Dear Sir

May we expect Mr. Swainson's paper to put before Committee? I have no doubt his wishes will be complied with

May we not also look for a short paper from you on the curves or something else

Yours truly

Truly Yours

W. F. Paraday

FARADAY, MICHAEL (1791-1869)  
Inventor. London.

A.N.S. to Peter Mark Roget (1779-1869).  
21 May, n.y. lp. (half of a double sheet,  
octavo.)

This letter is written to the compiler of the famous Thesaurus, who was also a well-known physician and a mechanist. Faraday inquires about a paper written by "Mr. Swanson" (probably William Swainson, 1789-1855, a naturalist, and like Faraday and Roget, a Fellow of the Royal Society). He also wonders if Roget will not have a short paper available "on the curves or something else."
