

Summer Welles' League of Nations Will Help Solve Problems Of War

SMOKE RINGS BY RICHARD P. ADAMS

Last Tuesday, July 22, Acting Secretary of State Sumner Welles came out with the nearest thing there has been to a pronouncement of post-war policy by the government of these United States. Mr. Welles looks forward to another league of nations better than the last, which will establish a more lasting peace. A pronouncement of this kind, I think, a very encouraging notion to most of us, who want to have a clearer notion than anyone has been willing to give us so far of just what we are preparing to fight for. That we are preparing to fight is surely clear enough by now.

The league which Mr. Welles hopes to establish is to include three points. First it is to reduce armaments, second, assure an equitable distribution of the world's goods, and third, set up an international apparatus for control of armaments. All these are excellent, indeed necessary conditions for any kind of peace. But that they will in themselves bring about such a peace I cannot believe.

The popular opinion seems to be that wars are caused by armaments. They are not of course, and they can no more be stopped by reduction of armaments than eating could be by a curtailment of the supply of silverware. The causes lie deeper, and the cure must be more penetrating than that.

A nation goes to war, I believe, because its people fear, hate or envy the people of another nation. Causes for the feeling in particular instances may be political, social or economic, but the basic requirement for international war is simply that there be people of different nations. And right there, it seems to me, is the point at which the problem of war ought to be tackled.

That is not to say that Mr. Welles' league of nations would not be a good thing, or even that it would not be worth fighting for. It is a step in the right direction, and it probably would, if this nation backed it to the limit, be effective at least in putting off the next world war. And that in itself would be eminently worthwhile, even though it did fall far short of a final solution. It is too much to expect a complete abolition of war at this time, or even next, people do not change their ways as easily as that. But eventually we will achieve a solution, if only because we must survive. And when we do, it will be partly because men like Mr. Welles have prepared the way.

But war cannot be abolished or even greatly reduced, unless any reasoning has gone a long way astray, until national boundaries have largely or altogether disappeared. As long as governments are completely independent; that is to say, completely irresponsible to anyone but themselves, they cannot and they will not settle their quarrels without sometimes resorting to brute force. The force which that force takes, and the amount and quality of the weapons used are secondary, though not of course altogether unimportant, factors in the problem.

The one thing of which I am most certain is that no amount of Wheeler ballhoo or Lindbergh appeasement of aggressors and dictators is going to contribute one iota to any sort of permanent peace. Lasting peace is not built or maintained by cowards and weaklings but by strong, liberal, courageous men who are willing to fight for the things which make peace possible, and against the things which, if they are not defeated by means of armed force, will make slaves of us all.

Jap War Dogs Growl At America While Russia And Germany Mix It

WHAT'S HAPPENED: BY DR. CHARLES M. KNAFF

Today the Russo-German War is entering upon its sixth week. The official communiques issued from Moscow and Berlin have been in the highest degree contradictory, so high that it has been difficult from day to day to locate on the map the battle fronts or the real scope of the battle. Sunday Moscow asserted that the "blitzkrieg" is a main government followed suit, as did also that of the Dutch East Indies. The report has been one of practically establishing a complete economic blockade of Japan.

Earlier in the week, in expectation of the move into Indo-China, Japanese ships everywhere had been hastily leaving foreign ports for home waters. Frequently they did not wait for months, but were bound for the United States have turned back, fearing detention upon their arrival in our ports.

Saturday, July 26, President Roosevelt by another executive order called into the service of the United States the Philippine army of 150,000 men which has been training under the direction of Gen. Douglas MacArthur (retired), former chief of staff of the United States Army.

Gen. MacArthur has been called back into active service now to command the defense of the Philippines. In recent months heavy reinforcements of regular army units and aircraft are reported to have been sent to the Philippines, Hawaii and our other Pacific islands. For months there has been no information released with respect to United States fleet in the Pacific except to the effect that it was mobilized upon a war footing.

From Singapore and the Malay peninsula, bordering upon Indonesia, there have been reports of the landing of large British reinforcements. All indications are that the whole area of the south Pacific is upon a war footing, and has been so for months. Anticipation of some such move by Japan.

Yet Japan, in response to Axis prodding, has moved toward a showdown in that area. Today's reports of movements are reported on their way to Indo-China and the Manchurian front. War in the Pacific now appears to be imminent.

APPOINTMENTS

(Continued from page one)
Economics: Mrs. Laura Pierson, housemother; Robert Baker, assistant professor of chemistry; Anna Fisher, nurse in women's radiology; Doris Stead, nurse in hygiene and public health; Dr. E. L. Taylor, assistant veterinarian; animal pathology; Dr. H. T. Batt, assistant pathologist; and Dorothy Lewis, assistant pathologist and extension officer.

FELLOWSHIPS

Twenty-six fellowships and scholarships from the Margaret Voorhies Haggin fellowship fund were awarded to the following students: Struthers Grise, Winchester; Julia Nettles, Leo, South Carolina; Delia Candy, Lexington; Willie Wright, Algood, Tennessee; Martha Wood, Newark, Ohio; Louise LeCours, Quimper, France; Fannie Pirkey, Lexington; Hubert Moore, Alto, John Tuttle, Burnside; (Miss) Harold Connelly, Warsaw; Arthur Gullette, Columbia; Phoebe Evans, Chalmers, Ohio; Sam Beckley, Richmond; Martha Cammack, Huntington, W. Va.; John Rommel Jr., Louisville; Nella M. Deal, Hickory, South Carolina; Daniel Ryan, Cleveland Heights, Ohio; Frank Lewis, Goodwell, Ohio; John S. Hannan, Huntington, W. Va.; Hargis Westerfield, Georgetown, Harriet Euser, Wilmington, Delaware; Mabel Thacher, Louisville; and Theodore Rice, Paintsville.

Following the meeting, the members and guests of President and Mrs. Donovan for luncheon at Maxwell Place, the president's home on the campus.

Georgia State college for women recently celebrated its fifth anniversary.

ON THE COLLEGE FRONT: Universities In The News

Early Kentucky Instructors Used Newspapers For Texts

By SELMA GARRETTSON

The smart young teacher who goes out to her first position with her head clock full of ideas about child centered school, the unit plan, the correlated curriculum and other similar methods, is due a big surprise if she thinks they are brand new.

A long, long time ago newspapers were read and discussed in the first class! This is true according to an issue of *The Commonwealth*, a Frankfort newspaper, dated May 28, 1833. The following quotation is taken from the article just mentioned: "Newspapers are now used in this school regularly, extracts from them are occasionally read. Seven weekly papers are taken by the principal of this school alone and the boys in the first class are required to read them attentively to cultivate a taste for information and improve their minds."

Picture the interior of a log school house. The chinks between the logs are mud daubed and the windows are of oiled paper. The front of the room is a large fireplace and a desk mounted on a small platform. Behind this desk sits the master. The pupils are seated on benches made of logs split in half with the top side smoothed off, and are mounted on wooden pegs so high that the feet of the youngest scholars dangle in mid-air. The master's just about to start his daily quiz: "on recent important events. Quoting from this old paper again: "Scholars," he begins, "what is the latest news from Europe?"

"The British Parliament is prorogued."
"Porruged? What does that mean?"
"Adjourned."
"Who did this? Who prorogued the parliament?"
"The King."
"Who is the King of Great Britain?"
"William IV."

BIRTH RATE

CAMBRIDGE, Mass.—Harvard Sociologist Carl C. Zimmerman called upon patriotic Americans last week to have more children.

A speaker at the Harvard Summer School Conference on Tomorrow's Children, Professor Zimmerman asserted that the nation would be hampered in a war era by "a weakened and decadent family," and advocated immediate increase in the birth rate.

"We need to encourage parents to have their third and fourth children right away, and we must encourage young persons to have their first children now so they'll have their third and fourth before they get too old," he declared.

Prospective Teachers Make 1,000 Speeches Every Year

"Do I have to give a three minute speech? Well what will I speak on?" This, according to Hazel Newman, student clinician, assisting Dr. Eugene Hahn in his work as director of the speech clinic at Wayne State Teachers' College is probably the most frequent remark passed off by pre-education students who come to sign up for their College of Education speech test.

"The speech clinic," Miss Newman states, "does not expect the student to be a polished orator. Instead, we look for the student's ability to speak conversationally and to present and combine his ideas in an intelligible manner."

Tenseness which follows his nervousness and excitement often hinders the student in this capacity. Therefore Miss Newman recommends a relaxed and natural attitude for the student taking his test. About 700 new individual 15-minute tests of this type are given each year. Dr. Hahn revealed, approximately 90 per cent of the students tested are found deficient in some aspects of speech. These are put into remedial sections for voice, articulation, liping, and foreign accents.

"Many times the student feels a slight on his age if he is asked to take a speech correction course," Miss Newman declared. "Instead of taking it as a personal matter, he should realize that the speech has to be at a certain standard in order to teach. If he does not attain that level, we try to help him reach it through our courses."

TEST AND RETEST
After the student has completed his correction course, he is given a retest. These bring the yearly total of 15-minute tests up to 1,000, according to Dr. Hahn.

"It must be realized," Miss Newman commented, "that one or two hours a week in a classroom cannot possibly correct a minor speech defect or a foreign accent that the person has had for years. Therefore, the student who attends a remedial class must do conscientious work outside the classroom to gain full merit from his efforts."

Giving his views on the importance of the student, and serving as a good foundation, Dr. Hahn said, "Training the teacher to speak well transmits good speech to the students, and serves one method of raising the general standard. The trained classroom teacher should understand speech defects and the fundamentals of good speech."

Classics Still Hold Importance

Does the grey matter of Joe Colledge, 1941, fail to measure up to that of his great-uncle who took first prize in Latin at good old St. Albans? The problem of whether Greek or Latin are necessary in the modern college curriculum has been awakening country-wide interest in the last few months. Michigan Universities in particular have been active in promoting the classics, by proclaiming Latin and Greek Weeks.

Dr. C. B. Hilberry, chairman of Wayne's English department, is also of the belief that the classical tongues are a necessary part of the university curriculum. "You can't replace the thing the classics can do in Liberal Arts education," stated Dr. Hilberry. "In the end the classics will find more place in the Arts curriculum. A knowledge of them is imperative in order to understand both Greek and Latin as well as modern literature."

What they want, and they want something practical. As a solution to the problem, Dr. Orville Link, instructor in English, offers the theory that Greek and Latin should be considered and taught as living, not dead languages. They are a necessary part of all work in the Humanities, therefore, they should be taught as language, literature, philosophy, and history.

Three classes of students should be found at the feet of the ancients, according to Dr. Link. They are the elementary student who needs a good foundation, the student possessed of intellectual curiosity, and the advanced student doing graduate work in the Humanities.

"It's all a part of the industrial revolution, I suppose," said Dr. O. Flint Purdy, Wayne's Librarian, philosophically. "The world, and the United States in particular, has come to regard anything nonutilitarian as worthless. Yet it is not possible for a Twentieth Century citizen to be perfectly intelligent about his world without knowing something about his root in the past."

Wayne speaks
EVEN, yes, especially in any industrial age and in highly industrial city such as Detroit do Greek and Latin merit greater attention than they now receive," said Herman A. Clark, head of the department at Wayne State Teachers' College in speaking of the decline of interest in the classics.

"Not only so but of the world's great literature but as the source from which all our modern literatures have sprung do Greek and Roman literature deserve our attention," continued Mr. Clark.

Mr. Clark believes that from a strictly practical viewpoint the study of the classics offers the best training for the study of other foreign languages, for a broader knowledge of English, and for a thorough understanding of the terminology of the natural and social sciences, as well as being practically indispensable for the professions of law and medicine.

TRAINS THE MIND
"I believe that people have made a mistake in thinking that vocational education can take the place of education that trains the mind," is the opinion expressed by Miss Helen Bishop, instructor in Latin and Roman literature, deserve our attention."

Incidentally, spelling books may often be the cause of poor spelling among school children, according to Dr. Emmet A. Betts, head of the reading clinic at Pennsylvania State college.

You May Be A Dub On The Courts But You Can Dress Like A Queen

By TONI
Dress to war goes this summer. You'll be more comfortable and play a better game in clothes that were made for the game you play. Even if you rank amateur in the sport, you needn't be an amateur when it comes to choosing clothes to wear while trying out your sportability. Be sure your outfits are styled for action and freedom of movement and match your own physique.

Far removed from yesterday's hardy get-up of the strong-arm type girl athlete, today's sport clothes which successfully combine functionality with flattery, you need no longer look like a potential Amazon to get clothes that are action-built, thanks to designers who understand the requirements of the modern sports outfit. They have answered them in clothes that consider the feminine figure.

Court traditions has made white tight for tennis, so it's little wonder that each season brings on the avalanche of white tennis outfits of varied fabric and fashion. The newest fabric to be packed with the latest this summer is white or ivory shirting. One outfit in this material that lifted from the men's department is a long-sleeved dress inspired by a man's shirt and worn with the man's collar open at the throat. The very short skirt is supplemented with matching panties. White waffle pique is featured in another tennis outfit that boasts a button-on skirt that is divided at the shorts. Pleated white pique is served up as a hit in a culotte-tennis dress that is cut for freedom and flattery; while frothing white sharkskin goes nicely in a dress that has action sleeves and an all-around pleated skirt.

SWIM SUITS
If you're your swimming earnestly you'll appreciate a sleek one-piece suit as a monogrammed smoothie of a new jacket bathos that makes for finger flattery. Its color, a dark foresty green, is new also, as are its fastened seams that fit snugly and flatter. To highlight a summer tan, choose a yellow corded swim suit of cotton and latex that is worked into a beribboned pattern. Prints, too, can be had in suits that are made expressly for cutting the waves. The prettiest of this type comes in a velvety knit material with an all-over pony print on a white background and features the new crushed-shoulder straps.

Archery is another sport that is attracting the feminine population. For it, slacks, shorts, and culottes are most popular. Our bet is a linen-like outfit and two-piece slacks affair that has a

College Head Hopes To Cut Enrollment

Norman, Okla.—Joseph A. Brandt, former newspaperman who becomes president of the University of Oklahoma August 1, has some unorthodox ideas about university administration.

Brandt hopes among other things that the university registration decreases instead of increases. He believes superior instruction will be offered if enrollment drops from 6,500 to about 5,000.

Brandt's resignation as director of the Princeton University Press, Princeton, N. J., becomes effective with the start of his new assignment.

WOULD DISBAND FROSH GRIDDERS Johnson Proposes One-Team Program

MOREHEAD, Ky. — Production of young men into the army has so reduced gridiron material that Coach Ellis Johnson said today he was in favor of eliminating freshman football in Kentucky colleges so that frosh could be used as varsity material.

Johnson, former University of Kentucky four-letter man, said that Morehead would have to play one of its toughest schedules in years with possibly 17 and no more than 20 men on the squad.

Eight of the Eagles regularly already have been taken by the army. Among them are Ralph Mussman Jr., of Newport, who last year was named to the all-around athlete at Morehead; Duane Barnes, an outstanding player who was expected to bolster Eagle power in 1941, and "Jumping Joe" Lantz, chosen last season as an all-K.L.A.C. back.

Another said he did not know how other Kentucky coaches felt about eliminating freshman football, but that "due to the number of men the army has taken from us, we feel that it will be necessary to use freshman material to round out a varsity squad."

Prehistoric Bones Collection Filed By Archeologists

By JUNE DAVIS

If you are interested in studying the metacarpal bones of your last several grandfathers on your mother's side, just ask someone in the Department of Archeology and Anthropology to show them to you. They might not be able to show you the exact skeleton of your ancestor, but they can show you one that looks exactly like his.

The archeology department has been busy cataloging bones of prehistoric people of Kentucky, and placing the bones in numbered boxes. Any student or person interested in this subject need only to look in the filing index, get the number of the specimen he wishes to study, take the numbers to the custodian of the library situated on the top floor of the new Home Economics building, and he will receive any one which belongs in the human bone file to study.

The department has employed several persons on this project. These persons already have classified and indexed more than 800 boxes of bones.

These bones have been brought to the University from all parts of the state. The boxes are inspected and catalogued on the second floor of Pence hall. Then they are packed back in their boxes, and hauled over to the Home Ec building which will be their permanent resting place.

Inscription in the lobby of the Mills college music building reads: "Such as the music is, such are the people of the commonwealth."

Rolling Mill Holds Spotlight As Eastern Kentucky Industry

—TELLING KENTUCKIANS ABOUT KENTUCKY—

Here is an airplane view of the present plant of the American Rolling Mill located on the banks of the Ohio river, west of Ashland. A new \$2,000,000 blast furnace is under construction.

By RAY HATCHER

Ashland's billion dollar industry, the American Rolling Mill Company plant, has launched an \$8,000,000 construction program that will surpass everything in its continuous stream of improvements since its location here in 1920.

Already one of the finest steel plants in the nation, \$3,000,000 worth of reconstruction will condition the local industry to handle the production of a giant blast furnace, monstrous enough to turn out hundreds of tons of pig iron daily for use in not only the local plant but in other steel industries of the nation.

The huge furnace will be a new industry in itself, a place of employment for over one hundred men, a direct market for more than 125 car loads of Great Lakes ore daily, towering 200 feet, this new industry will also stand out as a sentinel of Ashland Armo's continual progress.

All Eastern Kentucky recently rallied the American Rolling Mill Company in its new undertaking at a colorful "ground-breaking" ceremony.

All Eastern Kentucky is aware of the vastness and the great worth of the industry which Armo has.

The American Rolling Mill Company purchased the Ashland Iron and Mining Company's holdings of furnaces and property in 1922 and spent millions of dollars in founding the nation's number one continuous rolling mill. The West Ashland works underwent extensive reconstruction, Ashland immediately.

Several thousands more men were called upon to take their places in the hundreds of various industrial and clerical occupations created by the new plant. Ashland's population jumped nearly 100 per cent in the span of ten years, from 14,729 in 1920 to 29,074 in 1930.

Along with the industrial growth, the city's civic and professional fields expanded immensely and Ashland found its place among Kentucky's leading cities.

When Armo established one of its finer operations in Ashland nearly two decades ago, many men of outstanding achievements in the steel industry were transferred here from other plants.

They brought with them two distinct qualities that have been upheld in high accord through years past, and very probably for years to come. These principles are (1) a united spirit of cooperation between plant officials and plant employees and (2) a program of safety for the welfare of both workmen and the plant.

The maintenance of both of these standards in the local plant has been unparalleled by any other steel producing plant of its size. The Ashland plant for a number of years has held the "iron man" trophy which is awarded annually to the department having the outstanding safety record of the year in any one of Armo's five operating plants. The trophy is now in the possession of the processing department of the Ashland plant.

Among the outstanding improvements Armo has made at the Ashland plant are listed the following: Contrasted the bar and jobbing mill and the first successful three-high continuous mill in 1922; installed annealing furnaces; built the No. 1 sheet mill in 1924 and the No. 2 sheet mill in 1927; constructed warehouse buildings; increased the number of open beach furnaces

from 6 to 8; purchased new charging, soaking pit and mill cranes; installed two three-high hot reducing mills; built new normalizing and pickling unit; enlarged the sheet mill; enlarged the processing, shipping and jobbing mill warehouse buildings; and built six main locker room buildings and as many refrigerating plants for cooling drinking water.

The additions and improvements have made it possible for the local plant to produce any type of rolled sheet.

Outstanding among the inter-plant organizations is the Ashland Armo Employees Association, that was founded in 1923 to afford relief to any member who may, through sickness or injury, be rendered incapable of performing his duty, and also to promote the general welfare of its members and to maintain close relationship between employees of the various departments. Although not compulsory, all Armo employees are association members.

In addition to personal service to its members, the association is directly responsible for the many social and recreational features which are not only enjoyed by Armo employees but by the entirety of Eastern Kentucky, Southern Ohio and nearby West Virginia. A complete list of activities sponsored by the association since its founding would be too lengthy to list, but among them may be mentioned the Armo baseball and football teams of the late twenties and early thirties. Armo field has served the community as a site for not only football and baseball but also for track meets, boxing events, softball and other activities. It is now the home field for the Ashland Colonels, a Class D team of the Mountain States professional league.

Popular among Eastern Kentucky sportsmen are the Armo skeet and trap shooting fields.

These and hundreds of other Armo features, both industrially and socially, are obvious reasons why Ashland enjoys the most complete of entertainment and economic blessings of the steel industry.

Browning Wrote A Poem About Mozart's Quartet

By R. D. McINTYRE

MOZART—Quartet No. 18 in D Minor (K 421) played by the Budapest String Quartet (Columbia M-462, \$2.50).

This is the second of six quartets composed by Mozart between 1782 and 1786 and dedicated to Haydn. It is the only one written in the minor key. The others of the series are energetic and buoyant, but the D-minor quartet reveals in its variety of keys and persistent enthusiasm a Mozart who was not all sweetness and light. Robert Browning wrote of this music as follows:

And music, what? that burst of pillar'd cloud by day And pillar'd fire by night, was product, must we say Of modulating just by harmonic change.

The augmented sixth resolved . . .

The work is played with fine tone and sensitive interpretation by the Budapest String Quartet. Their playing of the beautiful second movement is particularly noteworthy. The set is well recorded and deserves recommendation.

BRAMMS—Academic Festival Overture, op. 80, played by the Philharmonic Symphony Orchestra of Boston, John Barabaro, Conductor. (Columbia X-286, \$2.50).

This overture was written by Brahms in acknowledgement of an honorary degree of doctor of philosophy conferred upon him by the University of Breslau in 1879. Its thematic material is derived from students' songs popular at the time, including the "Gaudemus Igitur," which is still popular with college glee clubs. It is gay and lively throughout and it won immediate popularity as a concert overture.

The additions and improvements have made it possible for the local plant to produce any type of rolled sheet.

Outstanding among the inter-plant organizations is the Ashland Armo Employees Association, that was founded in 1923 to afford relief to any member who may, through sickness or injury, be rendered incapable of performing his duty, and also to promote the general welfare of its members and to maintain close relationship between employees of the various departments. Although not compulsory, all Armo employees are association members.

In addition to personal service to its members, the association is directly responsible for the many social and recreational features which are not only enjoyed by Armo employees but by the entirety of Eastern Kentucky, Southern Ohio and nearby West Virginia. A complete list of activities sponsored by the association since its founding would be too lengthy to list, but among them may be mentioned the Armo baseball and football teams of the late twenties and early thirties. Armo field has served the community as a site for not only football and baseball but also for track meets, boxing events, softball and other activities. It is now the home field for the Ashland Colonels, a Class D team of the Mountain States professional league.

Popular among Eastern Kentucky sportsmen are the Armo skeet and trap shooting fields.

These and hundreds of other Armo features, both industrially and socially, are obvious reasons why Ashland enjoys the most complete of entertainment and economic blessings of the steel industry.

On the fourth side, Mr. Barabaro achieves better results with his transcription for orchestra of Brahms' "Sheep May Safely Graze."

Miscellaneous Single Discs

BACH—Fugue and Page in D Minor played by E. Power Biggs on the Baroque organ in the German Museum, Southern Ohio University. (Victor 19858).

This is a splendid recording of the familiar D-minor Toccata and Fugue brilliantly performed by Mr.

Former UK Star To Coach Squad

CORBIN, Ky.—Stanley Little Clug, Glasgow, former University of Kentucky basketball player, has accepted the basketball coaching at Woodbine high school.

He is a former Corbin high school star and a brother of Marston Clug, six-foot eight-inch center who also played at Kentucky.

Woodbine high is about two miles south of here.

CAA Meetings

Students in the University CAA classes will begin meeting in Barker hall Friday at 7 p.m. for instruction in general servicing and inspection of aircraft. Col. Howard Donnelly, CAA administrator, announced yesterday. The classes to be taught by Prof. C. H. Zimmerman will be continued on August 8 and 15.

Teach Blackout Typing

CAMP FORREST, Tenn.—Soldiers training at Camp Forrest to do the army's paper work as stenographers have one odd test to take. They must learn to do blackout typing—and they learn by typing from a dictaphone in a completely darkened room.

"Colonel" of the Week

Dr. Jesse E. Adams

We didn't have a picture of him, but just the same, this week's colonel goes to Dr. Jesse E. Adams, director of the summer session.

In addition to his duties as head of the summer term, Dr. Adams serves the University as professor of education.

In the past eight years, with Dr. Adams at its head, the summer session has increased in size 46 percent, while the average for 30 other universities is 13 percent.

In recognition of these and other achievements, we invite you to come in and enjoy any two of our dinners.

Former UK Star Gets Madison Post

Garland Lewis, former basketball star and graduate of the University, has been elected basketball coach and social science and physical education instructor at Madison high school by the Richmond Board of Education.

Lewis, who graduated from Jefferson, Ind. high school where he starred in basketball and football, will succeed his former teammate, Ralph Carlisle, who has been named basketball coach at Kavanaugh high school at Lawrenceburg.

Lewis has held coaching positions in Martin, Ky., and Bardonia, Ind. During his coaching career his basketball teams have won 69 games while losing 29.

The average person's idea of freedom of speech is freedom to tell the other fellow where to head in.

Nothing is certain these days but uncertainty—and, ding-bust it, you can't depend on that.

For The Defense Of America

The torch of Liberty burns with a brighter light against the blacker background of today's events. Liberty, to us in America, becomes a more precious heritage with each passing day. The vital problem in the hearts of every American is the defense of our liberty.

Our democratic government will always be the greatest safeguard of our precious liberty. As long as that government is composed of good, honest, capable American citizens our democracy is secure.

It is the duty of every American to make certain that the officials of their government are that type of Americans . . . Not just the officials of the national administration or the state government but also the officials of the government that reaches closest to the people themselves . . . county government.

The following men are candidates for posts in your county government. They sponsor this page in the hope that you, the voting public, will judge upon their particular qualifications and then place the best man in the office . . . for the defense of America.

J. Porter Land

Judge W. E. Nichols

Powell Bosworth, Candidate for Sheriff
(The Man Who Is Not Afraid of Political Machines)

Eugene B. Gorham, Candidate for County Commissioner

Dudley B. Veal, Candidate for Jailer

D. C. Cruise, Candidate for County Commissioner

Ernest Thompson, Candidate for Jailer

Dudley Burke, Candidate for County Commissioner
