6-5-52

Dear Fred: I am quite overcome by your kind letter with its over-complimentary remarks and also by the enclosed gift. Needless to say I expected no present from you - it was recompense enough to have America's top surgeon with us for some weeks, to get better acquainted with yourself: we will always be under the influence of your powerful and inspiring personality. May God preserve you for many years of happy and useful life! Up here you have many devoted friends who are always honored to be able to contribute anything for your welfare.

I saw Elmer Henderson in New York and we were astounded and pleased by his improvement - as in your case tremendous regression of a once frightening lesion with no signs of activity.

Kindest greetings and my best thanks to Mrs Rankin and yourself,  
Yours very respectfully  
Ch. H.
