## SEED INSPECTION IN KENTUCKY, 1950-51

The nineteenth year of operation of the Kentucky Seed Law began May 1, 1950 and closed April 30, 1951. During this time 866 official samples were taken from a total of 8,893 lots of seed inspected. This is the largest number of samples taken in one year since the enactment of the seed law in 1932.

Enforcement officials have passed upon all violations and irregularities and helped to solve many of the problems of farmers and seedsmen.

### EXPLANATION OF TABLES

The following tables show the results of analysis of official samples. Table 1 shows the percentages of purity and germination stated on the tags and the percentages found, a statement of excessive amount of noxious weed seeds when present, irregularities in tags, and absence of tags. The variations allowed in purity, germination, and weed seed per ounce are described on page 22. U. S. D. A. Service and Regulatory Announcements, No. 156, Rules and Regulations Under The Federal Seed Act, Reissued July, 1950: paragraphs 201.59, 201.60, 201.61. Results within the allowed variations are marked with "+" if above, or "-" if below statement on the official tag.

Variations greater than those allowed constitute violations of the Kentucky Seed Law, and such results are underscored. In the table, "L" means listed on the tag and "F" means found in our test. The long line means "not listed".

Table 2 shows violations found in samples classified according to wholesale dealers from whom they were purchased.

Table 3 contains a summary to show the kind and number of violations detected.

Table 4 tabulates, for comparison, the work for the past ten years.

1944-5	5415	542	13	77	29	108	19.9
1945-6	6525	683	38	92	56	162	23.7
1946-7	6132	614	19	40	36	82	13.4
1947-8	7013	658	26	45	47	107	16.3
1948-9	7350	700	25	46	40	95	13.6
1949-0	7425	779	33	8	41	72	9.2
1950-1	8893	866	34	55	39	113	13.0

The percent of unlawful samples this year is 13.04 compared with an average of 15.24 for the preceeding five years and 18.10 for the ten-year period, 1940-1 to 1949-50 inclusive.

The educational program of the department has continued and, with the hearty cooperation of both farmers and seedsmen, has been very effective.

The availability of more efficient seed-cleaning machinery, increased interest and skill of operators, and more general reading and study of seed tags have contributed much to the success of the program.
