Introduction 5
Table 1 - Summary of inspection of agricultural seeds sampled 1968-72 6
Table 2 - Agricultural seeds mislabeled in 1972 33

This bulletin compiled and prepared by T. Wayne Still,
Glenda Back, Nancy Combs, and Dewey Coffey.
Analytical data by Laboratory Staff

INTRODUCTION

This bulletin contains the results of analyses and tests of official seed samples collected by seed inspectors of this Division during the period 1968-72.

Table 1 is a summary of the inspection of agricultural seeds during the period 1968-72. It includes the number of samples taken by seedsman and by year, and the number of these which were found to be mislabeled.

Table 2 is a listing of all samples (lots) found to be mislabeled. In this bulletin, samples (lots) are mislabeled when: (1) the difference between the "labeled" and "found" is greater than the tolerance permitted in the Rules for Testing Seeds of the Association of Official Seed Analysts, (2) the label (tag) does not contain information required by the Kentucky Seed Law and Regulations, and (3) the seed is not labeled. The rate of occurrence of noxious weed-seed, when listed, is expressed in number per ounce.

Not included in this bulletin are mislabeled seed lots which were placed under a "stop sale" by the field staff due to expired germination test date, unless the seed was sampled and found mislabeled for other reasons.
