Gas mask sales rise in Lexington

By DALE GREER

Fearing that chemical warfare may strike close to home, Cen-tral Kentuckians are buying gas masks almost as fast as they can be stocked, the owner of a Lex-ington army surplus store said last week. Wolfeane Born, owner of

mask for \$59.00 and 0.5. gas mask for \$50.00 Born said he thought many of his customers were buying the masks to prepare for a possible terrorist bombing of the Lexington Blue Grass Army depot in Richmond. Nerve and mustard gas agents are stored at the depot, which is 22 miles from Lexington.

Nancy Guy, a spokeswoman for the depot, declined to speculate on the possibility of a terrorist strike at the facility but added

masks almost as fast as they can be stocked, the owner of a Lexington army surplus store said last week.

Wolfgang Born, owner of Stuff Genuine Military Surplus, said he has received more than 500 phone calls about the masks ince he Persain Gulf war erupte of Jan. 16.

Born said he doesn't know how many masks he has sold since Allied forces bombed Iraq, but he said, "there's been quite an increase in sales."

A new shipment of 100 masks was delivered to the Loudon Avenue store last week to replace Born's dwinding supply, and be said he expected to sell the new masks quickly-495 and a U.S. smask for \$50.

The store sells an Israeli gas mask for \$50.

Born said he thought many of his customers were buying the masks to prevaler for a propertion of the side of the propertion of t

Chemical warfare an option for Iraq

By FRED BAYLES

Associated Press

DHAHRAN, Saudi Arabia —
Saddam Hussein raised the specter of chemical-biological warfare — and even nuclear weapons — in Iraq's fateful confrontation with the U.S. superpower yesterday. Meanwhile, scores more of his air force pilots were slipping out the back door to Iran.

CNN's Peter Amett, who incrived the Iraqi president, said Saddam claimed the misailes his military has fired at Saudi Arabia and Israel have chemical, biological and nuclear capability.

The decrease of Scuds launched

capability.

The dozens of Scuds launched thus far have carried only conventional warheads. The Iraqis have chemical and biological weapons, but Western analysts question whether Iraq is technically capable of equipping missiles with such warheads.

As for nuclear warheads, some analysts believed before the Persian Gulf war broke out that Iraq was a year or two from developing a primitive atomic weapon.

developing a primitive atomic weapon.

But the U.S. military said its recent air attacks eliminated the tracial nuclear network.

As recounted by Arnett, Saddam skirted the question of whether the Iraqis would use unconventional weapons.

"Iraq will use weapons that equate the weapons used against us." Arnett quoted Saddam as saying. "All the air superiority... that has come upon us has failed. We have maintained our balance, using only conventional weapons."

But, Arnett said, the Iraqi leader then suggested Baghdad may be "forced" to take drastic action.

"We pray that not a lot of See GULF, Page 4

versity (10-1, 3-2) at 10ct Earles methods asseum.

Auburn Coach Tommy Joe Eagles' team — which has lost four games at home this season — has been struggling at home lately. You have to go all the way back to Dec. 17 for the Tigers' last home win — when they beat Texas A & M 95-71. In SEC competition, they have come up with some goose eggs at home this season.

However, they are not to be taken lightly.

The way Auburn has been shooting this season, it possesses the ability to pull off the upset. The Tigers edge the Cats in both field-goal and three-point percentages.

gers edge the Cats in both field-goal and three-point percentages.

They have buried 38.3 percent from three-point range and 44.9 percent from inside the line. The Cats have been only able to hit 30.8 percent of their three-pointers and 44.0 from field-goal range. "It's a basketball game that presents a number of problems — they shoot the threes very good." Pitinos and. "They are very very quick as well and have the ability to go by you."

Auburn is led by the quickness of sophomore guard Ronnie Battle. Battle, 6-1, ranks among the top scorers in the SEC, averaging 18.8 points per game this season.

Both Battle and sophomore guard Reggie Gallon

game this season.

Both Battle and sophomore guard Reggie Gallon can hit the three with success. But it's Gallon who See UK-AUBURN, Page 5

UK's McKinney top debater in Dartmouth tournament

T.A. McKinney, a UK senior de-"Top Debater" at a three-day debate tournament at Dartmouth College in Hanover, New Hampshire last

Hanover, New Hampshire last week.

This is the second time this season that McKinney, a political science senior, has received the "Top Speaker" award. He also carned the honor at the Wake Forest University Invitational in November.

"To get both of those it takes a lot of luck because it is really close," he said. "It depends on if you get the breaks."

McKinney estimated there were about 80 debaters who participated at Dartmouth. McKinney, 21, a Nashville, Tenn., native, teamed with David Walsh, a political science senior from Irving, Texas, to emerge from the eight preliminary rounds as the top seeded team, but they lost their quarterfinal round to the University of Texas on a 2-1 decision. "The tournaments have two compilations, (and) the person who gets the most points during eight preliminary rounds wins," said J. W. Patterson, UK Director of Intercollegiate Debate. McKinney finished three points ahead of his closest competitor.

Thirty teams participated in the Dartmouth tournament, Patterson said. The number of teams varies in each competition.

said. The number of teams varies in each competition.
Kentucky's next tournament will be held at Northwestern University in Evanston, Ill., Feb. 8-12. After that, the debaters will have their sights set on the final competition, he National Collegiate Debate Tournament, in April.

The competitors debate on the same topic for an entire season. The national topic for this year's debate is Resolved: "That the United States should substantially change its trade policy toward one or more of the following: China, Hong Kong, Japan, South Korea, Taiwan."

DIVERSIONS

Independent labels made music stranger (and better) in 1990

By P.M. JEFFRIES

If the world is getting smaller as the Information Age gets bigger, then I hope modem music just keeps getting stranger. Like it did in 1990.

"Hey hey, my my ... rock 'n' roll will never die," spake Neil Young

will never ure, species come years ago to have the some years ago. Now that's truth in advertising. Clearly, the bucks are too big for rock to R.I.P. With the dollar signs rolling foreventore across the glazed eyes of CEO's everywhere, don't look for pop rock to ever growth.

is the well-being of independent music, those hordes of obscurity and oddness that add a welcome snicker to this cruel world.

Critic's Notebook

then Information Age gets bigger, then I hope modern music just keeps getting stranger. Like it did in 1990.

"Hey hey, my my ... rock 'n' roll will never die," spake Neil Young some years ago.

Now that's ruth in advertising. Clearly, the bucks are too big for rock to R.I.P. With the dollar signs rolling forevernore across the lazed eyes of CEO's everywhere, roak.

What we've got to watch out for is the well-being of independent music, those hordes of obscurity and oddness that add a welcome micker to this cruel world.

wali" singing to intricate African regional pop music. Other labels of
note are Shanachie Records and Rykodise's World series.

The core of interest in the "world
wave" has been hearing just what's
been done to good old rock 'n' roll.

A quick listen to France's Mano
Negra and Les Negresses Vertes or
Ireland's bar-rockin' Pogues leaves
one thing clear: Lots of people over
the world have grown up listening
to Western rock music. And now
it's their turn to suggest a hook or
two.

Fusing native folk sounds with those from the nearby radio, world acts have been giving a wily touche to crusty American and English hacks much as the Beatles did to the

losse-paint to derive the control of the control of

to crusty American and English hacks much as the Beatles did to the likes of Frankie Avalon and Fabian here in 1964. Of course, the impact might not be as dramatic, but just remember, you don't have to listen to Madonna if you don't wanna. And instead of "vogueing," you could listen to the real "house" techno-beat sounds that have been pumping out of Europe and elsewhere like gangbusters. Box State's UTD. STATE 90 made its mark with a clever broth of floor-vibrating electronic bumps, whirrs and chirps, coupled with Mother Nature's own bumps, whirrs and chirps from real birds and other sampled phenomena. Meanwhile, groups like Meat Beat Manifesto and Skinny Puppy sent walloping thunderclap backbeats and regiments of syncopated

third record, Fear of a Black Planet, extended the rap reign of these Long Islanders. Preaching against sexism and institutional racism to full-tilt beast and sampling, PE lost no steam in 1990.

Boogie Down Productions' Edutainment sent a pro-education message to black youth and illustrated the reality of gang life to everyone eise, while Ice Cube, ex of the notorious N.W.A., tossed morality altogether and unleashed a vicious, lethal dose of Compton, Calif., gang life on Amerikka's Most Wanted.

On the funnier side of hip-hop, Digital Underground mixed a wild brew of funky collage work and convoluted rhymes on Sex Packets, scoring a hilarious hit with "The Humpty Dance."

Likewise, A Tribe Called Quest triumphed with style over substance on People's Instinctive Travets in the Paths of Rhythm. Where else are you going to find samples of Lou Reed s' Walk on the Wild Side?" 1990 also will be remembered as the year the lethargic corporate misc world could ignore rap no longer, cleaning up the more controversial elements and creating castrated consumer phenoms like Vanilla Ice and M.C. Hammer. Don't let the music biz tell you they don't know where to turn a buck.

And the biggest bucks of all may have been cranked out of "collector sets," the '90s versions of greatest his records. A true symbol of the Automatic Age, these boxes allowed us all to be "collectors' of fine music. All you needed was a fat enough wallet and you could one-stop shop your way to months of ringing ears.

While a few of the sets were worth the extra dough, most were just ostentatious rehashes designed the properties of the properties of the properties of the properties of the sets were worth the extra dough, most were just ostentatious rehashes designed the properties of the lates were worth the extra dough, most were just ostentatious rehashes designed the properties of the properti

The tribute album concept seems like a veritable five percent solution to writer's block, and each record is bound to have at least one barnbuster. It's the rest of the dross that's cause for concern.

few pretty pictures. Quality or not, I'm wouldn't shell out clam one for any of them.

Perhaps, the most curious fad of 1990, though, proved to be that of the tribute album. Are we finally seeing rock eat its own tail? Certainly, rock has made a long and prosperous career out of musically ripping others (and itself) off. 1990 was a new high for that.

Packed into one year we found urbutes' to Neil Young, the Rolling Stones, the Byrds, Brian Wilson, Kiss and Black Sabbath, to name a few. The concept seems like a veritable five percent solution to write's block, and each record is bound to have at least one barmbuster. It's the rest of the dross that's cause for concern.

Nonetheless, here's a few stingers. The Shamen turning in a printed circuit digitization of "Purple Haze" on If Six was Nine. — A Tribute to Jimi Hendrix; The Cramps lurching through "Jailhouse Rock" on The Last Tempation of Elvis; and The Thompson Twins high-tech vamp of Cole Porter's Tin Pan Alley classic "All I Want is You' from the AIDS benefit Red, Hot, and Blue.

These and others made the whole year enough of a hoot to make up for the United States of New Kids

These and others made the whole year enough of a hoot to make up for the United States of New Kids on the Block and "elassic" rock. Just let's not get too carried away — with nine years left in this decade, I'm a little afraid to face "No, SERIOUSLY, Folks — A Tribute to Phil Collins."

And you should be, too.

Super-caustic cleaner

U.S. and Allied troops in the gulf are issued gas masks that protect them from all of these toxins, said Maj. Lester Letterman, an associate professor of military science at U.K.

The U.S. masks, which Born sells at his surplus store, use activated charcoal filters to screen out chemical agents that may be inhaled by soldiers. Filters must be changed frequently, Letterman said.

Troops also wear charcoal-lined suits to protect their skin from chemical spray, which can rain down from airplanes and aerosol-type bombs.

While the chemical gear is effective at protecting troops, Letterman said it is "terrible" to wear. The suits cover soldiers from head to toe and allow very little ventilation, he said.

"Very many casualties could be caused by heat prostration," Letter-man said. "Your body is totally en-cased and the suit doesn't breathe

cased and the suit doesn't breathe very well."

Letterman also said the suits and masks make it more difficult for troops to do their jobs. "They're cumbersome and they're hard to see out of. It's prohibitive to doing the rest of your mission when you have them on."

Treatment for exposure to chemical agents varies in effectiveness, Letterman said. None of the blood agent antidotes work very well, but troops carry a swab that can be used to clean off blister-agent drop-lets.

lets.

The swabs are essentially a "super-caustic cleaner" that Letterman said neutralizes the chemical liq-

U.S. troops also carry a syringe with nerve gas antidote. The antidote, commonly called atropiene, is actually a combination of atropiene and another compound.

that we will have to engage in com

In Washington, White House spokesman Marlin Fitzwater said Iran has repeatedly assured the United States that it would impound the Iraqi planes until the end of hos-tilities

Stevens said war planners none-theless would keep a close eye on the aircraft in Iran, since they could pose a threat to Navy ships in the gulf and other Desert Storm units.

Arnett, one of the last foreign cor-respondents in Baghdad, asked about the departed pilots in his in-terview with Saddam.

The Iraqi leader replied by vague-ly referring to Iran and Iraq, former enemies, as both viewing "the con-frontation here as a battle between faith and the infidel."

But he said Iraq would respect the ecisions of neighbor Iran, Arnett

Out in the gull's blackened wa-ters, meanwhile, the mammoth crude-oil slick that began pouring from Iraqi-held Kuwait early last week now totals some 460 million gallons, Saudi officials reported. That is almost three times the size of the world's largest previous spill, from a Mexican well blowout in the Call of Mexican in 1079.

Med Center expansion made possible by grant

By KELLY CROWLEY

A \$4.1 million expansion of the Albert B. Chandler Medical Center will bring greater learning opportu-nities to UK health students, a hos-pital official said last week. The UK Hospital Board approved the expansion of the Medical Cen-

The UK Hospital Board approved the expansion of the Medical Center's obstetrics/gynecology department last week. The expansion, which is expected to be completed in July 1992, will enable the hospital to increase the number of children it can deliver, as well as provide patients and students with access to the most modern equipment.

access to the most modern equipment.

"We have 2,000 students in total that go through the Medical Center each year in either medicine, nursing or pharmacy," said Frank Butler, director of the hospital. "This will give them an opportunity to be trained in a state-of-the-art facility."

This technology, which includes new monitoring equipment, will also benefit expectant mothers, Butlers aid.

(obstetrics) area for both normal and high-risk mothers," he said. "We're looking at new and better ways of delivering care to mothers and children at risk." The expansion, to be called the Maternal Women's Care Center, will include "modern delivery suites" that will have an effect on the number of children delivered at the Medical Center, Butler said. "We're currently doing about 2,700 deliveries a year, with the expansion, we will be able to increase to somewhere between 3,000 and 3,500 deliveries a year," he said.

The new addition, paid for entire-

said.

The new addition, paid for entirely with hospital revenue, is the result of a joint effort between the Medical Center and the College of Medicine.

It is an example of the Medical Center's continued commitment to their Maternal Fetal Medicine Program—one of only two such programs in the state.

The new facility will be under the direction of Dr. Frank Miller, UK's recently named chairman of obstetrics and gynecology.

New service bringing news to the impaired

By JULIE ESSELMAN

A new radio broadcasting service is bringing the printed news to the ears of visually impaired and handicapped Kentuckians, making accessible in-depth information they otherwise might not have.

After three years of planning, last November Central Kentucky Radio

November Central Kentucky Radio Eye Inc. began broadcasting nation-al and local newspaper and maga-zine articles for Kentuckians who can't see or handle published mate-rials because of visual or physical

rails because of visual or physical handicap.

With the help of federal and local funds — and several volunteers — the non-profit agency has provided 161 people with special receivers to hear daily readings of the news. A satellite network broadcasts national news from more than 100 publications, ranging from The New York Times to the National Enquirer to Playboy magazine. And volunteers broadcasting out of the Margaret I. King library read two hours of the Lexington Herald-Leader each day. "It think it was very much need," said Joyce McGuire, a visually impaired woman who uses the service and also volunteers in the broadcast studio. "It's the only way many people get the newspaper at all."

Paul Krabb, a retired UK English

Paul Krabb, a retired UK English professor, organized the agency more than three years ago to fill agap" he thought was left by other services for the print-handicapped in Kentucky, which provide text books, novels and other material in Braille or on tape. With \$60,000 in federal funds, \$20,000 from the Kentucky Department for the Blind, and additional help from others, the agency has set up a studio on camand additional help from others, the agency has set up a studio on campus and has the capacity to service 400 individuals with the special radio receivers needed to hear the broadcasts. The receivers are free of charve.

broadcasts. The receivers are free of charge.

The readings are broadcast on a subcarrier of WUKY-FM and can reach 14 central Kentucky counties.

About 30 volunteers alternately read the Herald-Leader for two hours every day. But Krabb said Radio Eye needs more volunteers to expand its services.

He wants to offer 30 minutes of campus news from the Kentucky Kernel during the week, as well as readings from Cats' Pause and other sports news, and even the comics.

"Right now we're not doing sports. We need to do it," Krabb said. "So we need a bunch of sports readers."

Pam Wallace, an Honors Program and English senior who is legally blind, said the new service "is very helpful."

She said she needs to be kept abreast of in-depth news for a judicial process class, and Radio Eye "opens up a whole new avenue for me."

She said she welcomes having the Kernel broadcast because she felt like she was missing out on campus

news.
The Herald-Leader is broadcast daily from 8 to 10 a.m. and from 9 to 11 a.m. on Sundays. The Kernel will be broadcast at noon daily.
For more information on receiving the service or volunteering to read, call 257-2702.

Former UK pitcher Steve Culkar does some mound work in an attempt to rehabilitate his shoulder and reach major league form.

Culkar ready to spring back Former UK pitcher overcomes

injury, on track to major leagues

Steve Culkar is facing one of the biggest challenges of his career — he is striving to regain his form. After having arthroscopic surgery performed on his right throwing shoulder in the spring of 1990, the former UK pitcher is currently trying to pitch in the "Big Show" for the Baltimore Orioles.

"I need to prove myself again."

ne Baltimore Orioles.

"I need to prove myself again," said Culkar, 24, who graduated from UK last spring with a telecommunications degree. "This upcoming spring training, there will be hellfire in my eyes."

After completing his eligibility

After completing his eligibility with the Bat Cats in 1987 with a solwith the Bat Cats in 1987 with a solid career as a heat-throwing reliever, the Des Plaines, Ill., native was the 15th selection by the Orioles in the 1987 June draw, Ill., and 1987 June draw, Ill., in 1987 and pitched in seven games, garnering one win.

In 1988, he was promoted to the Orioles' A club in Charlotte. Later in the year he earned his way up to the AA club in Hagerstown, Md., where he went 5-3.

In 1989, he compiled an 8-4 record with stints at AAA Rochester and in Hagerstown.

record with stints at AAA Rochester and in Hagerstown.

At Hagerstown, the right-hander hit his career-best ERA with 1.34.

Culkar seemed well on his way to the major leagues, where he could face star hitters like the Oakland A's slugger, Jose Canseco, or the Yan-kees' Don Mattingly.

But the roof caved in on him last spring.

"The shoulder injury didn't happen on one pitch," Culkar said, "It just happened over time. My last two games (in Rochester) I wasn't throwing hard, and my arm was really killing me." Since the surgery, Culkar has faced endless days and nights rehabilitating his once powerful shoulder — and questioning his desire to make it back to his old form.
"For the most part, rehabilitation has gone well," Culkar said. "The toughest thing is that I see progress in sparts, and so I get impatient with that. Some days I feel good about my progress, and some days I don't."
The 6-1, 190-pounder has gone through five months of lifting culf weighs to strengthen his shoulder and running to increase his stamina. He has been throwing off a mound for the past few months to get his old form back.
Culkar credits his days at UK for his return to baseball after the inju"At UK, I learned a lot about

nat was increasing.

"At UK, I learned a lot about asseball and discipline," Culkar said. "No one watches over mewhen I work out now, and that's tough, but my experiences at UK with coach (Keith) Madison helped my toughness."

In fact, it was Madison's toughness that made Culkar choose UK when he transferred here from Easter Illinois in 1985.

"UK had recruited me the longest and hardest, and that was the difference," he said.

"UK PACULTY & STAFF

CURIOUS ABOUT WELLNESS?

"UK had recruited me the longest and hardest, and that was the difference," he said.

Culkar said he relied a lot on UK trainer Joanne Hauser for upiliting advice during his rehabilitation pro-

"When I talk about my insecuri-ties to her, she throws some com-mon sense back in my face," Culkar

"Sne's been my mom, my treend and my psychiatrist." But Hauser said Culkar needs to give himself most of the credit for his recovery.
"I was impressed with his great desire and determination," Hauser said. "He did everything it took and was here every day doing some-thing.

was here every day doing some-thing.
"Right now he's about 85 percent back, but he should be 100 percent when he reports to spring training in February."
After the injury, Culkar faced the fact that baseball may not always be in his future, so he came back to school and eventually earned his de-gree.

gree.

"School gave me a different perspective on life," Culkar said. "I came back more mature than in 1987, but 8 a.m. classes still didn't

1987, but 8 a.m. classes still didn't seem too important to me. "During the layoff, I got a chance to do some color commentary on the UK baseball radio network, so that was interesting." Only the spring will tell if Culkar is the same heat-throwing pitcher that he used to be.
"I have better ball control," Culk-

ar said. "I used to be a power pitcher, but only the future will tell if that's still the case." When he does make it back, Culkar will have to deal with squashing the rumors in the Orioles' front office that he doesn't have much athletic desire to pitch in the big leagues.

"Some coaches felt I was faking the injury, and they questioned my desire to play the game," Culkar said.

"But I'm a competitor who thrives on pressure situations."

Even if things don't work out.

on pressure situations."

Even if things don't work out,
Culkar said he can walk away from
baseball without a bitter taste in his

mouth.
"If I get cut, I'll be disappointed,"
Culkar said.
"At least I'll know I did everything I could to get there."

Hobgood suspended from Kats

By GRAHAM SHELBY

Lady Kats junior guard Jamie Hobgood will be spending some in-voluntary time off the court. A UK Sports Information Depart-ment official said the reserve from Madisonville, Ky., has been sus-pended from the team "for discipli-nary reasons".

pended from the team "for discipli-mary reasons."
When asked about her status with the team, Hobgood said she expect-ed to return but did not know when. She refused to comment further. "You'll have to talk to coach (Sharon) Fanning," she said. "I real-ly don't want to talk about it." Fanning was out of town and could not be reached for comment.

UK-Auburn

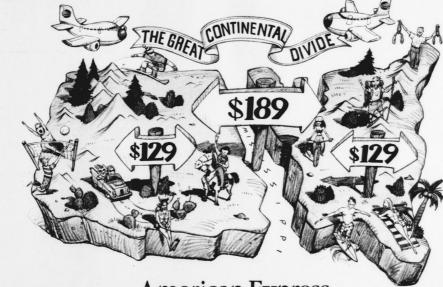

Continued from page 1

Continued from page 1
has been canning threes for the
Tigers this season, hitting 16 of 37
(43.2 percent).
The Cats, however, likely won't
run for cover if they get into a threepoint shooting war with the Auburn
Tigers. They can counter with junior
forward John Pelphrey.
Pelphrey was 16 for 31 overall
and six of 12 from three-point range
for 28 points against Alabama. This
season Pelphrey ranks among the
leaders in the SEC in three-point
shooting, hitting 413 percent.
"I think the game at Auburn will
be played at a quick pace." Pitino
said. "Good shooting will dictate
how high the score is."

UK may choose to open up the
shooting war by establishing the inside game, knowing that with the
exception of 6-9 forward John Caylor, Auburn lacks the height to constuff's freshman Jamal Mashburn
and senior Reggie Hanson.

test UK's freshman Jamail Mashburn and senior Reggie Hanson. For Mashburn, it would be a good opportunity to get back into his rhythm — the same rhythm seen two weeks ago in the second half of the Vanderbilt game, in which he scored 15 points and hauled in five offensive rebounds.

The Kernel it's not just news. It's Cool!

American Express Announces A Great New Travel Program.

Now students can get the Card and get 3 roundtrips on Continental Airlines, for only \$129 or \$189 each.

There's only one way to cover a lot of territory without spending a lot of money. And that's by getting the American Express* Card. It's the only card that offers an exciting new travel program exclusively for students—including three roundtrip certificates on Continental Airlines.

Just look at the map and pick the place you'd like to visit. If it's on your side of the Mississippi River, you can use a certificate to fly for only \$129 roundtrip. Or, you can cuss the Mississippi for \$189 roundtrip.

You have your pick of more than 150 cities in the

there are no blackout dates. But you must make your reservations within 14 days of the day you leave. And the maximum stay is 7 days 6 nights and must include a Saturday night.

In addition to this great travel program, you'll also enjoy all the benefits of Cardmembership as well as other exclusive student privileges. They include a quarterly magazine filled with informative articles on summer jobs, careers, campus life. Plus valuable discounts from leading retailers.

But remember, there's only one way to get all this—and that's by getting the American Express Card. Just call us chave your bank address and account number on hand). What's more, with our special student offer, it's easier to get the Card now while you're still in school than it may ever be again.

So get the Card. And get ready to cover new territory on either side of our Great Continental Divide.

Gov. Wilkinson should appoint new trustees

One of Gov. Wallace Wilkinson's recent exercises of political

One of Gov. Wallace Wikinson's recent exercises of political triviality — his string of commercials highlighting his administration's "accomplishments" — shows school children crossing a bridge in Shelby County.

Because of Wilkinson's program of replacing unstable bridges, the commercial's announcer declares, school children throughout Kentucky don't have to worry about falling into some creek any-

The problem is that the bridge depicted in the commercial isn't

The problem is that the bridge depicted in the commercial isn't faulty, rightly upsetting Shelby Countians, who have pride in their school system — or at least their bridges.

But there is a symbolic importance to the fallacious commercial besides the fact that it proves our governor is too cheap to drive to rural Kentucky to find one of many dangerous bridges. He instead traveled the 20 miles or so to Shelby County. Truth, you know, is less important than nice imagery and a touching story.

The commercial, however, also is representative of another serious fallacy regarding Wilkinson's administration — the idea that he is an efficient administrator able to use his business acumen and savvy to bring prosperity to Kentucky.

The fact of the matter is that efficiency is far from Wilkinson's way of doing the business of state government.

The Kentucky Kernel reported last week that the governor has seven appointments he has yet to make to the UK Board of Trustees. And he has several others to make at the state's seven other public universities.

A Wilkinson spokesman told the Kemel that he does not know when the governor will make a decision on the appointments

One of the terms has been up for more than a year; another ex-

According to Kentucky law, trustees continue serving beyond the expiration of their terms until the governor appoints another representative. The governor has appointment power on 16 of the 20 UK heart precitions.

Schaltve. The governor has appointment power on roof ut ac-board positions.

That means that unlike other boards in education and environ-mental areas, where the governor has neglected his responsibilit make appointments, the University doesn't face a crisis in leade

ship.

But it remains disturbing that after a year, and almost a year in some cases, the governor has yet to make appointments that affect the University's leadership and policy-making vision.

The cynical thought would be that the governor is going through the long lists of contributors to his gubernatorial campaign to find people to reward for their faithful service. We don't want to be cyniversial.

But then again, look at the way the governor has given out per-

Respect

We should all see the world through the eyes of a child

There is wonder in the clean eyes of a child, a sort of innocence that is contagious. Children tend to see the similarities in the people that live around them, but as they grow, they tend to focus on vast differences. We should all see the world through the eyes of a child. We should all see upon the earth with awe and look at those who live on it with respect. But we tend to do the opposite, we act like mature adults and frown upon diversity.

Those who are not with us are

tunis and frowin upon diversity.

Those who are not with us are gainst us. We grasp on to the idea at different ideas merely pollute ur solutions. This is not respect.

Respect is something more than that Aretha Franklin sang about, espect is something due to everyner.

one. Everyone feels they don't get enough respect, but who really knows what it means? I don't know, but I know what it isn't. Respect isn't condemnation, damnation, or persecution. Respect isn't the restriction of liberties or the suppression of freedom. Respect is void of hate and without prejudice. We do not have adequate respect

Dennis

yet, instead we garden stereotypes and we harvest generalizations. We tend to judge quickly those who differ from us, without respect.

We create stereotypes of those we do not understand or do not wish to. We look at different races with a debit of respect, like they owe us something before we give it to them.

We stare harshly at those different in sex, religion, ability, age, sexual orientation, ethnic origin, creed, personality, or looks, and even those different in thoughts.

Society needs a spanking for its misbehavior. These stereotypes present in our world aren't just tools of discriminations, but mandates of behavior. We tend to label what is expected of diverse groups, and those who stay from our gross misinterpretations are subject to the

wrath of society - this is not re-

wrath of society — this is not respect.
We can't overlook stereotypes because they are so ingrained into our thinking and culture, but we can overcome them within ourselves and look at the world through the open eyes and mind of a child. Some may disagree with this train of thought, but we really underestimate the influence disrepect has within our lives.
What is the current popular opin-

within our lives.

What is the current popular opinion of Arabs in this country? How do we view homosexuality? We view those differently because we do not understand them or care to this is not respect.

do not understand them or care to
—this is not respect.
We are far from a perfect people,
but that is not an excuse to remain
stagnant in our social growth. Why
not treat all with equal respect, as
equals and not slaves to our social
expectations?
When we respect the diversity
that other cultures or sub-culture
have to offer the world, then we can
perin to annoreciate their value. We

begin to appreciate their value. We can gain insight on other points of view, we can live in a world with-out the boundaries of hate and sus-

We create stereotypes of those we do not understand or do not wish to. We look at different races with a debit of respect, like they owe us something before we give it to them.

We can rejoice in the flavor of our universal neighbors. We can learn more about ourselves, what we think and what we value. Basi-cally when you close your mind, you're not using it, and we all know a mind is a terrible thing to waste.

Just think how much more pleas-ant life would be if we embraced those around us rather than alienate them. In a world with hate as com-mon as it is here we all must live in fear, because all of us face the risk of scrutiny by those who oppose us.

Staff Writer Dennis Dever is a

Reagan does not deserve credit for U.S. military's successes For example, the B-1 bomber, B-2 Stealth bomber, Sgt. York anti-aircraft gun, "Star Wars" and the F-12 Stealth fighter, have all run into problems. None of these are being used in Operation Desert Storm, and most of which have since been cancelled or grounded because of severe failure or blatant cost over-

By William Stuart Webster II

Alan Cornett's column last week made an unrealistic claim of success by the United States and its allies in the Middle East War. His statement was premature and incorrectly credits the wrong presidential administration for any advances the United States may be making in the early stages of the Persian Gulf War. Unfortunately, the war may just be beginning.

Contrary to Comett's beliefs, the United States has not been as suc-cessful as he may think. Iraqi air power is still very much intact. Most recent estimates claim that 95 percent of their air power is un-harmed. Communications in Iraq are also still operational between Saddam Hussein and his troons.

Saddam is still launching Scud nissiles daily into Saudi Arabia and srael. Our efforts to eliminate the raqi missiles are wasting precious ime our Air Force could be using to destroy key military and troop in stallations.

stallations.

We must not forget that a bloody ground war, which has yet to begin, is predicted by many experts to last months and even longer. Many of our new systems will be tested in desert conditions, an area in which many were not designed to fight.

Saddam, most likely, has many surprises we have yet to see. For instance, the fake cardboard and plywood Scud launchers that our military mistook for the real thing in the opening days of the war.

Don't get me wrong, the Air

Don't get me wrong, the Air Force has been very effective. But let us look at which systems are effectively working in the air war.

If Reagan had kept fuel and conservation programs instead of needlessly pouring billions of dollars on now deserted military programs, we may not have found ourselves, and the rest of the world, in the middle of a war.

For instance, the F-14, F-15, F16, A-6, the B-52 and the F-111,
which were all started before Ronald Reagan took office, are all
working effectively. Even the F117, commonly known as the
Stealth fighter, which has been most
effective in our air campaign
against Iraq, was started under the
Carter Administration, a point
which Cornett incorrectly attributed
to the Reagan Administration.

Furthermore, the rapid deploy-ment force, which was implemented in August to defend Saudi Arabia against Iraq, can also be attributed to Jimmy Carter.

to Jimmy Carter.

Some responsible members of Congress during the Reagan years felt it necessary to put more emphasis on research and development of some projects. Instead Reagan emphasized the premature production and deployment, which, in many cases, have proven to be a costly disserted.

run.

This does not begin to cover all the \$500 hammers and \$1,000 toilet seats that are being bought.

If Cornett wants to attribute something to Reagan, try these on for size: all but dismissal of alternative fuel programs, an increase in dependence on Middle East fuel imports and rolling back the efforts of Nixon. Ford and Carter to free the American people from forcin de-

conservation programs and shown leadership in pursuing them instead of needlessly pouring billions of dollars on now deserted military programs (which some members of Congress warned us against), we may not have found ourselves, and the rest of the world, in the middle of a war. of a war.

Instead of attributing premature claims of success to Reagan, we should sit back and watch with caution as the war unfolds.

uon as the war unious.

While we are waiting on the outcome, maybe Cornett can spend this time researching for his next article when the war is over. Then maybe he can form a more educated view on who is to blame for the war and the success or failure of the war.

A little inner searching might have prevented war in the Persian Gulf

By Lindsay Campbell

arm having a difficult time choosing my position on this war, and yet I feel compelled to do so. Some of my friends actively defend the war effort by donning SMASH (Students Mobilized Against Saddam Hussein) T-shirts, and others actively oppose it by attending peace rallies. Try as I might, I cannot bring myself to jump on either bandwagen, even though I am generally prone to activism.

ral instincts that normally would cause me to cheer and wave the flag in proud celebration.

I think continually of and am grateful for the brave man and

improud celebration.

Each soldier is a valuable human being with heavy investments in leve, work, growth — life. Even so, I realize that Saddam Hussein is an evil force that must be reckoned with. I only wish doing so would not require, as it has in preceding wars, the loss of so many innocent lives.

I love this country; there is none better on the face of the earth. I know that those who support the war and those who march for peace feel the same, and they are saying so through their constitutionally

ich the tiny raised dots, only to find that someone had depressed each one with a ball point

I thought about this for a mon

I thought about this for a moment, wondering why anyone would do such a thing, and it dawned on me that maybe the guilty party was not intending to do harm.

A lot of times we humans do things without much consideration. We do them because others do them, or because it is what we have been taught, or because it felt good at that moment.

The person who destroyed the dots probably gave no thought the inconvenience it would cau

Such a grave decision should be made with a great deal of inner searching and independent, selfless thought.

Whoever was responsible probably got some kind of momentary gratification from punching in those dots and just didn't think about the consequences of his or her actions.

As I rode down on the elevator, a jour

an analogy started to form in my head and I began to feel a little better about my lack of position on the Persian Guif War. It comforted me to know that at least I am taking the time to think about both positions before, if ever, claiming one, that weighing the consequences of both, not only for myself, but for others as well.

as well.

Such a grave decision should be made with a great deal of inner searching and independent, selfless thought. I dare say if such an exercise were practiced more often, we might not be in this war at all.

University Forum

Time: Thursdays, 12:00 noon to 1:30 p.m. Place: Room 206 - Old Student Center

Dean of Undergraduate Studies and the Dean of Students invite the strilly community to participate in the University Forum during the spring steer. Students, faculty, and staff will have an opportunity on alternate stadys to express their views on the topic of the day or on any other or of public concern. The University Forum will have no formal pres-forms. Diverse viewpoints are encouraged, and the spirit of the town

January 31 The University's Role in the Community

Lack of objectivity, knowledge alters historical records

Contributing Writer

Students should be aware that both fact and opinion have guided history and examine all angles when studying past events and cultures, a UK history professor said.

Thead Perfue used Native American culture and history to illustrate that point in her speech "Old Worder Perceptions, New World Realities: Writing the History of Native American Women" to the Donovan Scholars Forum program last week in the Student Center.

Perdue, who studies Southern United States culture with an emphasis on Southeastern Native Americans, said historic accounts of Southeastern Indians are biased.

"No source is neutral," Perdue said.

said.

Because the tribes lacked written communication in the 18th and early 19th centuries, they could not record their events, so, Perdue said. European traders and settlers wrote the only existing reports about the "distinct cultural area."

"It's as though we were going to write a history of the current war in

"It's as though we were going to write a history of the current war in the Persian Gulf and the only record we had were the Iraqis.'

> Theda Perdue. **UK** history professor

the Persian Gulf and the only record we had were the Iraqis," Perdue

we had were the Iraqis," Perdue said.

Perdue said those slanted view-points influenced public opinion and may have led to such sorrowful events as the Trail of Tears.

Native American women in par-ticular fell victim to one-dimensional evaluations, she said.

European men. accustomed to

dimensional evaluations, she said.
European men, accustomed to
their own tiered, male-dominated
society, did not understand the sex-ually divided, yet symbiotic, nature
of Southeastern Indian cultures,
Perdue said.
Cherokee women, for example,
controlled farming while the men
controlled hunting, she said, and
both activities equally supported

ward modesty and sexuality that were unorthodox to the Europeans. For instance, many Southeastern Indian women wore only short skirts and no shirts. Perdue showed a picture of one woman wrapped only in Spanish moss.

"What Europeans considered to be immodesty on the part of the Indian women probably contributed to the perception of Indian promiscuity," Perdue said.

Consistent with their different beliefs about sex, Cherokee "trading women" often exchanged sexual favors for clothes, trinkets, and other goods with European men, Perdue said.

Perdue explained how the wom-

goods with European men, Perdue said.

Perdue explained how the women's conventional bartering goods, like corn and beans, did not obtain much in exchange.

The Europeans regarded such practices as amoral and believed that Native Americans lived without rules instead of realizing that they instead followed different rules, Perdue said.

Many factors contributed to depictions of Southeastern Native Americans as "swayeges" and "opposite" of Europeans, but Perdue said

characteristics.

Both groups primarily farmed for living, lived in stable, not nomade, communities, and built houses, tot tepees, Perdue said.

Perdue said she believes South-satern Indians may share more ommon traits with the Europeans han with the Plains Indians.

Europeans did presume that the outheastern Indians operated a cierarchical, royal political system imilar to their own, but Perdue deministrations.

bunked the myth of Indian cnets and princesses.
Perdue says the Southeastern Native Americans practiced a much more "participatory" government.
Roberta James, director of the Donovan Scholars program, said a committee of six Scholars or individual suggestions help select Perdue and the other speakers.
The speeches, scheduled every Tuesday and Thursday from 4 to 5 p.m., are open to the public, James said.

their society. Europeans, judging the Cherokee culture in terms of their own society, judged the male role — hunting — as dominating the economy. Cherokee women also held vital roles during wartime, some even earning the title "war women" by rousing the troops to battle. "War women," in a society where sex roles were based more on work than biology, moved beyond males and females to a separate gender. "I learned some things that I didn't know," said Mildred Holwerk, a Donovan Scholar and graduate English student. "I didn't know women fought along with the men." Southeastern Native American women also held many attitudes to-The College of Dentistry

ow you can afford to dream in color.

If you thought that finding a color Macintosh* system you could afford was just a dream, then the new, affordable Macintosh LC is a dream come true.

The Macintosh LC is rich in color. Unlike many computers that can display only 16 colors at once, the Macintosh LC expands your palette to 256 colors. It also comes with a microphone and new sound-input technology that lets you personalize your work by

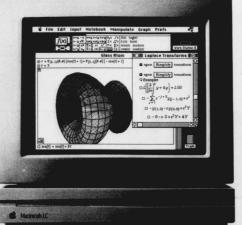

adding voice or other sounds. Like every Macintosh computer, the LC is easy to set up and easy to master. And it runs thousands of available applications that

all work in the same, consistent way-so once you've learned one program, you're well on your way to learning them all. The Macintosh LC even lets you share information with someone who uses a different type of computer-thanks to the versatile Apple* SuperDrive, which can read from and write to Macintosh, MS-DOS, OS/2, and Apple II floppy disks.

Take a look at the Macintosh LC and see what it gives you. Then pinch yourself.

It's better than a dream—it's a Macintosh
