

Lexington June 6, 1887

President Jas. K. Patterson

During the past year the following Branches have been pursued under my direction and with the exception of Phys. Geography (and Botany the last Month of the Session now closing) ~~in my~~ in ^{my} own classes.

Physical Geography. Number of Students 9.

Botany " " " 10

Anatomy & Physiology " " " 7

Drawing " " " 10

Theoretical & Prac. Mech. " " " 3

Zoology " " " 3

Microscopy " " " 3

Geology " " " 3

Physical Geography was taught by Assistant. A. M. Peto in a very satisfactory manner as also Botany a part of the ^{past} session. I have also recd from him very efficient aid in experiments and the making of apparatus for illustration before classes

Scholarship record has in general been up to a good average. In Chem & Phys (the hour being 8 & 9.) the severity of the ~~examinations~~ ^{examinations} interfered considerably with the punctuality and consequently reduced the standing below that of last year.

In Zoology and Geology the work has been satisfactory considering the absence of illustrative material
