**DESIRE IN SPRING**

I LOVE THE CRUEL SONGS THE MOTHERS SING  
IN LOVELY PLACES WHEN THE TWILIGHT DROPS.  
THE SLOW ENDURING MELODIES THAT BRING  
SLEEP TO THE WEeping LIPS: AND WHEN  
SHE SINGS,  
I LOVE THE RAINBOW BIRDS UPON THE TOWERS.  
O FLEETY HERONS IN A WORLD OF SPRING,  
AND WHEN THE SUNNY RAIN DRIES FROM THE  
EDGE  
OF MIDWAY WIND, AND MEADOWS LEAN  
ONE WAY,  
AND A LONG WHISPER PASSES THROUGH  
THE SEEDS,  
BESIDE THE BROKEN WATER LET ME  
STAY,  
WHILE THESE OLD AIRS UPON THE MEM-  
ORY PLAY,  
AND SILENT CHANGES COLOR UP  
THE HEAVS.

—FRANCIS LEDWIDGE.

**CASUAL OBSERVATIONS**

**By FRED SHELLS**

Just about this time in each second semester club that are organized by various classes, such as English, French, Spanish, Math, begin having good speeches and interesting discussions. Standard procedure, friends; they have to do that in order to insure maintenance of the various clubs in order that September reorganization won't be such a difficult task.

**Consolation**

Well, the present staff shouldn't feel hurt about getting no more

publicity from now on, because members thereof have had their names in each Kernel since last September, and even in the "Gamage Extra." Maybe you can bring the new editor.

**Sig Eple**

Since the Aylesford organization has new—a crest, a shield, different colors, and a pin, not at all similar to any other on the campus, we may feel assured that girls, favored by the Sig Eps, will be pleased recipients of decorations and jewelry, bearing identification associated with Sigma Phi Epsilon, especially upon Easter, birthday days, and Christmas. —Ask "Clancy," "Where is your pin?"

Even though more ads do lessen the possible amount of news and humor columns, the Observer is glad that the ad department got busy.

**Who Will Write?**

1. Dotes and Antidotes? 2. Just Among Us? 3. Liferacy? 4. Room in the Rialto? 5. Seen from the Press Box? 6. Much Ado About Nothing? And, above all, the popular column called "Casual Observations," after the change?

**When I'm the President!**

This is excellent weather for all our gravelled paths to be pounded and oiled. Also, it is the best season to begin filling these holes in campus roadways. Have you ever

thought that it's an insult to a good car when driven through the "No Man's Land" around to the library?

That was some game on Stoll field Friday! The most noticeable fact was that it drew as large a crowd as any game during the regular football season.

Here's a question for the Council: How will Dean Melcher make his trip on April 27, 28, and 29, and fill his appointment on the 27th at the big dinner? Is he twins?

**Goodbye**

Having been with you but a few short columns during a brief career on this paper, having to leave you with this issue and regretting that fact deeply, the Observer takes this final paragraph to wish all of you a most pleasant Easter season and a sad goodbye.

Those who are "finding" all these "lost" pens, mechanical pencils, fraters and sorority pins, and various nondescript costs, and keeping them, should be given a vote of thanks by advertisers in "lost and not returned" column. The retention of said articles practically guarantees the "losses" sufficient publicity. Yep; it's a good stunt.

**Casting a Line**

Not all the men who throw a mean line are fishermen.

**Were you BORN TIRED?**

*Vitally different!*

**SHREDED WHEAT**

When you see Niagara Falls on the package, you KNOW you have Shredded Wheat.

HO, HUM . . . another day, another dollar. But why let it pit you in a state of vertical collapse, when the nearest campus eating place has the best pick-me-up awaiting your command?

It's Shredded Wheat, the food that puts the spring in your step. Some folks call it "energy by the bowlful." And it is—for shredded wheat is whole wheat, the one cereal grain that's packed with proteins, carbohydrates, minerals and vitamins. All these vital, life-sustaining elements—nothing add-

ed, nothing taken away—come to you in Shredded Wheat. With just the right amount of bran, measured for you by Nature.

You'll like the taste. Millions say they do. Have it served any way you like—with milk or cream, fresh or preserved fruit. It will even put new life in your pocket-book. . . it's a lot of food for a little!

**Why is the Stem removed from the tobaccos used in Chesterfield?**

That's a very simple question to answer. The stem in a tobacco leaf, like the stem in most other plants, is "woody". It hasn't any of the flavor or the aroma that you want when you smoke. And it doesn't burn right.

So after tobacco has been properly aged, one of the first things to do is to remove the stems.

But what has this to do with your enjoyment of Chesterfield cigarettes? Just this. It means that we start right when we make Chesterfield—the right kind of leaf with the stem removed, the right manufacture—everything that science knows that can make CHESTERFIELD a milder cigarette, a cigarette that tastes better.

That's why people say "They Satisfy."

Tobacco used to be stemmed by hand—Now this machine stems 14,300 leaves every hour.

Wherever you buy Chesterfields, you get them just as fresh as if you came by our factory.

# SEEN FROM THE PRESS BOX

By A. STANLEY TRICKETT

In the last issue Ralph E. Johnson took occasion to bid Kernel readers goodbye. Today I do the same. Here you will have the swan song of another would-be sportswriter. Why so many of you have ever read what I wrote has been a mystery, but judging from the criticism received at the tracks, it has reached a small public. Well from now on you will not be bothered with the pen of Stanley Trickett.

This week will see the end of another football campaign. The material has been highly touted; it is supposed to be good. Already fans are counting on a great team next season and will be disappointed if the 1933 Cats are not the best ever. I am of a different opinion. The spring practice has shown some capable performers in uniform, men who some day will be among the best in the South, yet they lack one thing—experience. Most of the men that Coach Harry Gamage will depend upon for next season, men who have never been called upon to play under the fire of big time competition. The question is will these boys be able to withstand the hard fighting eleven which will represent Alabama, Georgia Tech, Tulane, etc. I doubt it. You ask what I think about the varsity squad? My answer is wait until another year when the material is more seasoned.

Graduation this June will take many of Kentucky's best athletes from the campus. Ellis Johnson, great four sports star, will close his collegiate career with the end of the current track campaign. Forrest "Angie" Sale, all-American basketball player, has played his last game for the Big Blue. Darrell Darby will be missed from the football field and basketball court next season. George Skinner, star tackle and alternate-captain of last season's grid squad, will leave the University. John Drury will be missed. Frank "Boss" Sale leaves a big place in the center of the Wildcat forward wall, which will be stentary hard to fill. "Hoot" Gibson, stellar guard, will be missed. Besides these many others will say goodbye to the Blue and White. Kentucky will miss these men. In the future you will be recalled with awe because of their deeds on the athletic field.

Goodbye readers. I suggest that in the future you give full attention to the writings of J. Delmar Adams who will act as Kernel sports editor and Press Box writer.

The latest magic feat is doing tricks with cigarettes. Here's one that is going the rounds. It is called "The Rising Cigarette" and can be put over with startling effect by the amateur, without previous skill or experience.

Here is how the trick is done: Take a cigarette in the back of a pack of cigarettes. Open the pack as you ordinarily do and take one of the cigarettes. Put this cigarette again, but through the slit. Half of the cigarette will thus be on the outside of the pack. Hold the pack again, but through the slit. Here is how the trick is done: Take a cigarette in the back of a pack of cigarettes.
