194

The faculty met in regular session Tuesday, May the twenty-third, nineteen hundred and sixteen, quorum present.

The meeting was called to order by President Barker and the minutes of the last meeting were read and approved.

Action on the following report from the Committee of Deans was postponed from the last meeting:

"A special student, who has completed the college work pre-requisite to the senior year, may, if recommended by the faculty of his college for this privilege, be classified as a regular student upon either of the following conditions:

Spec. Stud.

1 - If at least seventy-five per cent of his work is of "A" and "B" grades, his college credits may be substituted at the rate of two semester credits for each entrance credit not yet satisfied. At least twenty semester credits, whether used to satisfy entrance conditions or for graduation, must be selected from the subjects taught in the College of Arts and Science.

2 - If eighty-five per cent of his work is of "A" and "B" grades, he will be eligible to senior classification.

In any event, the student must offer six semester credits in college English."

The faculty voted the adoption of this report.
