The following communication signed "True Policy," was presented to us by a respectable gentleman and one of our patrons, and it is due to the source from whence it came, that we should give it a place in our columns. If such an evil exists, as he complains of, it is but right that he, and those in whose cause he has taken up his pen, should have a hearing, and if their position be supported by truth and reason, that the remedy should be applied. To a calm and profitable discussion on this subject, our columns will be open.
