosh—with seven supervisory and 93 clerical employees reporting to him. His group handles billing for 350,000 telephone customers and processes \$1,500,000 in revenue each month.

Don has moved ahead fast—and steadily—but no more so than the Bell System interviewer told him he might.

"That guy made a real impression on me," says Don. "He didn't guarantee a bright future for me. He simply described the kind of varied job experience I'd get, outlined the on-the-job training I'd go through, and pointed out the advancement opportunities I'd have along the

way. The only thing he promised me was that I would have 'maximum exposure for self-development.' He was 100 per cent right there. My training has been terrific—and I've had every chance to advance that I could possibly hope for."

After joining the company, Don spent eight months in the Plant Department learning the roots of the business. He got experience as a lineman, installer and repairman. He was transferred to Accounting in December, 1956, working in the Methods and Results section. Thirteen months later, he was Supervisor of that section—and, 14 months after that, he became Accounting Manager.

"How much farther I go now is entirely up to me," says Don. "One thing I know: the opportunities are here."

Don Zigman graduated with a B.A. degree in Economics and English. He's one of many young men who have found interesting careers with the Bell Telephone Companies. Learn what opportunities you might have. Talk with the Bell interviewer when he visits your campus—and read the Bell Telephone booklet on file in your Placement Office.

About 600 Veterans Here Eligible For State Bonus

Bills were introduced in both houses of the 1960 legislature Wednesday calling for veterans' bonuses of \$300 or \$600 to veterans of all declared wars and the Korean conflict.

The Republican sponsored bills call for veterans of 90 days wartime overseas service to receive a flat \$500 and veterans of 90 days wartime service in the United States to get \$300.

According to the UK Veterans' Office, there are approximately 600 veterans attending the University who would be affected by the bills.

Tax measures must originate in the House. The bill introduced there by Representative Robert M. Hall, Cumberland Republican, also provided for a 3 percent sales tax. The tax would exempt food,

food products, medicine and clothing.

The companion bill was introduced in the Senate by Senator H. Nick Johnson, Harlan Republican. Both bills had several Republican cosponsors.

The bonuses would be paid on a "pay-as-you-go" basis, as revenue is collected from the tax. The tax would expire when enough money to pay all veterans' bonuses is available.

Only veterans who were residents of Kentucky for six months

before entering the service would be eligible.

One major difference in the new bill is that no bonus would be paid to survivors, heirs or next of kin. Such payments are called for in the veterans' bonus amendment, approved by the voters in November and now being tested in the courts.

That amendment also provided for bonds to be issued to pay the bonus, with the bonds to be retired through a sales tax. The tax rate was not specified.

Athletic Officials

Continued from Page 1
had a similar experience in last year's OSU-UK game. "The insults to Negro members of the team be-

fore the opening jump of that game," the editorial stated.

The article quoted a newsmen's statement that Kentucky is "too big to stoop so low."

"The University of Kentucky always ranks near the top in college basketball," the paper said. "But judging from the fans' treatment of Ohio State in the Lexington Coliseum, Kentucky does not rank so highly in sportsmanship."

Year Lease

Continued from Page 1
tin said they were not.

"We have always had vacancies in the apartments. We have had no complaints over the setup."

Dean Martin said there is a good possibility the lease could be broken if the student dropped out of school with no intention of returning.

Students who had moved into the married residences before Nov. 1 will not be required to sign the lease.
