GET WILD

ANNOUNCING THE WILDCAT CARD...
THE OFFICIAL CREDIT CARD
OF THE UNIVERSITY OF KENTUCKY

Not everyone gets a chance to be this wild! We proudly introduce "The Wildcat Card" for friends and fans of The University of Kentucky. This card features a 13.8% APR*, no annual fee for the year in which you apply (an \$18 value) and the satisfaction of knowing that each time you use your card you show your support for UK. This new card is provided through the UK Alumni

Association and The UK Athletics Department. So come on Cat fans, give yourself some credit!

For more information, visit your nearest Fifth Third Banking Center, call 1-800-972-3030, or call the UK Alumni Association at 606-257-8905.

*13.8% APR effective until January 1993. After that the APR will be 6.5% above the highest Prime Rate quoted in the *Wall Street Journal*.

The 1993 Great Teachers were honored with a luncheon at the King Alumni House. Here with President Wethington are the honorees, from left, Joel M. Lee, College of Allied Health;

David M. Olster, History/Honors Program; Cynthia E. Barber, Lexington Community College; Donald Maley, Paducah Community College; Vernell Larkin-Bussell, Hopkinsville Community College, and F. James Holler, Department of Chemistry. The UK Alumni Association has presented the awards since 1961. Photo by Ken Goad.

Vision for the Future

The UK Board of Trustees has approved a strategic plan setting the university's goals for the next five years and a first-ever UK faculty workload policy statement.

Among other goals, the strategic plan calls for UK to:

- Increase its private donations to \$35 million annually from the current rate of about \$28 million;
- Complete construction of the new library by 1996;
- Increase to \$120 million each year the amount of research grant money attracted by the university's faculty;
- Increase graduate enrollment to 5,500 students and doctoral enrollment to 1,850.

Other enrollment goals for the university were also established.

The university's first faculty workload policy statement was designed by a faculty committee headed by geography professor, Karl Raitz.

Raitz said the faculty policy statement "describes the diverse responsi-

bilities that comprise the workload of faculty in the university system and spells out the process for determining a 'Differentiated Distribution of Effort' for each faculty member and each educational unit."

Going from Two to Four

A new national survey shows the University of Kentucky community college system ranks high in comparison to other states in the number of students transferring to four-year institutions.

The survey shows 36.1 percent of Kentucky's community college students who began their studies in 1987, and completed at least four college credit courses, transferred to a state college or university. The national average was 22 percent, according to the data.

Tony Newberry, vice chancellor for academic affairs for the UK community college system, said, "We are very pleased with the results. They verify what we have known all along. Community college counselors and faculty are doing an excellent job in

advising students about opportunities at four-year institutions."

Concert Series

They come from Eastern Europe, Ireland, Italy, even the Australian outback and the heartland of America. They are among the world's elite classical orchestras, instrumentalists, singers, and chamber ensembles. They are next year's featured artists for the 1993-94 University Artists concert series at the Singletary Center for the Arts.

The five-part classical agenda begins October 12 with the Irish pianist Barry Douglas. November 4, the Warsaw Philharmonic Orchestra takes the stage with Kazimierz Kord, conductor, and Ruth Laredo, piano.

Continuing the series is opera star Samuel Ramey on December 4, and the Italian chamber ensemble, I Musici, opens the 1994 year January 31.

For the first time, the artist series is showcasing a brass soloist: Barry Tuckwell, French horn, on February 21.

All University Artist Series performances begin at 8:00 p.m. in the Singletary Center for the Arts. Subscription tickets are now on sale at the Singletary Center Ticket Office, Rose and Euclid Avenue, (606) 257-4929.

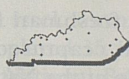

Tenant at Coldstream

Another tenant will be moving into the University of Kentucky's Coldstream research development park. The Kentucky Technology Center, a wholly owned subsidiary of Kentucky Technology Inc. will be a multi-building, multi-tenant complex. The first building is expected to be ready for occupancy in early 1994 by Process Technology, Inc., a research and development organization focusing on advanced coal cleaning processes and instrumentation and control systems currently based in Calumet, Mich.

Jenny Hansen, a freshman from Somerset, Wis., is UK's first ever NCAA champion in gymnastics, winning the all-around title. After capturing every UK individual record during the

season and freshman of the year honors in the SEC, Hansen became the first women's gymnast in NCAA history to score a perfect 10 on the vault and secured the third highest all-around score in championship history. Photo by David Coyle.

Rifle Champion

Nancy Napolski, a freshman from Downer's Grove, Ill., captured the women's air rifle title at the National Junior Olympic Championships this semester. Napolski, a member of the UK rifle team, hit 388 out of 400 points in the match. She is a former three-time Illinois state rifle champion.

Football News

Four UK players were selected in the 1993 National Football League draft. Dean Wells, Todd Perry, Chuck Bradley and Doug Pelfrey as a group represent the second-highest number of Wildcats selected in the NFL draft in one year. The highest number of Wildcats chosen was five in 1966, which included three first-round selections (Sam Ball, Rick Norton and Rodger Bird), a second-round choice (Bob Windsor), and an 18th-round pick (Rick Kestner). Wells, a 6-3, 243-pound

linebacker, was chosen by the Seattle Seahawks in the fourth round; Perry, a 6-5, 292-pound offensive guard, by the Chicago Bears, also in the fourth round; Bradley, a 6-5, 305-pound offensive tackle, by the Houston Oilers in the sixth round, and Pelfrey, a 5-11, 183-pound kicker, by the Cincinnati Bengals in the eighth round.

The College Football Association again awarded Kentucky's football program honorable mention honors for academic achievement. Duke won the award with a 100 percent graduation rate. UK and 18 other schools had graduation rates of 70 percent or better. Other SEC schools included were Mississippi, Mississippi State and Tennessee. According to the NCAA, the average graduation rate for men only at Division I-A level is 54 percent. Kentucky took top honors in 1989.

Clyde Rudolph, a 5-7, 167-pound junior tailback, sprinted his way into the SEC indoor track and field record book with a championship in the 200-meter dash with a time of 21.44 seconds.

A Heartfelt Loss

The university community was saddened by the death of Ted Presley, a walk-on cornerback on the UK football team who died from a gunshot wound to the head. Teammates decided to cancel the annual spring Blue-White game when they learned of Presley's death. This coming season the team will add Presley's initials to their helmets alongside those of Delandual Conwell. Conwell was a teammate that had a tumor removed from his spine and has been wheelchair bound ever since. Presley, from Hopkinsville, was listed No. 4 on the depth chart at boundary cornerback. It was his goal to make the traveling squad this fall while maintaining his 3.0-plus grade point average as an electrical engineering student. Presley attended Hopkinsville Community College before deciding to continue his education and play football at UK.

"On the very first day Ted walked on the football field," commented coach Bill Curry, "he earned the respect of his teammates by displaying courage and unusual determination while going through the grinds of a conditioning drill. And, in his last practice on Wednesday, he enjoyed his finest moment as a Wildcat football player with several big plays during the scrimmage. That type of spirit which Ted exhibited on the football field will always remain a part of this

Kentucky football team. Because of the person I knew Ted to be, I was not surprised when informed there was no alcohol or drugs in his system at the time of the incident." The death was initially termed accidental, but is still under investigation.

Issel's Fame

Dan Issel, former UK all-American who played 15 years in the American and National Basketball associations, was inducted into the Basketball Hall of Fame this May. Issel is currently head coach of the NBA team for which he played, the Denver Nuggets.

Issel came to UK from Batavia, Ill., and graduated from UK in 1970 after becoming the Wildcats' all-time leading scorer. Altogether, Issel set 23 school records while playing for coach Adolph Rupp.

Issel's prolific scoring ability continued into his professional career. In 1971, Issel's rookie year with the Kentucky Colonels, he was named the ABA's Rookie of the Year and led the league in scoring with 29.9 points. He followed up that performance in his second year by setting the ABA record for most points in a season (2,538) and was named the most valuable player in the All-Star Game. Issel

also played a key role in the Colonels' 1975 championship season.

When the ABA folded, Issel went to the Denver Nuggets for the remainder of his career. As a Nugget, Issel became that team's second all-time leading scorer (16,589) and first in rebounds (6,630). Issel also ranks first in the Nuggets' record book in free throws made and attempted, and second in minutes played and field goals made. Issel played in the 1977 All-Star Game as a Nugget.

Basketball News

Associate coach Herb Sendek will be coaching basketball at Miami (Ohio) University. This is the 10th Pitino assistant to move to a head coaching position. Pitino promoted Billy Donovan to associate coach, a position that includes duties as recruiting coordinator. Donovan came to UK in 1989. Also moving up, from assistant strength and conditioning coach to full-time assistant, is Delray Brooks. Brooks joined the UK staff last July. Both Donovan and Brooks played for Pitino at Providence College in 1987 when the Friars went to the Final Four. Part-time assistant coach Bernadette Locke-Mattox turned down the offer to become associate coach. Pitino said Locke-Mattox's ultimate career goal is to become an athletics director, not a head coach. Her current job affords her opportunities in administration not included in the other coaching positions.

Post-season Wildcat awards went to Travis Ford, best free throw shooter, best play maker and student-athlete of the year; Jamal Mashburn, best rebounder and most valuable player; Rodney Dent and Dale Brown, fewest turnovers per minutes played; Brown, best defensive player and Mr. Deflection; Jared Prickett, Mr. Hustle; Junior Braddy, team leadership; Andre Riddick, most improved player, and Todd Svoboda, Reggie Hanson sacrifice award. Pitino also named Ford, Jeff Brassow and Gimel Martinez captains for the 1993-94 season.

PARRETT IN THE PROS

**PARRETT
PLAYED AT
UK FROM
1980-83.**

When thinking about professional athletes who are UK men, Cliff Hagan, Dan Issel, Sam Bowie, Kenny Walker and Rex Chapman immediately come to mind. All of these have one thing in common — basketball. However, many fail to realize that former UK baseball player Jeff Parrett came within two games of being the first UK man to pitch in the World Series.

Jeff, who pitched for baseball coach Keith Madison's Wildcats from 1980 through 1983, had his finest season in professional baseball this past year. He led the American League with nine relief wins, while being the most consistent middle reliever on the Oakland Athletics, the American League West division champions. This year he's playing for the expansion Colorado Rockies.

Jeff was raised in Lexington, and attended Lafayette High School, where his heroes were Pete Rose, Tony Perez and other members of the Cincinnati Reds teams that dominated baseball in the 1970s.

At that time, Jeff could only dream he would someday play major league baseball. But it was at UK that Jeff blossomed as a pitcher under

the tutelage of Madison.

Although Jeff likes to joke that he and his former UK teammates could have been track stars after all the quarter-mile sprints Madison made them run, Jeff credits his former college coach as a major influence in his development as a pitcher.

"Coach Madison taught me the importance of not overthrowing," Jeff said. "One of the things that can mess up a pitcher is that one out of every 10 times, I'm able to throw the ball as hard as I can. And then the next nine times, I can't throw it that hard, although I try to; so I tend to overthrow. The important thing to realize is that the ball may be reacting differently than the way I perceive it to feel. He taught me to pitch my best no matter how I felt on a given day."

Jeff enjoyed pitching at UK, but he also enjoyed the fun of being in college.

"You've got boundless energy when you're in college because you're in the prime of your life," Jeff fondly remembers. "You can stay up until 3 a.m. studying, wake up at five, and not feel a thing. Living in Kirwan Tower was a lot of fun."

Although Jeff pitched for UK for four years, his funniest memory at UK on the baseball field involved umpiring, not pitching.

BY ROB MISEY

"My roommate, Tim Luginbuhl, and I had had some differences. The next day, the coaches had me umpiring — calling balls and strikes — from behind the pitcher's mound," Jeff recalled. "Well, Tim was hitting with two strikes. The next pitch bounced about four feet in front of the plate and I called him out on strikes. I don't think Tim appreciated it, but everyone else got a big laugh out of it."

Unlike the majority of major league players, who go straight from high school to the minor leagues, Jeff was part of the emerging minority of players who previously played ball in college. Jeff believes it was for the best.

"I think the scouts knew I wanted to go to college because I had been a good student in high school. Even though it delayed me entering minor league baseball until I was 21, I did a lot of growing up during my four years at UK. Of course, I'm still doing a lot of growing up," Jeff joked. "But not as much as I did back then."

Last season Jeff established himself as one of the premier middle relievers in baseball and played for a division-winning team. However, the struggle has been long and tough.

With a 4-1 record his senior season at UK, the Milwaukee Brewers picked Parrett in the ninth round of the 1983 June free agent draft (the Montreal Expos had picked Jeff after his junior season, but he chose to stay in school.)

The next two years, Jeff pitched in the lower levels of minor league baseball in towns such as Beloit, Wis., Stockton, Calif., and even Paintsville, Ky. His big break came in the winter of 1985-86 when the Brewers failed to put him on their 40-man roster and the Expos drafted him as a Rule 5 player, which required the Expos to keep him on their major league roster for a year. Playing in the National League that summer of 1986, Jeff got the thrill of pitching against his childhood heroes Rose and Perez.

Following the 1988 season, Parrett was traded to the Philadelphia Phillies, where he posted his second-consecutive 12-win season. In September 1990, the Phillies traded him to Atlanta for long-time Brave Dale Murphy.

"Every move was a good one," Jeff said, "When I went to Philadelphia, it got me back into the States, and in Atlanta, I was closer to Kentucky."

But times soured for Jeff in Atlanta. The

Braves sent him down to the minors in Richmond, Va., in June 1991. They recalled him in August, pitched him for a single inning appearance in which he picked up a win, and, six days later, returned him to the minors. The Braves released him at the end of the season. It was a trying time for Jeff.

"It was hard watching the Braves on TV in the World Series that year. I should have been there with them, but I wasn't," Jeff said. "My statistics did not substantiate me being in the big leagues at that time. Of course, the Braves didn't seem to have much patience with me, either."

Fortunately, Jeff was able to sign with the Oakland Athletics, who have a history of rescuing baseball careers and who were trying to rebuild a slumping pitching staff. The Athletics invited Jeff to spring training as a non-roster player, and worked with him at building his confidence.

"Although the game of baseball is important, I learned to put it in perspective. I worked with a guy named Harvey Dorfman who counsels a lot of the Athletics," Jeff commented. "He helped me realize that after I went home last year, even though I had a bad season, my wife still cooked me breakfast and my bird dogs still pointed to birds. It helped me come to spring training a lot looser."

At spring training, he soon impressed manager Tony La-Russa and pitching coach Dave Duncan enough with his arm strength and a low earned run average (1.92) to win a spot on the team. These events further boosted his confidence.

Jeff started the season strong, earning wins in three of his first four appearances. He was consistently effective as the Athletics' set-up reliever over the course of the season. In games pitched by both Parrett and Dennis Eckersley, who won the Cy Young Award as the league's best pitcher, the Athletics were an incredible 45-0.

The A's were pleased with Parrett's success. Manager LaRussa said, "Jeff keeps

**PARRETT
PITCHED FOR
THE PHILLIES
IN 1989
AND 1990.**

RIGHT: PARRETT HAS AN EARLY SEASON 3.15 ERA WITH HIS CURRENT CLUB, THE COLORADO ROCKIES EXPANSION TEAM. BELOW: PARRETT WITH DAUGHTER, KYLA, AND WIFE, DEBBIE.

getting stronger and stronger. Fortunately, he has a real strong arm so he can pitch often."

Even though Jeff had his best statistics of his career this past year, he took his season one pitch at a time.

"I just wanted to try to stay within myself," he said. "In a long season, there are a lot of outs for a pitcher to get. All season long my goal was to throw as many pitches as I could that I would be proud of. I knew if I did that, the statistics would take care of themselves."

If Jeff had a job in the office of career services, he would recommend a career as a baseball player to anyone so inclined.

"It's still a thrill getting to put the uniform on each day because it's a lot of fun being a ball player," Jeff said. "Of course, it's a lot more fun having success like last year than in the past few years. But then, even when I struggled, at least I had the chance to go out there and

play. I thank the Lord every day for that opportunity."

Although Jeff always considers Kentucky to be his home, having pitched for six different organizations, he is an expert at packing and moving. He got more practice when he moved again last winter. He signed as a free agent with the Colorado Rockies.

"Most of the years I've been in the big leagues,

it has been the last day of spring training that I've found out if I made the club," he said. "So once I make the club, I have to move pretty quickly."

But Jeff keeps his roots in Kentucky with a home in Jessamine County. He also owns a farm in Owen County, where he grows feed.

In the off-season, he hunts for both deer and birds, which helps him relax. He also appreciates Madison letting him use the training facilities at UK to stay in shape.

Jeff likes to joke that he had to go to Missouri to find his wife Debbie because "with my reputation, I had to go out of state to find someone," but he's very serious when talking about her home cooking. "If I had one last meal to eat it would be at home," Jeff explained. "I'm on the road for eight months of the year, so it's nice to have some home

cooking. Of course, home cooking is even better because Debbie is a great cook."

This past season, the couple had their first child, Kyla, who will be a year old in June.

"It's awesome having a baby girl, but there isn't a lot of sleep," he said. "It isn't always that easy. After I've played a game, I'm so wired for a couple of hours that there isn't any chance of sleeping until two or three o'clock in the morning."

Although Jeff would enjoy being the first UK man to pitch in the World Series, his goals, in accordance with his one pitch at a time philosophy, are more abstract.

"The only thing I really want to do is feel good inside that I've given my career an honest effort — that I've done everything I can to play to the best of my ability," he said. "Whether that is through clean living, working hard, good fortune, intense concentration, or wherever it is, I want to make sure I've given it my best shot."

But Jeff realizes that his career will not last forever, and that some day, he will have to remove his uniform for good.

"I would like to work on my farm in Owen County and possibly go into cattle ranching. I don't have any cattle now because I don't have time to take care of them.

"If being a cattle rancher doesn't work out, I also have some desires to teach school. It would be nice to go back to Lafayette, but I would rather go out somewhere to a county school, where I think I could make a bigger difference with the kids. That's where I could relate my experiences to the kids, teaching them that it's possible to achieve a lot of things out there in the world if they just give it their best shot."

Rob Misesy '83, an attorney, works for the IRS in Washington, D.C. He is a past president of the Greater Washington, D.C., UK Alumni Club.

Reaching for More Than Recovery

by Kay Johnson

"A lot of it is that you think, 'it won't happen to me.' You don't get sick, you don't have headaches, you don't have a fever, you don't feel anything ... not when it's tiny, not when it's in the stage where it's really curable. You know you're fine."

Doris Rosenbaum is talking about breast cancer.

A cancer survivor herself, Rosenbaum is a tireless advocate for making screening mammograms available to every woman in Kentucky.

"She's touched so many lives I wouldn't know where to begin ...," says Rosemary Graves, receptionist at the Breast Diagnostic Center in Radiology at the UK Medical Center. "I've known her for many years. I was her Reach for Recovery volunteer when she was first diagnosed with breast cancer — then about seven years ago when I had to have a second surgery, and my other breast was removed, I found out what true friendship is. She was right there with me every minute. Last Sunday in church Father said something that applies to Doris: 'A friend is a gift from God to be treasured more than gold.' She is my gift."

And, so it seems, a gift to all of the women of Kentucky.

Her interest in helping others led to volunteering at the UK Hospital over 20 years ago. Then, about 10 years ago she joined the Thursday Group, a support group of women who have had breast

Doris Rosenbaum, a tireless volunteer in the battle against breast cancer, believes "It's nice when people give of themselves. It's just the thing to do."

Photo by Mark Kidd.

cancer who meet once a month. "We enjoy getting together so much — there are a lot of little questions that you ask each other about feelings, and about physical characteristics after you've had surgery. You hate to keep calling your doctor all the time — women can answer each other's questions," says Rosenbaum. "It's this group of women, especially, who recognized the need for early detection in breast cancer."

Her concern for early detection led Rosenbaum to spearhead the effort of making screening mammography avail-

able to women all over the state, no matter their income. She says, "If somebody needs to choose between buying shoes for their kids, or if the refrigerator needs fixing, they're going to do those things before spending \$100 or \$150 for a test that will probably be negative."

The women decided to ask the General Assembly to mandate that insurance companies already covering breast cancer treatment, pay at least \$50 toward a screening mammogram. The fee for a screening mammogram can be as high as \$180. "We started talking to legislators and organizations across the state telling them of the importance of early detection, and the importance of having screening mammography covered by insurance." Rosenbaum also wanted free screening mammograms made available to medically indigent women.

When legislation was proposed in 1989, Dr. Gilbert H. Friedell, director for cancer control for the Lucille Parker Markey Cancer Center, recalls that Rosenbaum primarily was responsible for mobilizing women across the state to support it. "The women called everyone in sight. One legislator was heard to complain to other legislators that these women were using unfair tactics, and said, 'why, they even called my wife.'

"Doris moved from being an important member of a support group to the role of major responsibility for the idea of enhancing and encouraging screening for breast cancer," says Friedell.

Graves says Rosenbaum "spent hours, it seems like thousands of hours," working to get the legislation passed.

Legislation, introduced in 1990 by Rep. Ernesto Scorsone '73, '76 of Lexington, and Sen. Benny Ray Bailey of Hindman, passed in 1991, providing that screening mammograms be made available for all of the women of Kentucky, with up to \$50 paid by private insurance companies, and for the uninsured, provided through the services of their county health department.

"When we started the screening mammography program in 1990, only about six of the facilities were accredited by the American College of Radiology. Now of the 120 facilities in Kentucky, 96 are accredited," says Rosenbaum. "Women in every county in the state can go to their health department and be sent to a radiology facility for a screening mammogram." More than 11,000 women have been screened through health departments across the state. "A lot of cancers have been found. Fortunately, most of them, because of early detection, were very small cancers," she says.

Bailey was so impressed with the efforts of the women that when it came time in the legislation to designate an advisory committee, he specified that the five members include three women who have had breast cancer, as well as the directors of the James Graham Brown Cancer Center in Louisville, and the Lucille Parker

Doris Rosenbaum and Arlayne Francis are allies in the fight against breast cancer. Francis, who lives in Richmond, has been chairperson of the last three seminars. The first Woman to Woman Seminar was planned by Rosenbaum and another ally, Rosemary Graves.

Markey Cancer Center at UK.

Rosenbaum was nominated to the committee by the then commissioner of health, Dr. Carlos Hernandez, and serves as committee chairperson. Friedell says that "Doris has been insistent that this is an advisory committee to oversee the expenditure of funds appropriated by the legislature for mammography screening of medical indigent women through health departments. She is tireless in advocating screening utilizing these funds, and plays a major role in the whole process."

Rosenbaum says Kentucky should be proud of the legislation. "I have gone to many national meetings and I don't know of another state that has a cancer advisory committee that can say that every county, every area, in their state has the means to be covered. We are really doing something in the forefront in this health area."

The Thursday Group also has led Rosenbaum, along with Graves, to arrange seminars every 18 months or so geared to educating and supporting women across the state who are cancer survivors. The seminars, Woman to Woman, began in 1986 after the two women decided to hold a luncheon, with guest speakers, for the Thursday Group. Rosenbaum says, "The luncheon kind of grew — we had 250 people show up — all of them women who had had breast cancer — and that was just here in Lexington."

This year will be the fifth Woman to Woman seminar, and the most ambitious to date. On September 25, with the aid of KET, a teleconference will broadcast the featured speakers to 10 sites across the state. The speakers will include Dr. Harold Freeman, past president of the American Cancer Society, now head of surgery at Harlem Hospital in New York City; Dr. John Cronin, a Lexington oncologist; Dr. Elizabeth Amin from Louisville; Dr. Dan Kenady from the UK Hospital; Mrs. Libby Jones, honorary chairperson and wife of Kentucky's Governor, and Kathy Masamitsu, a cancer survivor, and a producer of the "Home Show" on TV. Graves says a session for men will be included in the seminar. "It will be for the spouse, the son, or loved ones of those who have had breast cancer. We have a support system, but I don't think our loved ones have the support they need."

According to Rosenbaum, planners at each of the 10 sites will be responsible for their luncheon and "whatever they want

to do in the afternoon." Arlayne Francis of Richmond is chairperson of the seminar.

Friedell, who has known Rosenbaum for nine years, says that her efforts with other organizations did not stop while she concentrated on the breast cancer screening legislation and the Woman to Woman Seminars. "During all of this time," he says, "Doris has been an active participant in the American Cancer Society and the Reach to Recovery program." She has served as an officer of the UK Hospital Auxiliary, and is now state chairperson of the Kentucky Hospital Auxiliary, "and probably will become the president in a year or two," Friedell adds.

Kathy Carroll, Bluegrass regional coordinator for the Kentucky Cancer Program says, "She's really incredible. She was a radiology technician and did mammograms several years ago. Doris has probably read all of her husband's journals — she's made herself very knowledgeable." Her husband is Dr. Harold Rosenbaum, who recently retired as chairman of the radiology department at UK.

Doris Rosenbaum says, "Years ago, I used to say to him, 'Why in the world, if you're doing mammograms

Doris Rosenbaum has been encouraged in her efforts by radiologist Dr. Jim Simpson, at left, and her husband, Dr. Harold Rosenbaum, recently retired chairperson of the radiology department at UK.

after a woman feels a lump, can't you have her come in before she feels a lump for screening?' But at that time they didn't have the good equipment that we have now."

Rosenbaum worked untold hours for passage of legislation to support screening mammography for all women in Kentucky.

When Dr. Rosenbaum was asked if he is a little surprised by all that his wife has accomplished, his immediate response was, "No, no, no, . . . she's got a lot of ability. I'm not surprised." And when he was told that Friedell had mentioned how supportive he's been of her efforts he hesitated and said, "Well, we buy her breakfast."

When Doris Rosenbaum is asked why she works so hard volunteering she says, "I grew up in Robinson County, in a small communi-

ty on a farm. The 4-H Club was really a basis of a lot of things that we did, that and church and school. The attitude of wanting to help other people was a way of life there. Everybody helped each other. I've always felt indebted to all of the volunteer leaders in 4-H that were willing to spend their time teaching little kids how to do things. It's nice when people give of themselves. It's just the thing to do."

In 1985 radiology residents established a chair in the Department of Diagnostic Radiology at the UK College of Medicine in honor of Doris and Harold Rosenbaum. The first endowed chair at the UK College of Medicine, it is also the first chair in the country where resident physicians were the major contributors.

Rosenbaum also serves on the board of directors of the Florence Crittendon Home, and on the board of trustees at Southern Hills United Methodist Church.

For more information on breast cancer, or any type of cancer, and cancer treatment facilities, please call the Cancer Information Service at 1-800-4-CANCER.

It's a Greek Life

*Kappa Alpha
and Sigma Chi
mark 100
years at UK*

By Kay Johnson

*This was the Sigma
Chi house around
1937. Today the
fraternity is
located on
Woodland
Drive.*

The word went out in the college year of 1892-93 that the anti-fraternity attitude of the faculty at the Kentucky State Agriculture and Mining College was formally abandoned.

At that time attendance at the college exceeded 400 students. There was a large faculty, beautiful grounds and buildings, and a liberal income from the state — an ideal climate for the first two fraternities to establish themselves at what was to become the University of Kentucky.

The college gave welcome to Greek letter organizations and the days of the Kappa Alpha Order and Sigma Chi, now celebrating their centennial year, had come. Kappa Alpha's Knight Commander, and author of the ritual, presented seven young men with a charter on February 23, 1893, launching the Theta Chapter.

A charter member of the chapter, Richard Charles Stoll, was inadvertently responsible for UK's school colors. The story goes that a group of students and faculty were trying to decide on the colors when someone pointed to Stoll's tie and said, "Let's use the blue and white in the tie Dick Stoll is wearing." The rest, as they say, is history.

"The Kappa Alpha Order," says the rush booklet, "was founded on the ideals and principles of the Old South, specifically those upheld by our spiritual founder, Robert E. Lee." Gen. Lee was president of Washington and Lee College in Lexington, Va., where the fraternity was founded in 1865 when four ex-confederate soldiers organized the group.

Old South week, an annual event for over 60 years, pays tribute each spring to Lee with pomp and tradition. Over the years the week has included a march (or sometimes a ride on horseback) to sorority row where KA's serenaded each house and presented roses to the housemothers, the annual Old South Ball where the men of KA, dressed in Confederate uniforms, escort

hoop-skirted ladies, parades with KA's in Confederate regalia with their belles, marching to the Fayette County Courthouse to secede from the state, the Union, and the university for the remainder of the week. The week-long celebration of the fraternity's southern heritage usually ends on Saturday night with the Old South Ball. There also are golf tournaments and jam sessions and other "modern-day" events to celebrate Old South week.

The fraternity brothers had always fired a cannon to start the festivities, but in 1978, then assistant dean of students, T. Lynn Williamson, said experts had found the cannon to be unsafe. "They said it would be highly dangerous to use it any longer."

Today Theta chapter is a diverse group of young men who are involved in all facets of campus life. In 1988, LeRon Ellis, a forward on the Wildcat basketball team, became the first African American to ever pledge the UK chapter. Despite the Old South theme, KA has been integrated nationally since the federal Civil Rights Act of 1964.

Fraternities traditionally choose a charitable organization to support as a national service project, with fundraising drives and activities. These activities have, and do, run the gamut from simple collection boxes to the Kappa Alpha Boxing Tournament held in 1981 when a total of 11 fraternities entered the competition. Because the tournament was for charity, no designated winners were established. Theta chapter supports the Muscular Dystrophy Association.

Sigma Chi can credit Dr. James Kennedy Patterson, president of Kentucky State College, for unknowingly

aiding in their early existence in Lexington. In 1890, he was in the process of wooing the best faculty and students he could find for the Lexington campus. One faculty member that he was able to recruit in 1891 was Professor Frederick Paul Anderson of Purdue University and the Delta Delta chapter of Sigma Chi. Shortly after his arrival, two more Sigma Chi professors joined the faculty ranks — Arthur M. Miller of Beta Chapter at Wooster College and James H. Wells, also a Delta Delta from Purdue. The men came to a campus that did not hold a wel-

coming attitude toward fraternities but they soon changed that condition. With the help of the men of Zeta Zeta chapter at Centre College in Danville, and Lexington businessman Leonard G. Cox, who had graduated from Theta Theta chapter at the University of Michigan, Lambda Lambda chapter of Sigma Chi was chartered on the Lexington campus March 31, 1893.

On the campus where Anderson once taught engineering, an eight-story engineering complex now bears his name, and Miller Hall stands as a monument to the brother who once taught all of his geology classes in a single room.

As a social fraternity, the big event of the year is the annual Sigma Chi Derby, a week-long series of competition between UK sorority pledges. The Derby helps bring pledge classes together and at the same time is a philanthropic project that has raised hundreds of thousands of dollars for charity since it first began in 1930. Sigma Chi now gives its financial support to the Children's Miracle Network.

The week's events vary from year to year. In 1964 the Derby included a balloon toss, an egg throw (coeds

Kappa Alpha's Old South week has been a tradition at UK for more than 60 years. It is during this week-long event that the fraternity pays tribute to its "spiritual founder," Robert E. Lee. The photo above was taken during Old South week in 1963.

threw eggs at an unlucky Sigma Chi pledge acting as a bullseye in a target), a contest for the most outlandishly dressed coed, a mystery event, a pie eating contest and a three-legged race.

Twenty years later, in 1986, the Derby week kick-off was a party at the Bearded Scale bar on Euclid Avenue, a banner making competition, the annual Derby Queen contest, sorority pledge serenading, a Sigma Chi brother slave auction, a fraternity house party where the Greeks were entertained by the group Nervous Melvin and the Mistakes, and a formal dance held at

the Hyatt Regency Hotel. They also earned \$3,500 on T-shirt sales alone.

Both Sigma Chi and Kappa Alpha celebrated the centennial anniversary with their alumni brothers returning to Lexington from all over the United States.

The Lambda Lambda Chapter of Sigma Chi with Paul Jett, president, Mark Rexroat, active alumni chairman, and Henry Durham, alumni coordinator, planned a weekend of celebration this April that included the recognition of Significant Sigs and the induction of two more brothers to that rank: William B. Sturgill '46, and Paul Chellgren '64 (both of whom

happen to be members of the UK Board of Trustees.) Other events included a luncheon at the Boone Faculty Center, a golf outing, a reception at the chapter house, guided tours, a formal dinner and dance, and alumni reunions. The weekend ended with a farewell brunch and symbolic time capsule burial at the fraternity house.

Kappa Alpha's centennial activities, March 26-28, were coordinated by chapter president Jason Roney and recording secretary John Bruser. The celebration began with a toast to Gen. Robert E. Lee at a formal dinner followed by dancing to music with alumni brother Ryan Schneider and his band, Thumper and the Plaid Rabbits. The next day included brunch and the donation of a scholarship to the university, a slide show and history presentation, open house at the Kappa Alpha House, and an evening party and cookout.

Since Phi Beta Kappa, an honorary fraternity, was founded at the College of William and Mary in 1776, the fraternity system has grown to include every state in the U.S. and parts of Canada. Joining a fraternity

has traditionally enhanced a young man's chance of graduating from college. Only 46 percent of non-fraternity men graduate from college while 71 percent of all fraternity men receive a degree. For many years the average fraternity grade point average at UK has exceeded the all-university male GPA.

Kay Johnson '86 is assistant editor of Alumni Publications.

These gentlemen of Sigma Chi were photographed in 1894. In the first row are Thomas Roland Dean '96, Houston, John W. Willmott '95, Madison Boyd Jones, Hilary Roberts, and John W. Woods. Did you know . . .

- all except three U.S. Presidents since 1825 have been fraternity men?
- 85% of the U.S. Supreme Court Justices since 1910 have been fraternity members?
- studies show that 75% of our congress, 85% of the Fortune 500 executives, and 70% of the men listed in *Who's Who in America* are fraternity men?
- a U.S. Government study shows that 71% of all fraternity men continue on to graduation, while only 46% of non-fraternity men graduate?
- a U.S. Office of Education report shows less than 2% of the average college man's expenses go for fraternity dues?
- in the past six years, more than 100 universities and colleges opened their doors for the first time to fraternities?
- two-thirds of Presidential Cabinet members since 1900 have been members of Greek letter social organizations?
- today, 65 fraternities, with 6,000 chapters on more than 805 campuses in the U.S. and Canada, include 400,000 undergraduates and a total living membership of 4.5 million people?

BY LOUISE GODSHALL

ARE KENTUCKY CHILDREN "CATCHING" MORE CAVITIES?

According to the 1987 Kentucky Oral Health Survey — the most recent information on the status of Kentuckians' oral health — children ages five to 17 are much less likely to be without cavities than are children nationally. In addition, Kentucky children have approximately the same level of tooth decay as was found nationally in 1979-80.

This higher than average dental disease rate can be partially attributed to conditions in Kentucky's Appalachian region. Poor nutrition and dental hygiene habits, along with a lack of generalized fluoridation in rural water supplies, means more cavities for children in this region.

But are our children actually "catching" cavities like they would a common cold? Well, yes and no. You can "catch" a cavity from yourself, but it is difficult to "catch" a cavity from someone else.

"Many people don't realize dental caries is an infectious disease," explains Dr. David Nash, dean and 1968 graduate of the UK College of Dentistry. "Poor dental hygiene allows bacteria to develop in the mouth which can cause a cavity. If oral health doesn't improve, these bacteria will multiply and travel to other teeth causing more cavities. Dental caries can be communicated to another through multiple exposures to a person with a high concentration of this bacteria in the oral cavity."

Research shows that early intervention plays an important role in the development of good oral health. If children can maintain a cavity-free status during their first years, the possibility of decay later is reduced. Through early intervention, education and special patient care programs, the UK College of Dentistry is making progress in improving the oral health of Kentucky's children. Specifically, the college tries to reach children who require special care or are not eligible for Medicare/Medicaid assistance, but their parents still cannot afford dental treatment.

DENTAL CARE ON THE ROAD

Since 1967, the UK College of Dentistry has provided dental care in the rural counties of Eastern Kentucky. In October 1990, the college acquired the Mobile Dental Facility to provide care to more Kentucky children. The facility, a self-contained, three-chair, 40-foot van, primarily serves children in kindergarten through third grade. The service is accessed upon request of a community and with support of the local dentists.

A team of UK dental residents and student dentists led by Dr. Angela Templeton, a 1992 graduate of UK's pediatric postdoctoral program, provides dental care four days a week.

"The purpose is to treat kids with no other means of treatment," says Templeton. "Some of the children have never had the opportunity to go to a dentist and have never had anybody look in their mouths."

Almost 600 children were treated last year and more than 600 children have already been treated during the 1992-93 school year. To date, the van has traveled to Bath, Breathitt, Fayette, Floyd, Garrard, Lee, Lincoln, and Scott counties and is negotiating to visit Clay, Montgomery and Powell counties. Last fall the UK College of Dentistry received a \$140,000 grant from the Appalachian Regional Commission to expand the dental van service to 3,000 children living in poverty in 12 Kentucky counties.

IMPROVING ORAL HEALTH THROUGH EDUCATION

Education plays a vital part in improving our children's oral health. One of the college's most popular educators is the Tooth Fairy, also known as Lois Brown, who has 14 years of experience in the dental profession. In 1978, Brown participated in a special two-year program at the UK College of Dentistry sponsored by Kellogg. The purpose of the project was to better train and expand the duties of dental assistants.

Brown, often appearing as the Tooth Fairy when addressing younger audiences, teaches good oral health practices and provides children with toothbrushes and floss. As the oral health educator for the college's public and professional service program, she delivers presentations to more than 10,000 people of all age groups in Eastern and Central Kentucky each year.

Recently the college joined forces with Richie Farmer, a former UK bas-

DENTAL SCHOOL WORKS MAGIC

ketball player and Kentucky native, to promote oral health in schools and communities throughout the state.

"This statewide project, sponsored by Delta Dental in conjunction with Kentucky Jaycees, was developed out of the Kentucky Oral Health Consortium," says Brown, who is a member of the consortium's board of directors. As coordinator of the project, Brown assists Farmer with his presentations and is on hand to answer any questions the audience may have. "We have reached thousands of Kentuckians through these presentations. It has been an excellent way to focus Kentucky's attention on the importance of oral health."

Brown also has helped the college develop its Oral Health Audiovisual Lending Library. Information, available on videotape or slides, is free to educators, dental professionals and civic groups who want to make oral health education presentations. In addition, the college has developed the Oral Health Information Service, a toll-free number (1-800-28-UKDMD) for Kentuckians who have questions about oral health care. Hundreds of calls are received each year through this valuable information network.

SPECIAL CARE FOR SPECIAL CHILDREN

In 1974 the UK College of Dentistry was one of only 11 schools selected to share in a \$4.7 million grant from the Robert Wood

THE MOBILE DENTAL FACILITY PROVIDES DENTAL CARE TO CHILDREN IN THE RURAL COUNTIES OF EASTERN KENTUCKY. MORE THAN 600 CHILDREN WERE TREATED DURING THE 1992-93 SCHOOL YEAR.

PHOTO AT LEFT:

TERESA STATON, A PATIENT AT THE UK CHANDLER MEDICAL CENTER SINCE SHE WAS A YOUNG GIRL, HAS A RARE GENETIC DISORDER WHICH HAS CAUSED AN ABSENCE OF FACIAL FAT, ATROPHY OF HER FACIAL MUSCLES AND CROWDED TEETH. REFERRED BY UK'S PEDIATRIC DEPARTMENT, TERESA RECEIVES SPECIAL DENTAL CARE FROM DR. GERALD FERRETTI (LEFT), PROFESSOR OF PEDIATRIC DENTISTRY, UK COLLEGE OF DENTISTRY.

PHOTO AT RIGHT:

THE TOOTH FAIRY, ALSO KNOWN AS LOIS BROWN, DELIVERS ORAL HEALTH EDUCATION PRESENTATIONS TO MORE THAN 10,000 PEOPLE OF ALL AGE GROUPS IN EASTERN AND CENTRAL KENTUCKY. HERE SHE IS VISITING AN ELEMENTARY SCHOOL CLASSROOM.

Johnson Foundation to develop a training program to teach the management of adult and pediatric handicapped patients. This special patient care program serves medically compromised, and mentally and physically handicapped patients referred from the University of Kentucky Hospital, health and social service agencies, as well as private practices in Central and Eastern Kentucky.

In the UK Pediatric Dental Clinic, residents and faculty care for several thousand children and about half of these children are medically compromised or handicapped.

"These special patients require aggressive preventative treatment," says Dr. Gerald Ferretti director of the clinic and professor of pediatric dentistry. "Infections in heart disease and cancer patients can be life threatening." Other seriously ill children may require sedation or general anesthesia according to Ferretti. "Many

dentists in the state count on our support or recommendations in treating these children."

Dr. Carolyn Moody, a 1983 graduate of the college's D.M.D. program and 1985 graduate of UK's pediatric residency program, practices in Danville. "Being a graduate of the college's pediatric residency program, I'm able to treat many handicapped children," says Moody. "I even receive referrals from area dentists who aren't able to treat these children in their offices." Occasionally Moody does refer patients to UK who are multiply handicapped and require extensive restorative treatment in an operating room setting.

"It's nice to know my patients can receive the best dental treatment possible and multidisciplinary care when needed," Moody says. "I'm also kept informed of my patient's treatment at UK which is helpful when I see that patient again."

The UK College of Dentistry also has a similar special patient care program in Louisville. In July 1989, the college assumed operational responsibilities for pediatric dental services at Kosair Children's Hospital. Dr. Jenny Ison, a 1984 graduate of the college and full-time UK faculty member, receives referrals from Kosair, University of Louisville, and Southern Indiana and Western Kentucky private practitioners. With the support of UK dental residents, Ison treats more than 1,000 children each year at Kosair.

"Service to the citizens of the Commonwealth and to the dental profession is one of the highest priorities at the University College of Dentistry," says Dr. Gene Lewis, program head of the college's public and professional services. "Our faculty, staff and students are committed to reaching out to the public to improve their oral health. In addition to producing dental manpower, the college works to improve access to patient care services, promote dental health education, conduct research, and provide clinical and educational support services to the profession."

Are Kentucky children "catching" more cavities? Not if the UK College of Dentistry can help it.

Louise Godshall '87 is a senior information specialist in the office of public affairs at the Chandler Medical Center.

OTHER UK COLLEGE OF DENTISTRY OUTREACH PROGRAMS

• **Cleft Palate Clinic** — Funded by the Kentucky Commission for Handicapped Children: College of Dentistry and Medicine faculty provide care at one of the largest cleft palate clinics in the state. Cleft palate children require extensive and expensive dental care and often oral surgery. Twice a month, a UK plastic surgeon, oral surgeon, pediatric dentist and orthodontist provide care to qualifying patients (from infants to age 21).

• **Saturday Morning Clinic** — Sponsored by the UK Chapter of the American Student Dental Association: this clinic allows student dentists to offer complimentary care to children from depressed areas of Central and Eastern Kentucky.

Through the cooperation of church and civic groups, and under the supervision of faculty members who donate their time, students provide dental care and emphasize the need for proper dental hygiene and good nutritional habits to youngsters throughout the area.

• **Pediatric Block Program** — For 13 years, free dental care has also been provided to Fayette County children through the college's Pediatric Block Program. Based on economic need, Fayette County schools select 64 children each year to receive care at UK. Each child is matched with a student dentist, and on the average, a child will visit the college six times during a semester.

• **Lexington-Fayette County Family**

• **Care Center** — This program is part of the UK Chandler Medical Center's effort with community service agencies to provide multidisciplinary health care services to high-risk families. Due to socio-economic reasons, these children have a higher incidence of dental disease. Two days a week UK dental residents provide routine dental care, preventative treatment and oral health education.

• **Botts Elementary School Clinic** — For 10 years, the college has staffed and operated a clinic at Botts Elementary in Menifee County. Six student dentists, supervised by Dr. John Mink, professor and section leader of pediatric dentistry, provide routine dental care one day a week at the school.

Before 1950

E. John Lewis '32 taught music at Texas Christian University, and also at Texas SCW in Denton. He was band director at UK from 1933 to 1940, and conductor of the University of California-Berkeley opera theater orchestra for 17 years during his career.

Fannie H. Miller '35, '37 is the first recipient of the College of Education's newly-established Distinguished Emeritus Faculty Award. The award, instituted by the college's development council, honors former faculty members who have made outstanding contributions to the college, the university, and the education profession. The award was presented at the college's commencement exercises last May. Also, a group of University High School and College of Education graduates who were students of Miller are raising funds in her honor to benefit the Buddy Program in the College of Education. The program pairs a UK student with an inner city, elementary student who is likely to fail or drop out of school. Miller, who taught at the University School, and in the UK College of Education for 40 years, retired in 1979. In 1980 UK awarded her the Algernon Sydney Sullivan Award as an outstanding citizen of the commonwealth.

Peter W. Kurachek '38, '40 has been nominated to the Westchester County (N.Y.) Hall of Fame for the contributions he has made to Westchester County through his profession in health education, athletics and recreation. In 1979 he was the recipient of the Distinguished American Award, awarded by the Westchester County chapter of the National Football Foundation and Hall of Fame for his work and contribution in education as a football coach. At 77 he is still active in football, coaching on a part-time basis at Phillips Exeter Academy, a private school in Exeter, N.H.

Norman A. Chrisman Jr. '45, chairman of the board of CMW, Inc., retired from CMW in February. Chrisman, and **Kenneth V. Miller '55**, founded Chrisman and Miller Architects in 1962. Chrisman served as president of the firm from its incorporation in 1968 to 1992, when he was elected chairman and Miller was elected president. At the same time, the name of the firm was changed from Chrisman, Miller, Woodford, Inc. to CMW, Inc. The corporate headquarters are in Lexington.

1950s

Ralph G. Anderson '50 is a member of the College of Engineering Hall of Distinction, and the 10th recipient of the College of Engineering's Outstanding Alumnus of the Year Award. Anderson is the founder and owner of Belcan Corp., the largest engineering firm in Ohio. Belcan employs more than 3,000 people and has 22 offices nationwide. A native of Mercer County, Anderson remains active with UK, including a position on the College of Engineering alumni board.

Louise Swinford Wieman '50, '64 received the 1992 Kearney Campbell Memorial Award at the Kentucky Counseling Association conference in Louisville. She was recognized for outstanding promotion of guidance and counseling in Kentucky for the past 30 years. She and her husband, Quintin, have two sons, **George '79**, and **Michael '80, '83**.

James A. Eversole '51, emeritus professor at the University of Connecticut where he taught composition and music literature for 22 years, retired in 1989 and moved back to his hometown, Missoula, Mont.

Billy P. Samuel '51 retired the last day of 1992 after almost 42 years with General Electric Company's aircraft engine group near Cincinnati. A big Wildcat fan, he reports that he has held season football tickets since 1952 and seldom misses a game.

William H. Kenton '53 retired January 1 after 34 years with Martin Marietta Corporation in Orlando, Fla. He plans to travel, and to serve as a management consultant to various corporations. He has served his community on the board of directors of the Greater Orlando Deaf Service Center, and as chairperson of the board of directors for Central Florida Youth for Christ.

Elwood Combs '53, of Bell County, along with other Kentucky and Virginia extension agents, has earned the first place Team Achievement Award for Programming from the Kentucky Alpha Kappa chapter of Epsilon Sigma Phi, the national honorary fraternity.

Anna M. Hines '54 is retiring after 30 years of teaching theory and history in the music department at Mars Hill College in North Carolina.

Anna L. Myers '54, '83 retired from the UK cooperative extension service July 1, 1992, after serving Clark, Mason, Kenton and Robertson counties for a total of 22 years. She moved to Lexington from Mt. Olivet in December.

Patrick M. Payne Jr. '59 is owner and president of Spindletop Draperies in Louisville. He named the 22-year-old company after UK's faculty alumni club, Spindletop Hall.

Robert W. Whalin '59 is the director of the U.S. Army Engineer Waterways Experiment Station in Vicksburg, Miss., which was selected as the U.S. Army's Research and Development Organization of the Year for 1992.

1960s

Rosalyn A. Thomas '60 is the vocational supervisor at Westover High School in Albany, Ga.

Sylvia Talmage '64 of the Department of Energy's Oak Ridge National Laboratory has been certified as a diplomat of the American Board of Toxicology, Inc. Talmage joined ORNL's Environmental Sciences Division in 1975, where she served for several years before joining the Health and Safety Research Division. Currently, she assesses the risk to human health and the environment from the release of chemical contaminants.

John E. Kleber '65, '69, professor of history at Morehead State University and editor-in-chief of the *Kentucky Encyclopedia*, was given the Governor's Outstanding Kentuckian Award by Gov. Brereton C. Jones. Kleber was recognized for achievements and meritorious service to the state, specifically for editing the *Kentucky Encyclopedia* for the state's bicentennial celebration.

MaryAnne F. Gaunt '65 is executive director of APPLE Corps Inc. She is responsible for providing leadership and direction for the APPLE Corps program, coordinating staff and volunteers, and managing the budget. She lives in Atlanta, Ga.

Anna Laura Hood Page '65, '67 is a composer/clinician/organist, publishing mainly church music. She lives in Clarksville, Tenn.

Scotty Baesler

Wendell Ford

Mitch McConnell

Harold Rogers

Louise Slaughter

UK Connections in Congress

An astounding 70 percent of House members in the 103rd Congress hold graduate degrees in everything from dentistry to divinity, a roll call survey has found. Not surprisingly, law degrees abound. A total of 189 members, or 43 percent, have graduated from law school. Fifty-one of the 110 freshmen have law degrees; that's 46 percent of the class, compared with 42 percent non-freshmen. Some 93 members of the 103rd Congress hold master's degrees, and 20 of these have MBAs. There are 25 doctors in the House, including two medical doctors, one veterinarian, one dentist, and one optometrist. The freshman class alone has six doctors. Harvard is the school of choice among legislators, the survey found: Some 36 members have Harvard degrees — that's one out of every 12 in Congress. Yale has 20 alumni; Georgetown, 15, and Stanford, 12.

UK graduates in the House include Scotty Baesler '63, '66 (D-KY), Harold Rogers '62, '64 (R-KY), and Louise Slaughter '53 (D-NY). UK is represented in the U.S. Senate by Mitch McConnell '67 (R-KY), and Wendell Ford, who received an honorary doctorate in 1973.

Danny Bon '78 is the director general of policy planning in the Canadian Ministry of Defense, topping a 25-year career in Canadian government.

Willie E. Peale III '78 is president of the Franklin County Bar Association. He is the first African American to head the local bar association.

Stanley T. Berry Jr.* of Frankfort, January 16, 1993. Life member.

Virginia Baiz of Lexington, February 2, 1993.

*Denotes active membership in the UK National Alumni Association at the time of death.

Ah, heroes. Who are they and what elusive quality draws us to them? Those responding to the Faxline Focus questions ran the gamut with opinions about who a hero is, but had similar definitions about what a hero is or should be.

Family members were mentioned and admired most while responding to the question of who our heroes were when growing up. "My dad" was the most frequent response followed by "my mother." Others mentioned were grandparents, Roy Rogers and Dale Evans, Superman, the Lone Ranger, athletes, Joy and George Adamson, and "our presidents."

The answer to whether or not you would like to be a hero ranged from "of course," to "yes, to my children," to "hell, naw!"

Our heroes as adults encompasses an eclectic

mix that includes Mother Theresa, presidents Kennedy, Lincoln and Jefferson, Jesus, Clint Eastwood, Rick Pitino, Colin Powell, Norman Schwartzcoff, dad and mom, friends, and "my husband."

Everyone answering the survey agreed that having heroes while growing up is important to character building. As one respondent said, "We need an inspiration, a role model, an aiming point, even if it's beyond our reach to attain it."

The Faxline Focus regarding the violence to which our children are exposed garnered as many replies from grandparents as it did from parents.

The correct answers to how many murders the average child watches on TV before graduating from elementary school is 8,000, and that same average child wit-

nesses more than 100,000 other assorted acts of violence on TV alone.

Nearly everyone has walked out on a movie because of violence but only one person asked for a refund! And, even though almost everyone has considered writing a letter of protest to an advertiser, movie producer or local movie theater, one-third of our respondents have actually written that letter of protest. No one has kept a log of TV violence, yet every respondent thinks the current level and detailed expression of violence really hurts individuals, as well as the community/society. The answers to whether or not creating make-believe violence makes it harder for children to distinguish the make-believe from reality were almost overwhelmingly yes. Two people did not agree — one said, "Not necessarily. I feel the 'screeners' interpretation and reaction makes the difference." The other remark was, "I doubt it, I'm not certain."

FAXLINE FOCUS

606-258-1063

A recent alumni survey had an item pertaining to alumni trustees. It stated, "One of the responsibilities of the alumni trustees is to represent the views of alumni to university officials. These trustees are most anxious to learn more about alumni opinion... ." The *Kentucky Alumnus* was selected as one of the ways of communicating with the three alumni trustees. In response, your current alumni trustees Kay Shropshire Bell '63 of Georgetown, Marian Moore Sims '72, '76 of Lexington, and Henry R. Wilhoit Jr. '60 of Grayson, are taking advantage of this page in the *Kentucky Alumnus* to find out what you are thinking about UK — what you like, and what you'd like to see changed.

1. In what additional ways can UK help you and/or your community?

2. UK is a diverse institution. What issues or concerns about UK would you like to know more about?

3. How has your experience on the UK campus or at a community college enriched the quality of your life?

4. Other comments that you wish to make ...
