Figure 1. Comparison of natural and prosthetic hand positions.

The prosthetic hand was positioned in a similar manner to the natural hand, with the wrist joint aligned with the natural hand's wrist. The prosthetic hand was held in a similar manner to the natural hand, with the fingers slightly curled. The prosthetic hand was held in a similar manner to the natural hand, with the fingers slightly curled. The prosthetic hand was held in a similar manner to the natural hand, with the fingers slightly curled.
