

B-10-3045

March 1, 1913.

Mr. Harry E. Dwing,

Jennings, W. Va.

Dear Sir & friend:

There will be an opening here as Chief Engineer soon and I would be glad to have you talk over the proposition with our superintendent, Mr. F. E. Dunbar, and wish you would wire us making date for conference on receipt of this letter if you are interested, in any case wire us yes or no.

We have by far the nicest mining proposition here I have ever seen anywhere; coal about six feet high and sandstone roof, and general conditions excellent; excellent people, double daily train service. It is a very pleasant place to live and a uniform output as it is a coking plant.

If you are interested, it would be well for you to wire Mr. F. E. Dunbar immediately on receipt of this letter so that you may have the first chance at the job and also make some arrangements to come over and look the place over.

Yours very truly,

WISCOONIN STEEL COMPANY

Safety Inspector
