UNIVERSITY OF KENTUCKY

## **FOREWORD**

This Number of the Bulletin is prepared annually by the Bureau of Instruction in the State Department of Education. The purpose of this publication is to give pertinent information regarding the public and private high schools of the state.

In Kentucky, both public and private high schools are accredited annually by the State Board of Education. The official accredited rating of each high school is set forth in this Bulletin. The official rating given each high school by the State Board of Education is made on recommendation of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools.

It is hoped that superintendents and principals will study the material found in this publication.

**WENDELL P. BUTLER**  
Superintendent of Public Instruction

## KENTUCKY HIGH SCHOOLS—1953-54

**Schools and Types of Organizations.** There are 582 public and private high schools in Kentucky. Last year, the number was 594. Of the 582 high schools now operating, 539 are complete organizations in that they offer work through the twelfth grade. The remaining 43 high schools, because they do not offer work through the twelfth grade, are approved as incomplete feeder schools. Of the 43 incomplete high schools, 36 are separate junior high schools organized as one distinct unit offering work exclusively in grades seven, eight, and nine. The remaining seven high schools are incomplete organizations that offer work only through the tenth or eleventh grades.

Of the 539 complete high schools, 311 are operated by county boards of education while 150 are maintained by boards of education in independent school districts. The remaining complete organizations are either private secondary schools or schools that are operated by the state in connection with institutions that are maintained entirely by the state.

This year, the six-year high schools (grades 7 to 12) number 236, last year they numbered 248. This year, the traditional four-year high schools (grades 9-12) number 258, last year, they numbered 261. The remaining 45 complete high school organizations represent modifications of the six-year and the traditional four-year plans.

The following table presents data regarding the various types of high school organizations to be found in the state.

**TABLE I**  
**TYPES OF HIGH SCHOOL ORGANIZATIONS AND NUMBER OF EACH**

Types of Organizations	County Districts	Independent Districts	Private Schools	State or Regional	Total
Grades 7-12 .....	148	75	8	5	236
Grades 9-12 .....	145	58	53	2	258
Grades 8-12 .....	15	9	9	0	33
Grades 10-12 .....	3	8	1	0	12
Grades thru 11 .....	1	0	0	0	1
Grades thru 10 .....	5	0	1	0	6
Grades thru 9 .....	15	20	1	0	36
Totals .....	332	170	73	7	582

The above table not only shows the number of different types of high schools that are found in the state, but it also indicates the number of such schools that operate under different types of control.

**Information Concerning High School Development.** For a number of years the Division of Supervision has carried three tables in this bulletin showing the development of high school education in Kentucky. This information has proved helpful to students of Kentucky education.

Table IV shows that there was a continuous growth in the number of high schools from 1915 to 1935. In 1935 there were 848 public and private high schools in the state. This represents the largest number of high schools that the state has ever had. Now that we have 582 high schools, public and private, it is clear that there has been a decrease in the number of high schools of 266 since 1935. This decrease has come about very largely through small high school organizations being merged into larger school centers.

1953-54	131,234	11,535	13,713	156,482

\* Beginning with the school-year 1932-33, the enrollment of the seventh and eighth grades of six-year high schools and of junior high schools are included.

Table V presents an interesting picture in total high school enrollments in different types of high schools (public white, public colored, and private) since 1915. High school enrollments increased rapidly until around 1941, then enrollments began to decrease on account of the second World War. The lowest total high school enrollment was for the school-year 1943-44. Today, the total high school enrollment is 156,482. This enrollment includes seventh and eighth

grade enrollments in schools that incorporate these grades in their organizations. There are 119,859 enrolled in grades 9-12. The total high school enrollment for the current school year is 2,953 more than the total enrollment last year.

WELVE,

Table VI shows the situation as regards the number of accredited high schools by years since 1910. When we use the expression "accredited high school," we think of an organization that offers a program of work through the twelfth grade. High schools that do not give work through the twelfth grade should be looked upon as incomplete feeder schools for the regularly organized, complete high schools of the district.

The State Board of Education is authorized by law to prescribe rules and regulations for the accrediting of high schools. At the April 11, 1952 meeting of the State Board of Education the following regulations pertaining to enrollment and number of teachers employed were adopted:

1. Four-year high schools (grades 9-12) and three-year senior high schools (grades 10-12) shall employ at least five full-time teachers and have a bona fide enrollment of at least 100 pupils.
2. Six-year high schools (grades 7-12) shall employ at least seven full-time teachers and have a bona fide enrollment of at least 150 pupils, 100 of whom shall be enrolled in grades 9, 10, 11, and 12.
3. The provisions of standards (1) and (2) shall not go into effect until the beginning of the school year 1954-55. Public high schools for white pupils that do not meet these standards at that time may be accredited annually on an emergency basis provided conditions causing the emergency are established by the local school authorities and are acceptable to the Superintendent of Public Instruction and the State Board of Education.
4. Any high school not meeting standards (1) and (2) that provides a curriculum through the twelfth grade and serves an area of one or more entire counties and is the only high school serving its race in that area, may be fully accredited providing all other requirements are met.
5. Private secondary schools with an enrollment of fewer than 60 pupils shall employ at least three full-time teachers. If the enrollment is between 60 and 99 the schools shall employ teachers at the ratio of one for each 20 pupils or major fraction thereof. Schools with an enrollment of over 100 shall observe the same teacher-pupil ratio as that provided in standards (1) and (2).

The high schools in Kentucky are accredited by the State Board of Education. This applies to both public and private high schools. The official rating given each school by the State Board of Education is made as a result of the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and

Secondary Schools. The members of the Commission meet with the supervisors in the Bureau of Instruction and canvass the annual high school reports that are made to the State Department of Education and also the written reports that are made of inspections by the supervisors. The State Board of Education may accept or reject the recommendations of the Commission on Secondary Schools of the Kentucky Association of Colleges and Secondary Schools or may modify these recommendations. Usually, the State Board of Education follows the recommendations of the Commission.

Accreditation of high schools is primarily a means to an end. This end is that of stimulating growth and improvement in the schools. Originally, accreditation of high schools came about as a result of the need of institutions of higher learning for some satisfactory basis for admission to college. In recent years, however, as a result of increasing numbers of young people continuing through elementary school into high school, the emphasis upon accreditation as a basis for college admission has been shifted to that of better education for all youth. The rapidly changing social, industrial, and economic world and the marked increase in high school enrollment is challenging the schools to provide for a diversity of needs and capacities.

To better provide for these needs and capacities, a broader and more varied high school program is demanded. High schools should not only assist some pupils for work in higher institutions, but they should also assist a larger proportion of the pupils to prepare for entering directly into business, industry, agriculture, and home-making. It is at once apparent that small high schools cannot possibly offer an enriched program to meet the needs and capacities of all high school pupils unless it is done at excessive cost, hence the justification of requiring increased enrollment for accreditation of high schools.

\* Interpretation of High School Ratings:

- A—Accredited through the entire high school course (through grade twelve).
- B—Accredited through the entire high school course (through grade twelve).
- 11 Gr.—Accredited through grade eleven.
- 10 Gr.—Accredited through grade ten.
- 9 Gr.—Junior high school—recognized through grade nine.
- T—This initial when attached to the designation of any rating indicates that such rating is given in the face of some deficiency and that the accredited rating of the school should be terminated at the close of this school year.
- E—This initial suggests that an emergency is recognized to exist that may justify the operation of the school even with an observed shortage in the number of pupils or of teachers.
- U—Unaccredited.
